- 9. The Court has personal jurisdiction over Express because, upon information and belief, Defendants conduct substantial business in the forum, directly or through intermediaries, including: (i) at least a portion of the infringing activity alleged herein; and (ii) regularly doing or soliciting business, engaging in other persistent courses of conduct and/or deriving substantial revenue from goods and services provided to persons in this district.
- 10. Venue is proper in this District pursuant to 28 U.S.C. §§ 1391(b), (c) and (d), as well as 28 U.S.C. § 1400(b). Furthermore, venue is proper based on Defendants' conducting of business within this District and/or soliciting and establishing online relationships with persons and entities within this District, including the infringing products or services alleged herein.

THE PATENTS-IN-SUIT

- 11. On March 6, 2007, United States Patent 7,188,100 (the "100 patent"), entitled "Search-on-the-Fly Report Generator," was duly and lawfully issued by the U.S. Patent and Trademark Office ("USPTO"). A true and correct copy of the '100 patent is attached hereto as Exhibit A.
- 12. On August 11, 2009, United States Patent 7,574,432 (the "'432 patent"), entitled "Search-on-the-Fly/Sort-on-the-Fly Search Engine," was duly and lawfully issued by the U.S. Patent and Trademark Office ("USPTO"). A true and correct copy of the '432 patent is attached hereto as Exhibit B.
- 13. The '100 and '432 patents are each valid and subsisting, and Vilox is the assignee and owner of all right, title and interest in and to the '100 and '432 patents, including the right to assert all causes of action arising under said patents and to any remedies for infringement of them.
- 14. Dr. Joseph DeBellis is a named inventor on each of the Patents-in-Suit, and is the sole inventor on the '432 patent. Over 15 years ago, Dr. DeBellis recognized a significant limitation on the ability to search, retrieve and sort results of queries across a single database or across multiple databases. At that time, search queries tended to return very large amounts of data that could not easily be sorted and reviewed by the user. Additionally, no iterative application of search functions or filters was available to search and/or sort a single or multiple databases. Furthermore, a query for a given piece of information might, in the case of multiple databases, retrieve the information from one database, but not another, even if the information is the same in each database, because of the different ways in which the data in the databases was organized.

15. To solve these long-standing problems, Dr. DeBellis conceived a method and apparatus for conducting on-the-fly searches that provide the user with an intuitive mechanism for searching databases without having to know anything about the database structure. This conception formed the basis for several inventions, including those claimed in the '100 and '432 patents.

 - 18. L Brands' and VSS's infringing actions are without license and authorization.

 - 22. L Brands' and BB&W's infringing actions are without license and authorization.
- 23. L Brands' and BB&W's unauthorized actions therefore constitute violation of Vilox's exclusive rights pursuant to 35 U.S.C. § 271(a), and Vilox is entitled to recover from L Brands and BB&W the damages sustained by Vilox as a result of their infringement of the '432

patent in an amount to be determined at trial, which amount shall be no less than a reasonable royalty, together with interest and costs as fixed by this Court pursuant to 35 U.S.C. § 284.
