#### **FACTUAL BACKGROUND**

6. The '983 patent is titled "Security Alarm System." A copy of the '983 patent is attached hereto as Exhibit A.

7. The invention of the '983 patent generally relates to a security alarm system for protecting a structure using motion detectors and cameras. The claimed method and system of the '983 patent includes a handheld telecommunications module, such as a touch screen, that transmits commands to and obtains images from the cameras.

8. The application that issued as the '983 patent was filed on April 27, 2009, and the United States Patent and Trademark Office duly and legally issued the '983 patent on January 4, 2011. The '983 patent is a continuation of application No. 11/692,430 (now Patent No. 7,526,105) filed March 28, 2007, and claims priority of

provisional application No. 60/743,894, filed on March 29, 2006, and provisional application No. 60/804,660 filed on June 14, 2006.
