III. COUNT I
(PATENT INFRINGEMENT OF UNITED STATES PATENT NO. 6,917,304)

8. Plaintiff incorporates the above paragraphs herein by reference.

9. On July 12, 2005, United States Patent No. 6,917,304 ("the '304 Patent") was duly and legally issued by the United States Patent and Trademark Office. The '304 Patent is titled "Wireless Mutliplex [*sic*] Data Transmission System." The PCT application leading to the '304 Patent was filed on April 3, 1998. A true and correct copy of the '304 Patent is attached hereto as Exhibit A and incorporated herein by reference.

10. Magnacross is the assignee of all right, title and interest in the '304 patent, including all rights to enforce and prosecute actions for infringement and to collect damages for all relevant times against infringers of the '304 Patent. Accordingly, Plaintiff possesses the exclusive right and standing to prosecute the present action for infringement of the '304 Patent by Defendant.

11. **Direct Infringement.** Upon information and belief, Defendant has been and now is directly infringing at least claim 1 of the '304 patent in the State of Texas, in this District, and elsewhere in the United States, by actions comprising using a LTE(4G) network base station to receive audio and video data transmissions from mobile devices, such as smartphones, that have a video sensor for capturing video and an audio sensor for capturing audio, which collectively perform the method of the wireless transmission of data through a communications channel from at least two data sensors to a data processor with the method comprising the step of division of the channel into sub-channels and transmitting the data from the data sensors respectively though the sub-channels accordingly; characterized by a) the step of division of the communications

channel being effected asymmetrically whereby the data carrying capacities of the sub-channels are unequal; and b) the data rate required for data transmission from the local sensors differing substantially between the two sensors; and c) allocating data from the local data sensors to respective ones or groups of sub-channels in accordance with the data carrying capacities of the sub-channels.

12. Plaintiff has been damaged as a result of Defendant's infringing conduct. Defendant is thus liable to Plaintiff for damages in an amount that adequately compensates Plaintiff for such Defendant's infringement of the '304 patent, *i.e.*, in an amount that by law cannot be less than would constitute a reasonable royalty for the use of the patented technology, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

13. On information and belief, Defendant will continue its infringement of one or more claims of the '304 patent unless enjoined by the Court. Each and all of the Defendant's infringing conduct thus causes Plaintiff irreparable harm and will continue to cause such harm without the issuance of an injunction.

14. On information and belief, Defendant has had at least constructive notice of the '304 patent by operation of law, and there are no marking requirements that have not been complied with.

VI. JURY DEMAND

Plaintiff, under Rule 38 of the Federal Rules of Civil Procedure, requests a trial by jury of any issues so triable by right.

VII. PRAYER FOR RELIEF

WHEREFORE, Plaintiff respectfully requests that the Court find in its favor and against Defendant, and that the Court grant Plaintiff the following relief:

a. Judgment that one or more claims of United States Patent No. 6,917,304 have been infringed, either literally and/or under the doctrine of equivalents, by Defendant;

b. Judgment that Defendant account for and pay to Plaintiff all damages to and costs incurred by Plaintiff because of Defendant's infringing activities and other conduct complained of herein;

c. That Plaintiff be granted pre-judgment and post-judgment interest on the damages caused by Defendant's infringing activities and other conduct complained of herein;

d. That Defendant be permanently enjoined from any further activity or conduct that infringes one or more claims of United States Patent No. 6,917,304; and

e. That Plaintiff be granted such other and further relief as the Court may deem just and proper under the circumstances.

Dated: May 26, 2015

Respectfully submitted,

/s/ David R. Bennett
