PATENT INFRINGEMENT

8. On May 12, 1998, the United States Patent and Trademark Office (“PTO”) issued the ’345 and ’346 Patents, entitled “Image Retention and Information Security System,” after a full and fair examination. The ’345 Patent relates generally to video monitoring systems, and in particular to such systems that store and retrieve images and related transaction data by the use of computer equipment and digital storage. The ’346 Patent relates generally to video monitoring systems, and in particular to such systems that store images based on the detection of changes in the pixilation between images.

9. The ’345 Patent includes three independent claims and six dependent claims. The ’346 Patent contains five independent and two dependent claims.

10. The ’345 and ’346 Patents were originally assigned to Dozier Financial Corporation. Dozier Financial Corporation later changed its name to Trover Group, Inc. Plaintiff Trover is the successor-in-interest to Dozier Financial Corporation and is the assignee of all rights, title and interest in and to the ’345 and ’346 Patents and possesses all rights of recovery under the ’345 and ’346 Patents.

Infringement of the ’345 and ’346 Patents

11. CNB manufactures and/or sells to customers within the United States numerous video recording devices, including digital video recorders (“DVRs”) and digital cameras that infringe the ’345 and/or ’346 Patents, including but not limited to the following (collectively “Accused Products”):

<u>Cameras</u>	<u>Recorders</u>
IGC2050F	MDS4848
NV22-1MH	HDS4848E
IVC5055VR	HDS4848DV

IPM3063N	MDF1212
ISMCI063N	HDF1212E

12. The Accused Products allow images to be compressed in various digital formats. The Accused Products also allow images to be captured along with transaction data, such that the images and the transaction data can be stored and later retrieved for examination. The Accused Products also include motion detection functionality that compares two digitized images to measure the extent of change from the first image to the second. If the extent of change is greater than a reference value, then the second image is saved. Later the saved images can be retrieved for examination.

13. CNB tests, demonstrates and provides training on how to operate the Accused Products in the United States. For example, CNB routinely participates in industry trade shows such as the ISC West trade show held every year in Las Vegas, Nevada. At this trade show, CNB has displayed one or more of the Accused Products and has provided demonstrations of the various functions and features of those products, including the motion detection feature. In addition, CNB provides demonstrations of many of its products over its internet website, through which CNB uses one or more of the Accused Products to teach and demonstrate features such as motion

detection. Upon information and belief, CNB routinely tests the Accused Products in the United States to verify that the products operate as they are designed and intended.

CNB's Knowledge of the '345 and '346 Patents

14. The commercial embodiments of the '345 and '346 Patents, namely the IRIS DVS, IRIS Total Vision, and EyzOn Camera products were consistently marked with the patent numbers for the '345 and '346 Patents since each of those products were first introduced. The IRIS DVS and IRIS Total Vision products have been publicly displayed at numerous industry trade shows and conventions held at various locations through the years. Further, the EyzOn Camera, together with the IRIS DVS and IRIS Total Vision products, were publicly displayed at the 2013 ISC West trade show and convention in Las Vegas in May of 2013. CNB was also an exhibitor at that same trade show. Upon information and belief, employees or representatives from CNB visited the booth where the IRIS and EyzOn products, and a copy of the '345 and '346 Patents were being displayed.

15. The '345 Patent has been cited as prior art with respect to at least 13 patent applications considered by the PTO. More significantly, the '346 Patent has been cited as prior art with respect to 68 patent applications.

17. Defendant CNB has infringed the '345 Patent by making, using, selling, or offering for sale in the United States, including in the Eastern District of Texas, systems, products and devices, and/or by undertaking processes and methods embodying the patented inventions without authority. By way of example, and without limitation, CNB manufactures and/or sells within the United States the Accused Products identified above. By manufacturing and selling these

18. The Accused Products have no substantial uses that did not infringe the '345 Patent.

COUNT TWO: PATENT INFRINGEMENT OF THE '346 PATENT

19. Trover realleges paragraphs 1 through 18 herein.

20. By testing and demonstrating the operations and functionalities of the Accused Products in the United States, including but not limited to the motion detection feature or functionality, CNB has directly infringed at least Claim 7 of the '346 Patent, either literally or through the doctrine of equivalents. In addition, by selling and offering to sell these products to customers in the United States, and instructing those customers to use these products such that those customers would directly infringe at least Claim 7 of the '346 Patent, CNB has actively, intentionally, and/or knowingly induced or contributed to the infringement of at least Claim 7 of the '346 Patent by others, either literally or through the doctrine of equivalents.

21. The Accused Products have no substantial uses that did not infringe the '346 Patent.

MISCELLANEOUS

22. Trover has satisfied all conditions precedent to filing this action, or any such conditions that have not been satisfied have been waived.
