COUNT I
(INFRINGEMENT OF U.S. PATENT NO. 6,510,466)

15. Upon information and belief, the following describes, at least in part, the Piriform CCleaner Cloud software:

16. Piriform has directly infringed, and continues to directly infringe one or more claims of the '466 Patent in this judicial district and elsewhere in Texas, including at least Claims 1, 2, 7, 15 and 22, literally and/or under the doctrine of equivalents, by or through making, using, importing, offering for sale and/or selling its CCleaner Cloud software during the pendency of the '466 Patent which software and associated backend server architecture *inter alia* allows for installing application programs on a Piriform server, receiving a login request, establishing a user desktop, receiving a selection of one or more programs displayed in the user desktop and providing a program for execution.

17. In addition, should Piriform's CCleaner Cloud products be found to not literally infringe the asserted claims of the '466 Patent, Piriform's accused products would nevertheless infringe the asserted claims of the '466 Patent. More specifically, the accused CCleaner Cloud software performs substantially the same function (making programs available for digital

Uniloc requests that the Court enter judgment against Piriform as follows:

- (E) granting Uniloc such other and further relief as the Court may deem just and proper.
