COMPLAINT

Plaintiff, Hawk Technology Systems, LLC (“Hawk”), hereby sues Nexstar Broadcasting Group, Inc. (“Nexstar”) and alleges:

NATURE OF THE ACTION

1. Nexstar infringed Claim 12 (“Claim 12”) of United States Patent No. RE43,462 (‘462 Patent), or one or more of Claim 12’s dependent claims. The ‘462 Patent is a reissue of United States Patent No. 5,625,410 (the ‘410 Patent). The independent claims in the reissued ‘462 Patent are substantially identical to the corresponding claims in the original ‘410 Patent.

2. The abstract for the ‘462 Patent states:

A PC-based system for monitoring and storing representative images from video cameras which may be utilized for security or other monitoring applications. Camera inputs from digital or analog sources are individually and independently digitized and displayed at a first set of image sizes, sampling rates, and frame rates, and may be stored in digital form on various recording media at a second set of image sizes, sampling rates, and frame rates, and these two sets of sizes and rates may or may not be identical. Provisions are included for adding detection or alarm systems which will automatically alter image size, sampling rate and/or frame rate of an individual input source, or activate other physical responses. In addition to security system monitoring, further applications of the invention are disclosed for process monitoring in manufacturing environments and also for applications in videoconferencing.

15. MFI obtained its rights, title, and interest in the '462 Patent by virtue of an assignment from Messrs. Washino and Schwab.

Claim 12 Of The '462 Patent

1 16. Claim 12 of the '462 patent states:

2 The method of simultaneously displaying and storing multiple video images, comprising
3 the steps of:

4 receiving video images at a personal computer based system from one or more sources;
5 digitizing any of the images not already in digital form using an analog-to-digital
6 converter;

7 displaying at least certain of the digitized images in separate windows on a personal
8 computer based display device, using a first set of temporal and spatial parameters
9 associated with each image in each window;

10 converting one or more of the video source images into a data storage format using a
11 second set of temporal and spatial parameters associated with each image; and

23 counsel a reasonable fee for its services.

24 22. Pursuant to 35 U.S.C. § 285, Hawk is entitled to recover its attorneys' fees.

25 23. For the avoidance of doubt, Hawk only seeks damages which are not barred by the
26 statute of limitations for infringement that occurred prior to the patent expiring on April 29, 2014.

COUNT I: DIRECT INFRINGEMENT OF THE '462 PATENT

24. The allegations contained in paragraphs 1-23 above are hereby re-alleged as if fully set forth herein.
