6 Attorneys for Plaintiff
7 STRAIGHT PATH IP GROUP, INC.

8 **UNITED STATES DISTRICT COURT**
9 **NORTHERN DISTRICT OF CALIFORNIA**
SAN JOSE DIVISION

10 STRAIGHT PATH IP GROUP, INC.,

11 Plaintiff,

12 v.

13 AVAYA INC.

14 Defendant.

15 AND RELATED COUNTERCLAIMS.

Case No. 3:14-cv-04309

COMPLAINT

RUSS, AUGUST & KABAT

1 1. Plaintiff Straight Path IP Group, Inc. ("Straight Path" or "Plaintiff"), for its Complaint
2 against Defendant Avaya Inc. ("Defendant"), hereby alleges as follows:

3 **PARTIES**

4 2. Straight Path is a Delaware corporation with its principal place of business at 5300
5 Hickory Park Dr. Suite 218, Glen Allen, VA 23059.

6 3. On information and belief, Defendant is a Delaware corporation with its principal place
7 of business at 4655 Great American Parkway, Santa Clara, California 95054.

8 **NATURE OF THE ACTION**

9 4. This is a civil action for the infringement of United States Patent No. 6,009,469 (the "469
10 Patent") (attached as Exhibit A), United States Patent No. 6,108,704 (the "704 Patent") (attached
11 as Exhibit B), United States Patent No. 6,131,121 (the "121 Patent") (attached as Exhibit C), and
12 United States Patent No. 6,701,365 (the "365 Patent") (attached as Exhibit D) (collectively, the
13 "Patents-in-Suit") under the patent laws of the United States, 35 U.S.C. § 1, et seq.

14 5. This action involves Defendant's manufacture, use, sale, offer for sale, and/or importation
15 into the United States of infringing products, methods, processes, services and systems that are
16 primarily used or primarily adapted for use in point-to-point network communications devices
17 and products containing same, including, for example but without limitation, phones, servers and
18 software used to perform voice over internet protocol ("VOIP"), that infringe one or more of the
19 claims of the Patents-in-Suit.

20 **JURISDICTION AND VENUE**

21 6. This Court has original jurisdiction over the subject matter of this Complaint under 28
22 U.S.C. §§ 1331 and 1338(a) because this action arises under the patent laws of the United States,
23 including 35 U.S.C. §§ 1, et seq.

24 7. Defendant is subject to personal jurisdiction in this judicial district because Defendant
25 regularly transacts business in this judicial district by, among other things, offering Defendant's
26 products and services to customers, business affiliates and partners located in this judicial
27 district. In addition, the Defendant has committed acts of direct infringement of one or more of
28 the claims of one or more of the Patents-in-Suit in this judicial district.

1 8. Venue in this district is proper under 28 U.S.C. § 1400(b) and 1391(b) and (c), because
2 the Defendant is subject to personal jurisdiction in this district and have committed acts of
3 infringement in this district.

4 **FACTUAL BACKGROUND**

5 9. The Patents-in-Suit were previously owned by NetSpeak Corporation ("NetSpeak").
6 NetSpeak used the technology claimed in the Patents-in-Suit in one of its products, WebPhone.

7 10. WebPhone earned numerous awards from publications in the fields of computer and
8 communications technology. In 1996, WebPhone was selected by PC Magazine as the "Editors
9 Choice" of Internet telephone software. Computer Telephony Magazine also designated
10 WebPhone an "Editor's Choice" product in 1996. In 1998, Internet Telephony magazine named
11 WebPhone one of its "Product[s] of the Year."

12 11. WebPhone was also the subject of contemporaneous published articles that praised the
13 product. The authors of these articles described WebPhone and its underlying technology as
14 being new and original, and commented on the potentially far-reaching implications of
15 WebPhone for communications and computer technology. For example, in August of 1996,
16 Computer Telephony Magazine published an article in which it concluded that NetSpeak's new
17 Business WebPhone System had the potential to be "absolutely revolutionary." The Computer
18 Telephony Magazine article observes that the method devised by the inventors for establishing
19 point-to-point connections between WebPhone client processes was a "new method" that
20 distinguished WebPhone from other competing products available at the time. A separate review
21 by Consummate Winsock Apps in 1996 observed that "WebPhone may well be on its way
22 towards becoming the killer app that puts to shame similar offerings" from NetSpeak's
23 competitors.

24 12. Straight Path is the lawful owner-by-assignment of all right, title and interest in and to the
25 Patents-in-Suit. Straight Path is a majority owned subsidiary of Straight Path Communications,
26 Inc. ("SPCI"). SPCI is a holding company for two companies, Straight Path and Straight Path
27 Spectrum, Inc. ("Straight Path Spectrum"). Straight Path Spectrum holds, leases and markets
28 fixed wireless spectrum in the 39 GHz and 29 GHz spectrums that are used for

1 telecommunications. In particular, Straight Path Spectrum's spectrum is primarily used to
2 provide backhaul services for existing wireless Internet service providers and for cellular mobile
3 backhaul.

4 13. All maintenance fees for the Patents-in-Suit have been timely paid, and there are no fees
5 currently due.

6 **COUNT I**

7 **(Defendant's Infringement of the '469 Patent)**

8 14. Paragraphs 1 through 13 are incorporated by reference as if fully restated herein.

9 15. United States Patent No. 6,009,469, entitled "Graphic User Interface For Internet
10 Telephony Application," issued on December 28, 1999 from United States Patent Application
11 No. 08/721,316 filed on September 25, 1996. On May 10, 2011, an Ex Parte Reexamination
12 Certificate issued for the '469 Patent. A true and correct copy of the '469 Patent is attached as
13 Exhibit A.

14 16. Defendant has been and now is directly infringing one or more claims of the '469 Patent
15 under 35 U.S.C. §271(a), in this judicial District and elsewhere in the United States, by, among
16 other things, making, using, selling, offering to sell and/or importing into the United States for
17 subsequent sale or use computer program products capable of executing a first process,
18 connecting to a server process over a computer network, and that include program code for (a)
19 generating a user-interface enabling control of the first process; (b) determining a currently-
20 assigned network protocol address through which the first process can be accessed; (c)
21 connecting to the server and forwarding the process' assigned network protocol address and a
22 unique identifier; and (d) establishing a point-to-point connection with another process in
23 response to user commands. For example, and without limitation, Defendant directly infringes
24 the '469 Patent by making, using, selling, offering to sell and/or importing into the United States
25 IP telephony, video conference and telepresence products such as Defendant's Aura Platform.
26 These products infringe the '469 Patent literally and/or under the doctrine of equivalents.

1 17. Defendant actively, knowingly, and intentionally induced, and continues to actively,
2 knowingly, and intentionally induce, infringement of the '469 Patent under 35 U.S.C. ¶271(b) by
3 its customers and end users.

4 18. Defendant has had knowledge of the '469 Patent since around October 2012, when
5 Defendant began discussing the '469 Patent with Straight Path's predecessor-in-interest,
6 Innovative Communications Technologies, Inc. ("ICTI").

7 19. Defendant has induced its customers and end users to infringe the '469 Patent by using
8 computer program products capable of executing a first process, connecting to a server process
9 over a computer network, and that include program code for (a) generating a user-interface
10 enabling control of the first process; (b) determining a currently-assigned network protocol
11 address through which the first process can be accessed; (c) connecting to the server and
12 forwarding the process' assigned network protocol address and a unique identifier; and (d)
13 establishing a point-to-point connection with another process in response to user commands. For
14 example, Defendant encourages its customers and end users to make infringing point-to-point
15 connections through the materials it provides to its customers, including those materials provided
16 on Defendant's Internet website. *See, e.g.,*
17 <http://downloads.avaya.com/css/P8/documents/100164646> (Avaya Flare Overview and Planning
18 Guide); <http://downloads.avaya.com/css/P8/documents/100164741> (Avaya Flare Quick
19 Reference Guide).

20 20. Defendant specifically intends its customers and/or end users to infringe the '469 Patent,
21 either literally or by the doctrine of equivalents, because Defendant has known about the '469
22 Patent and how Defendant's products infringe the claims of the '469 Patent but Defendant has not
23 taken steps to prevent the infringement by its customers and/or end users. Accordingly,
24 Defendant has acted with the specific intent to induce infringement of the '469 Patent.

25 21. Accordingly, Defendant has induced infringement of the '469 Patent under 35 U.S.C.
26 §271(b).

1 22. Defendant has had knowledge of and notice of the '469 Patent and its infringement since
2 at least October 2012 and, despite this knowledge, continues to commit tortious conduct by way
3 of patent infringement.

4 23. Defendant has been and continues to be infringing one or more of the claims of the '469
5 Patent through the aforesaid acts.

6 24. Plaintiff is entitled to recover damages adequate to compensate for the infringement.

7 **COUNT II**

8 **(Defendant's Infringement of the '704 Patent)**

9 25. Paragraphs 1 through 13 are incorporated by reference as if fully restated herein.

10 26. United States Patent No. 6,108,704, entitled "Point-to-Point Internet Protocol," issued on
11 August 22, 2000 from United States Patent Application No. 08/533,115 filed on September 25,
12 1995. On October 26, 2010, an Ex Parte Reexamination Certificate issued for the '704 Patent. A
13 true and correct copy of the '704 Patent is attached as Exhibit B.

14 27. Defendant has been and now is directly infringing one or more claims of the '704 Patent
15 under 35 U.S.C. §271(a), in this judicial District and elsewhere in the United States, by, among
16 other things, making, using, selling, offering to sell and/or importing into the United States for
17 subsequent sale or use computer program products capable of executing a first process,
18 connecting to a second process and a server over a computer network, and that include program
19 code for (a) transmitting a network protocol address for the first process to the server; (b)
20 transmitting a query to server as to whether a second process is connected to the network; (c) if
21 the response is in the affirmative, receiving the network address of the second process; and (d)
22 after receiving the network address of the second process, establishing a point-to-point
23 communication link between the first and second processes. For example, and without
24 limitation, Defendant directly infringes the '704 Patent by making, using, selling, offering to sell
25 and/or importing into the United States IP telephony, video conference and telepresence products
26 such as Defendant's Aura Platform. These products infringe the '704 Patent literally and/or under
27 the doctrine of equivalents.
28

1 28. Defendant actively, knowingly, and intentionally induced, and continues to actively,
2 knowingly, and intentionally induce, infringement of the '704 Patent under 35 U.S.C. ¶271(b) by
3 its customers and end users.

4 29. Defendant has had knowledge of the '704 Patent since around October 2012, when
5 Defendant began discussing the '704 Patent with Straight Path's predecessor-in-interest, ICTI.

6 30. Defendant has induced its customers and end users to infringe the '704 Patent by using
7 computer program products capable of executing a first process, connecting to a second process
8 and a server over a computer network, and that include program code for (a) transmitting a
9 network protocol address for the first process to the server; (b) transmitting a query to server as
10 to whether a second process is connected to the network; (c) if the response is in the affirmative,
11 receiving the network address of the second process; and (d) after receiving the network address
12 of the second process, establishing a point-to-point communication link between the first and
13 second processes. For example, Defendant encourages its customers and end users to make
14 infringing point-to-point connections through the materials it provides to its customers, including
15 those materials provided on Defendant's Internet website. *See, e.g.*,
16 <http://downloads.avaya.com/css/P8/documents/100164646> (Avaya Flare Overview and Planning
17 Guide); <http://downloads.avaya.com/css/P8/documents/100164741> (Avaya Flare Quick
18 Reference Guide).

19 31. Defendant specifically intends its customers and/or end users to infringe the '704 Patent,
20 either literally or by the doctrine of equivalents, because Defendant has known about the '704
21 Patent and how Defendant's products infringe the claims of the '704 Patent but Defendant has not
22 taken steps to prevent the infringement by its customers and/or end users. Accordingly,
23 Defendant has acted with the specific intent to induce infringement of the '704 Patent.

24 32. Accordingly, Defendant has induced infringement of the '704 Patent under 35 U.S.C.
25 §271(b).

26 33. Defendant has had knowledge of and notice of the '704 Patent and its infringement since
27 at least October 2012 and, despite this knowledge, continues to commit tortious conduct by way
28 of patent infringement.

1 34. Defendant has been and continues to be infringing one or more of the claims of the '704
2 Patent through the aforesaid acts.

3 35. Plaintiff is entitled to recover damages adequate to compensate for the infringement.

4 **COUNT III**

5 **(Defendant's Infringement of the '121 Patent)**

6 36. Paragraphs 1 through 13 are incorporated by reference as if fully restated herein.

7 37. United States Patent No. 6,131,121, entitled "Point-to-Point Computer Network
8 Communication Utility Utilizing Dynamically Assigned Network Protocol Addresses," issued on
9 October 10, 2000 from United States Patent Application No. 08/719,554 filed on September 25,
10 1996. On December 14, 2010, an Ex Parte Reexamination Certificate issued for the '121 Patent.
11 A true and correct copy of the '121 Patent is attached as Exhibit C.

12 38. Defendant has been and now is directly infringing one or more claims of the '121 Patent
13 under 35 U.S.C. §271(a), in this judicial District and elsewhere in the United States, by, among
14 other things, making, using, selling, offering to sell and/or importing into the United States for
15 subsequent sale or use apparatuses capable of executing a first process operatively coupled over
16 a computer network to a second process and a directory database server process, and that include
17 program logic for (a) forwarding a dynamically assigned network protocol address through
18 which the first process can be accessed to the address server; (b) querying the address as to
19 whether the second process is connected to the computer network; (c) receiving a dynamically
20 assigned network protocol address of the second process if it is connected to the computer
21 network; and (d) establishing a point-to-point communication link with the second process in
22 response to receiving its address. For example, and without limitation, Defendant directly
23 infringes the '121 Patent by making, using, selling, offering to sell and/or importing into the
24 United States IP telephony, video conference and telepresence products such as Defendant's
25 Aura Platform. These products infringe the '121 Patent literally and/or under the doctrine of
26 equivalents.

1 39. Defendant actively, knowingly, and intentionally induced, and continues to actively,
2 knowingly, and intentionally induce, infringement of the '121 Patent under 35 U.S.C. ¶271(b) by
3 its customers and end users.

4 40. Defendant has had knowledge of the '121 Patent since around October 2012, when
5 Defendant began discussing the '121 Patent with Straight Path's predecessor-in-interest, ICTI.

6 41. Defendant has induced its customers and end users to infringe the '121 Patent by using
7 apparatuses capable of executing a first process operatively coupled over a computer network to
8 a second process and a directory database server process, and that include program logic for (a)
9 forwarding a dynamically assigned network protocol address through which the first process can
10 be accessed to the address server; (b) querying the address as to whether the second process is
11 connected to the computer network; (c) receiving a dynamically assigned network protocol
12 address of the second process if it is connected to the computer network; and (d) establishing a
13 point-to-point communication link with the second process in response to receiving its address.
14 For example, Defendant encourages its customers and end users to make infringing point-to-
15 point connections through the materials it provides to its customers, including those materials
16 provided on Defendant's Internet website. *See, e.g.,*
17 <http://downloads.avaya.com/css/P8/documents/100164646> (Avaya Flare Overview and Planning
18 Guide); <http://downloads.avaya.com/css/P8/documents/100164741> (Avaya Flare Quick
19 Reference Guide).

20 42. Defendant specifically intends its customers and/or end users to infringe the '121 Patent,
21 either literally or by the doctrine of equivalents, because Defendant has known about the '121
22 Patent and how Defendant's products infringe the claims of the '121 Patent but Defendant has not
23 taken steps to prevent the infringement by its customers and/or end users. Accordingly,
24 Defendant has acted with the specific intent to induce infringement of the '121 Patent.

25 43. Accordingly, Defendant has induced infringement of the '121 Patent under 35 U.S.C.
26 §271(b).

RUSS, AUGUST & KABAT

1 44. Defendant has had knowledge of and notice of the '121 Patent and its infringement since
2 at least October 2012 and, despite this knowledge, continues to commit tortious conduct by way
3 of patent infringement.

4 45. Defendant has been and continues to be infringing one or more of the claims of the '121
5 Patent through the aforesaid acts.

6 46. Plaintiff is entitled to recover damages adequate to compensate for the infringement.

7 **COUNT IV**

8 **(Defendant's Infringement of the '365 Patent)**

9 47. Paragraphs 1 through 13 are incorporated by reference as if fully restated herein.

10 48. United States Patent No. 6,701,365, entitled "Point-to-Point Internet Protocol," issued on
11 March 2, 2004 from United States Patent Application No. 09/345,222 filed on June 30, 1999.
12 On August 3, 2010, an Ex Parte Reexamination Certificate issued for the '365 Patent. A true and
13 correct copy of the '365 Patent is attached as Exhibit D.

14 49. Defendant has been and now is directly infringing one or more claims of the '365 Patent
15 under 35 U.S.C. §271(a), in this judicial District and elsewhere in the United States, by, among
16 other things, making, using, selling, offering to sell and/or importing into the United States for
17 subsequent sale or use computer program products for use with a server operatively connected
18 over a computer network to a plurality of processes, and that include program code for (a)
19 receiving the current dynamically assigned network protocol address of one of the processes
20 connected to the network; (b) receiving an identifier associated with the process; and (c)
21 receiving queries for either the address or the identifier from another process and allowing the
22 establishment of packet-based point-to-point communication between the processes. For
23 example, and without limitation, Defendant directly infringes the '365 Patent by making, using,
24 selling, offering to sell and/or importing into the United States IP telephony, video conference
25 and telepresence products such as Defendant's Aura Platform. These products infringe the '365
26 Patent literally and/or under the doctrine of equivalents.

27
28

1 50. Defendant actively, knowingly, and intentionally induced, and continues to actively,
2 knowingly, and intentionally induce, infringement of the '365 Patent under 35 U.S.C. ¶271(b) by
3 its customers and end users.

4 51. Defendant has had knowledge of the '365 Patent since around October 2012, when
5 Defendant began discussing the '365 Patent with Straight Path's predecessor-in-interest, ICTI.

6 52. Defendant has induced its customers and end users to infringe the '365 Patent by using
7 computer program products for use with a server operatively connected over a computer network
8 to a plurality of processes, and that include program code for (a) receiving the current
9 dynamically assigned network protocol address of one of the processes connected to the
10 network; (b) receiving an identifier associated with the process; and (c) receiving queries for
11 either the address or the identifier from another process and allowing the establishment of
12 packet-based point-to-point communication between the processes. For example, Defendant
13 encourages its customers and end users to make infringing point-to-point connections through
14 the materials it provides to its customers, including those materials provided on Defendant's
15 Internet website. *See, e.g.*, <http://downloads.avaya.com/css/P8/documents/100164646> (Avaya
16 Flare Overview and Planning Guide); <http://downloads.avaya.com/css/P8/documents/100164741>
17 (Avaya Flare Quick Reference Guide).

18 53. Defendant specifically intends its customers and/or end users to infringe the '365 Patent,
19 either literally or by the doctrine of equivalents, because Defendant has known about the '365
20 Patent and how Defendant's products infringe the claims of the '365 Patent but Defendant has not
21 taken steps to prevent the infringement by its customers and/or end users. Accordingly,
22 Defendant has acted with the specific intent to induce infringement of the '365 Patent.

23 54. Accordingly, Defendant has induced infringement of the '365 Patent under 35 U.S.C.
24 §271(b).

25 55. Defendant has had knowledge of and notice of the '365 Patent and its infringement since
26 at least October 2012 and, despite this knowledge, continues to commit tortious conduct by way
27 of patent infringement.
28

RUSS, AUGUST & KABAT

1 56. Defendant has been and continues to be infringing one or more of the claims of the '365
2 Patent through the aforesaid acts.

3 57. Plaintiff is entitled to recover damages adequate to compensate for the infringement.

4 **PRAYER FOR RELIEF**

5 Wherefore, Straight Path IP Group, Inc., respectfully requests the following relief:

- 6 a) A judgment that Defendant has infringed the '469 Patent;
- 7 b) A judgment that Defendant has infringed the '704 Patent;
- 8 c) A judgment that Defendant has infringed the '121 Patent;
- 9 d) A judgment that Defendant has infringed the '365 Patent;
- 10 e) A judgment that awards Straight Path all appropriate damages under 35 U.S.C. § 284 for
- 11 the Defendant's past infringement, and any continuing or future infringement of the
- 12 Patents-in-Suit, up until the date such judgment is entered, including interest, costs, and
- 13 disbursements as justified under 35 U.S.C. § 284 and, if necessary, to adequately
- 14 compensate Straight Path for Defendant's infringement;
- 15 f) An adjudication that this case is exceptional within the meaning of 35 U.S.C. § 285;
- 16 g) An adjudication that Straight Path be awarded the attorneys' fees, costs, and expenses it
- 17 incurs in prosecuting this action; and
- 18 h) An adjudication that Straight Path be awarded such further relief at law or in equity as the
- 19 Court deems just and proper.

20 Respectfully submitted,
