**III. COUNT I**  
**(PATENT INFRINGEMENT OF UNITED STATES PATENT NO. 6,442,261)**

8. Plaintiff incorporates the above paragraphs herein by reference.

9. On August 27, 2002, United States Patent No. 6,442,261 (“the ‘261 Patent”) was duly and legally issued by the United States Patent and Trademark Office. The ‘261 Patent is titled “Call Recovery Method and Apparatus for an Attendant Telephone Set.” A true and correct copy of the ‘261 Patent is attached hereto as Exhibit A and incorporated herein by reference.

10. Voxathon is the assignee of all right, title and interest in the ‘261 patent, including all rights to enforce and prosecute actions for infringement and to collect damages for all relevant times against infringers of the ‘261 Patent. Accordingly, Plaintiff possesses the exclusive right and standing to prosecute the present action for infringement of the ‘261 Patent by Defendant.

11. **Direct Infringement.** Upon information and belief, Defendant has been and now is directly infringing at least claim 1 of the ‘261 patent in the State of Texas, in this District, and elsewhere in the United States, by actions comprising using an in-dash call system including without limitation using phone features of the Lexus Hands-free phone system to receive incoming telephone calls, identifying a telephone number of the calling party of each incoming telephone call, assigning each incoming telephone call to a next available call appearance button, storing the identified telephone number for each incoming telephone call in a memory device, and automatically redialing, in response to the selection of one of the call appearance buttons, the stored telephone number assigned to the selected call appearance button.

12. **Indirect Infringement.** Upon information and belief, Defendant has been and now is indirectly infringing by way of inducing infringement and contributing to the infringement of at least claim 1 of the '261 patent in the State of Texas, in this District, and elsewhere in the United States, by providing an in-dash call system including without limitation using phone features of the Lexus Hands-free phone system, as described above for use by Defendant's customers. Defendant is a direct and indirect infringer, and its customers using the accused instrumentalities are direct infringers. Upon information and belief, Defendant had actual knowledge of the '261 patent since at least May 8, 2015, when it was served with the original Complaint in this action.

13. On information and belief, since becoming aware of the '261 patent, Defendant is and has been committing the act of inducing infringement by specifically intending to induce infringement by providing the accused instrumentalities to its customers and by aiding and abetting its use. Defendant encourages customers to use the accused instrumentalities, and provides instructions for conducting the directly infringing use. On information and belief, Defendant knew or should have known that through its acts it was and is inducing infringement of the '261 patent.

14. On information and belief, Defendant is and has been committing the act of contributory infringement by intending to provide the identified accused instrumentalities to its customers knowing that it is a material part of the invention, knowing that its use was made and adapted for infringement of the '261 patent, and further knowing that the system is not a staple article or commodity of commerce suitable for substantially noninfringing use.

15. Plaintiff has been damaged as a result of Defendant's infringing conduct. Defendant is thus liable to Plaintiff for damages in an amount that adequately compensates

Plaintiff for such Defendant's infringement of the '261 patent, *i.e.*, in an amount that by law cannot be less than would constitute a reasonable royalty for the use of the patented technology, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

16. On information and belief, Defendant will continue its infringement of one or more claims of the '261 patent unless enjoined by the Court. Each and all of the Defendant's infringing conduct thus causes Plaintiff irreparable harm and will continue to cause such harm without the issuance of an injunction.

17. On information and belief, Defendant has had at least constructive notice of the '261 patent by operation of law, and there are no marking requirements that have not been complied with.

#### **VI. JURY DEMAND**

Plaintiff, under Rule 38 of the Federal Rules of Civil Procedure, requests a trial by jury of any issues so triable by right.

#### **VII. PRAYER FOR RELIEF**

WHEREFORE, Plaintiff respectfully requests that the Court find in its favor and against Defendant, and that the Court grant Plaintiff the following relief:

- a. Judgment that one or more claims of United States Patent No. 6,442,261 have been infringed, either literally and/or under the doctrine of equivalents, by Defendant;
- b. Judgment that Defendant account for and pay to Plaintiff all damages to and costs incurred by Plaintiff because of Defendant's infringing activities and other conduct complained of herein;
- c. That Plaintiff be granted pre-judgment and post-judgment interest on the damages caused by Defendant's infringing activities and other conduct complained of herein;

- d. That Defendant be permanently enjoined from any further activity or conduct that infringes one or more claims of United States Patent No. 6,442,261; and
- e. That Plaintiff be granted such other and further relief as the Court may deem just and proper under the circumstances.

Dated: November 25, 2015

Respectfully submitted,

/s/ David R. Bennett
