JURY TRIAL DEMANDED

FIRST AMENDED COMPLAINT FOR PATENT INFRINGEMENT

Plaintiffs Ericsson Inc. and Telefonaktiebolaget LM Ericsson (collectively, “Ericsson”), file this Original Complaint for Patent Infringement against Samsung Electronics Co., Ltd., Samsung Electronics America, Inc., and Samsung Telecommunications America LLP, (collectively, “Defendants” or “Samsung”), and allege as follows:

BACKGROUND

1. Despite nearly two years of negotiations involving the most senior management of both companies, Samsung has refused to renew its expired license to Ericsson's industry leading portfolio of telecommunication patents on the same fair, reasonable and non-discriminatory terms that Samsung's competitors have previously accepted. Ericsson has therefore filed this suit against Samsung seeking the court's protection of Ericsson's valuable intellectual property rights.

2. For more than two decades, Ericsson has pioneered the development of the modern cellular network. Due to the research and development work of its more than one hundred thousand employees, over one thousand networks with more than two billion subscriptions utilize Ericsson network equipment. Forty percent of all mobile calls are made through Ericsson systems. Ericsson's equipment can be found in more than one hundred and eighty countries.

3. As a result of its extensive research and development efforts, Ericsson has been awarded more than thirty thousand patents worldwide. Ericsson is widely viewed as one of the leading innovators in the field of cellular telephony.

4. Ericsson owns and patented hundreds of inventions that are essential to the GSM, GPRS, EDGE, WCDMA, LTE and 802.11 wireless standards ("standard-essential patents"). Ericsson has repeatedly committed to license its standard-essential patents on fair, reasonable, and non-discriminatory ("FRAND") terms. Ericsson also owns a valuable portfolio of patents that, while not essential to compliance with any industry standards, are globally used to design and manufacture cellular handsets, smartphones, tablet computers, televisions, and many other electronic devices ("implementation patents").

5. Ericsson has widely licensed its patents. It has entered into more than one hundred license agreements for its standard-essential patents. These licenses evidence the FRAND royalties that the telecommunications industry has agreed to pay Ericsson. Ericsson re-invests much of the licensing revenue it receives under these agreements into inventing the future generation of telecommunications standards.

6. Samsung previously licensed Ericsson's standard-essential patents in 2001 and renewed that license in 2007. Samsung's license has now expired. Samsung has sold

hundreds of millions of unlicensed cellular handsets, smartphones, tablet computers, and televisions since the expiration of its license, including its flagship Galaxy S III smartphone.

7. Ericsson has extended multiple offers to Samsung to renew the license on FRAND terms during the past two years of negotiations between the parties. These negotiations have been unsuccessful for the simple reason that Samsung refuses to pay the FRAND rate paid by its competitors for Ericsson's standard-essential patents. Instead, Samsung demands Ericsson renew its license at a rate that is a small fraction of the rate other similarly situated companies pay Ericsson. Samsung's refusal to pay a FRAND rate gives it an unfair competitive advantage over its competitors who have licensed Ericsson's patents.

8. Samsung has a history of manipulating its position on the amount of a FRAND rate depending on whether it finds itself as the licensor or licensee in a particular negotiation. The most recent example occurred when Samsung asserted its own patents, which it alleged were standard-essential against Apple. At the trial of that matter in the United States District Court for the Northern District of California, Samsung asserted all companies implementing a standard in its products must seek out and accept a license on FRAND terms. Yet, when the tables are turned and Samsung finds itself in the position of being the prospective licensee, it now refuses to license Ericsson's standard-essential portfolio at FRAND rates.

9. FRAND licensing is a two-way street. Contrary to Samsung's behavior, patent licensing under FRAND terms does not change from one day to the next depending on whether a company finds itself aligned as a licensor or licensee. Instead, FRAND

licensing requires that both the licensor is fair and reasonable in providing licensing terms and the licensee is fair and reasonable in accepting them. Despite Ericsson's best efforts to negotiate a license, including many alternative FRAND royalty structures and frameworks that Ericsson offered to Samsung, Samsung refuses to renew its license or to cease infringing.

10. Even more egregiously, Samsung has refused to provide Ericsson a license to its allegedly standard-essential patents on FRAND terms. Upon information and belief, Samsung refuses to license Ericsson under any declared standard-essential patents that it owns in an effort to compel Ericsson to license its patent portfolio at a small fraction of the rates that its competitors pay. This position violates Samsung's FRAND commitment.
