CIVIL ACTION NO. 6:15-CV-00742

JURY TRIAL DEMANDED

**PLAINTIFF'S ORIGINAL COMPLAINT**

Plaintiff Digital Reg of Texas, LLC (“Plaintiff” or “Digital Reg”), by and through its attorneys, for its Complaint against Siemens Product Lifecycle Management Software, Inc. (“Defendant” or “Siemens”), and demanding trial by jury, hereby alleges as follows:

**I. NATURE OF THE ACTION**

1. This is an action for patent infringement arising under the patent laws of the United States, 35 U.S.C. §§ 271, *et seq.*, to enjoin and obtain damages resulting from Defendant’s unauthorized use, sale, and offer to sell in the United States of products, methods, processes, services and/or systems that infringe one or more claims of United States Patent No. 6,389,541, issued on May 14, 2002, for “Regulating Access to Digital Content” naming Patrick E. Patterson as inventor (the “541 Patent”), a true and correct copy of which is attached hereto as **Exhibit 1**.

**II. PARTIES**

2. Digital Reg is a limited liability corporation organized and existing under the laws of the State of Texas.

3. On information and belief, Siemens Product Lifecycle Management Software Inc. is a Delaware corporation with its principal place of business located at 5800 Granite Parkway, Suite 600, Plano, Texas 75024-6612. Upon information and belief, Defendant Siemens Product Lifecycle Management Software Inc. is authorized to do business in Texas. Siemens Product Lifecycle Management Software Inc. may be served by serving its registered agent, C T Corporation System, 1999 Bryan St., Suite 900, Dallas, Texas 75201-3136.

### **III. JURISDICTION AND VENUE**

4. This is an action for patent infringement which arises under the Patent Laws of the United States, in particular, 35 U.S.C. §§271, 281, 283, 284 and 285.

5. This Court has exclusive jurisdiction over the subject matter of this action under 28 U.S.C. §§1331 and 1338(a).

6. On information and belief, venue is proper in this district pursuant to 28 U.S.C. §§ 1391(b), 1391(c), and 1400(b) because Defendant has transacted business in this district, and has committed and/or induced acts of patent infringement in this district.

7. On information and belief, Defendant Siemens is subject to this Court's specific and general personal jurisdiction pursuant to due process and/or the Texas Long Arm Statute, due at least to its substantial business in this forum, including: (i) at least a portion of the infringements alleged herein; and (ii) regularly doing or soliciting business, engaging in other persistent courses of conduct, and/or deriving substantial revenue from goods and services provided to individuals in Texas and in this Judicial District.

### **IV. FACTUAL ALLEGATIONS**

8. Digital Reg is a subsidiary of DRM Technologies, L.L.C. ("DRM"). Digital Reg and DRM have been leading pioneers and innovators in the areas of securing digital content, secure delivery of digital content, and tracking and authorizing use of digital content.

9. As early as 1997, the founders of Digital Reg envisioned a world where digital content would move freely about the internet while still protecting the rights of its creators. Digital Reg's affiliates and predecessors were recognized pioneers in this area, and have been awarded industry accolades and many patents, including the Patents-in-Suit.

10. Digital Reg's affiliates and predecessors were among the first to package and sell digital music, books, newspapers and documents on the Internet in 1998-1999, and were voted Best New Company at Internet World that year.

11. Defendant Siemens provides software and services directed to secure distribution of digital content and digital rights management, including, without limitation, Siemens PLM Software Licensing. To protect its software, Siemens requires that such software be activated by its customers in a manner that it directs and controls.

12. Defendant Siemens implements contractual protections in the form of license agreements with its customers to preclude the unauthorized reproduction, distribution and modification of its software. Moreover, Defendant Siemens implements technical precautions to attempt to thwart customers who would circumvent Siemens' control over the use and distribution of its software.

## **V. COUNT ONE**

### **DIRECT AND INDIRECT INFRINGEMENT OF U.S. PATENT NO. 6,389,541**

13. Digital Reg incorporates by reference its allegations in Paragraphs 1-12 as if fully restated in this paragraph.

14. Digital Reg is the assignee and owner of all right, title and interest to the '541 Patent. Digital Reg has the legal right to enforce the patent, sue for infringement, and seek equitable relief and damages.

15. On information and belief, Defendant Siemens, without permission of Digital Reg, has been and is presently infringing the '541 Patent, as infringement is defined by 35 U.S.C. § 271(a), including through making, using, selling and offering for sale methods and articles infringing one or more claims of the '541 Patent. Defendant Siemens is thus liable for direct infringement of the '541 Patent pursuant to 35 U.S.C. § 271(a).

16. On information and belief, at least since the filing of this Complaint, Defendant Siemens, without permission of Digital Reg, has been and is presently indirectly infringing the '541 Patent, including actively inducing infringement of the '541 Patent under 35 U.S.C. § 271(b) and contributing to infringement of the '541 Patent under 35 U.S.C. § 271(c). Such inducements include without limitation, with specific intent to encourage the infringement, knowingly inducing consumers to use infringing articles and methods that Siemens knew or should have known infringe one or more claims of the '541 Patent.

17. As a result of Siemens' infringement of the '541 Patent, Digital Reg has suffered monetary damages, and is entitled to an award of damages adequate to compensate it for such infringement under 35 U.S.C. § 284, but in no event less than a reasonable royalty.

## **VI. JURY DEMAND**

18. Plaintiff Digital Reg demands a trial by jury of all matters to which it is entitled to trial by jury, pursuant to FED. R. CIV. P. 38.

## **VII. PRAYER FOR RELIEF**

WHEREFORE, Digital Reg prays for judgment and seeks relief against Defendant as follows:

A. That the Court determine that the '541 Patent is infringed by Defendant Siemens;

- B. That the Court award damages adequate to compensate Digital Reg for the patent infringement that has occurred, together with prejudgment and post-judgment interest and costs, and an ongoing royalty for continued infringement;
- C. In the alternative, that the Court permanently enjoin Defendant pursuant to 35 U.S.C. §283; and
- D. That the Court award such other relief to Digital Reg as the Court deems just and proper.

DATED: August 12, 2015

Respectfully submitted,

/s/Andrew G. DiNovo
