AMENDED COMPLAINT FOR PATENT INFRINGEMENT

Plaintiff Alex is the Best, LLC. (“AITB”), by and through its undersigned counsel, brings this action against Sprint Corporation, (“Sprint” and/or “Defendant”). In support of this Complaint, AITB alleges as follows:

NATURE OF THE SUIT

1. This is an action for patent infringement under the Patent Laws of the United States of America, 35 U.S.C. §§ 1 *et seq.*, including 35 U.S.C. § 271.

THE PARTIES

2. Plaintiff AITB is a limited liability company organized under the laws of the state of New York with its principal place of business at 75 82nd St., Brooklyn, New York 11209.

3. On information and belief, Sprint is a Delaware corporation with its principal place of business at 6200 Sprint Parkway, Overland Park, Kansas 66251. Sprint can be served with process through its agent, Corporation Service Company, 2711 Centerville Road, Suite 400, Wilmington, Delaware 19808.

4. Defendant is in the business of making, using, selling, offering to sell and/or importing network-enabled image capturing devices.

JURISDICTION AND VENUE

5. This Court has subject matter jurisdiction over this action pursuant to 28 U.S.C. §§ 1331 and 1338(a) because the action arises under the patent laws of the United States, 35 U.S.C. §§ 1 *et seq.*

6. This Court has personal jurisdiction over Defendant by virtue of its systematic and continuous contacts with this jurisdiction, as well as because of the injury to AITB and the cause of action AITB has raised, as alleged herein.

7. Defendant is subject to this Court's specific and general personal jurisdiction pursuant to due process and/or the Delaware Long-Arm Statute, due to at least its substantial business in this forum, including: (i) at least a portion of the infringement alleged herein; and (ii) regularly doing or soliciting business, engaging in other persistent courses of conduct, and/or deriving substantial revenue from goods and services provided to individuals in this District.

8. Defendant has conducted and does conduct business within this District, directly or through intermediaries, resellers, agents, by offering to sell, selling, and/or advertising (including the use of interactive web pages with promotional material) products in this District that infringe the Asserted Patents.

9. In addition to Defendant continuously and systematically conducting business in this District, the causes of action against Defendant are connected (but not limited) to Defendant's purposeful acts committed in this District, including Defendant's making, using,

importing, offering to sell, or selling products which include features that fall within the scope of at least one claim of the Asserted Patents.

10. Venue lies in this District under 28 U.S.C. §§ 1391 and 1400(b) because, among other reasons, Defendant is subject to personal jurisdiction in this District, and has committed and continues to commit acts of patent infringement in this District. For example, Defendant has used, sold, offered to sell, and/or imported infringing products in this District.

THE PATENTS-IN-SUIT

11. There are three patents at issue in this action: United States Patent Nos. 8,134,600 (the “’600 Patent”); 8,477,197 (the “’197 Patent”); 8,581,991 (the “’991 Patent”) (collectively, the “Asserted Patents”).

The ’600 Patent

AITB is presently the owner by assignment of the ’600 Patent, having received all rights, title, and interest in and to the ’600 Patent. AITB possesses all rights of recovery under the ’600 Patent, including the exclusive right to recover for past infringement. A true and correct copy of the ’600 Patent is attached to this Complaint as Exhibit A.

The ’197 Patent

13. On July 2, 2013 the USPTO duly and legally issued the ’197 Patent, entitled “Internet Direct Device” after a full and fair examination to inventors Frank Clemente and Ted Feaser. AITB is presently the owner by assignment of the ’197 Patent, having received all rights, title, and interest in and to the ’197 Patent. AITB possesses all rights of recovery under

the '197 Patent, including the exclusive right to recover for past infringement. A true and correct copy of the '197 Patent is attached to this Complaint as Exhibit B.

The '991 Patent

14. On November 12, 2013 the USPTO duly and legally issued the '991 Patent, entitled "Integrated Internet Camera System and Method" after a full and fair examination to inventor Frank Clemente. AITB is presently the owner by assignment of the '991 Patent, having received all rights, title, and interest in and to the '991 Patent. AITB possesses all rights of recovery under the '991 Patent, including the exclusive right to recover for past infringement. A true and correct copy of the '991 Patent is attached to this Complaint as Exhibit C.

DESCRIPTION OF THE ACCUSED INSTRUMENTALITIES

15. Defendant's network-enabled image-capturing devices (hereinafter, "Image-capturing Devices"), including but not limited to the Sprint Samsung Galaxy S3, are configured to take still and video images and transmit and receive those images to and from other Image-capturing Devices, as well as a website application, on which still and video images captured by the Image-capturing Devices can be stored and managed, using a variety of connections, including but not limited to Wi-Fi and various 3G and 4G cellular networks. Defendants' Image-capturing Devices also are used to perform the method of transmitting and receiving still or video images associated with a user over a communications network.

16. For example, the Sprint Samsung Galaxy S3 includes built-in applications that allow a user to transmit and receive still or video images over various communications networks to another Internet direct device, and allow still and video images captured by the device to be uploaded to an internet-accessible archive to be stored and managed. The Sprint Samsung Galaxy S3 also allows a user to access the Internet through a variety of connections, including

but not limited to Wi-Fi and various 3G and 4G cellular networks. Accordingly, the Sprint Samsung Galaxy S3 is an Internet direct device with an imaging system to capture still or video images.
