U.S. PATENT NO. 7,957,639

1
2
3
4
5
6
6. On June 7, 2011, United States Patent No. 7,957,639 (the “’639 patent”) was duly and legally issued by the United States Patent and Trademark Office for an invention entitled “Method and System for Determining Optimal Exposure of a Structured Light Based 3D Camera.” A true and correct copy of the ’639 patent is attached hereto as Exhibit A.

7
8
9
10
11
7. Sukhan Lee, Moon Wook Ryu, and Dae Sik Kim are the inventors of the ’639 patent. Professor Sukhan Lee is a director of the Intelligent Systems Research Institute at Sungkyunkwan University. He is a pioneer in the field of 3D scanning and has published numerous scholarly articles in the field. See http://isrc.skku.ac.kr/people/people_detail.php?idx=82

12
8. SKK University is the owner of the ’639 Patent with all rights in and to that patent.

13
14
15
9. Upon information and belief, to the extent any marking was required by 35 U.S.C. § 287, SKK University has complied with such requirements.

16
17
COUNT I
INFRINGEMENT OF U.S. PATENT NO. 7,957,639

18
19
20
10. Defendant directly or through intermediaries, makes, uses, imports, sells, and/or offers for sale products and/or systems (*i.e.*, the Go!Scan 20 and Go!Scan 50 Products (the “Accused Instrumentalities”)) that infringe claim 1 of the ’639 patent.

21
22
23
24
25
26
27
28
11. Upon information and belief, Defendant has been and is now infringing claim 1 of the ’639 Patent in the State of California, in this judicial District, and elsewhere in the United States, by, among other things, directly or through intermediaries, making, using, importing, providing, selling and/or offering for sale three dimensional scanners, *i.e.*, the Accused Instrumentalities, covered by one or more claims of the ’639 Patent to the injury of SKK University. Defendant is directly infringing, literally infringing, and/or infringing the ’639 Patent under the doctrine of equivalents. Defendant is thus liable for infringement of the ’639 Patent pursuant to 35 U.S.C. § 271(a).

1 12. The Accused Instrumentalities infringe claim 1 of the '639 Patent and performs a
2 method for determining an optimal exposure of a structured light based three dimensional (3D) camera
3 system including a projecting means for illuminating a predetermined pattern on a target object (*e.g.*, a
4 specific light pattern is projected onto the object to be scanned), an image capturing means for capturing
5 an image of the target object with the pattern projected (*e.g.*, a high resolution digital camera), and a
6 processing means for reconstructing 3D data based on the captured image (*i.e.*, a computer running
7 Creaform's 3d Software Platform). *See* Ex. B, Figs. 1-4
8

9 13. The Accused Instrumentality obtains an image of a target object with a predetermined
10 pattern projected thereon, which is illuminated from a projecting means, and an image of the target
11 object without a predetermined pattern projected thereon (*i.e.*, the Accused Instrumentality captures an
12 image with the projected pattern and an image without the projected pattern). *See* Ex. B., Fig. 3
13

14 14. The Accused Instrumentality automatically determines an optimal exposure level of the
15 structured light based 3D camera system using said two kinds of images (*e.g.*, the light levels are
16 adjusted based on the images returned). *See* Ex. B, Figs. 1-4.
17

18 15. As a result of Defendant's infringement of the '639 Patent, SKK University has suffered
19 monetary damages and are entitled to a money judgment in an amount adequate to compensate for
20 Defendant's infringement, but in no event less than a reasonable royalty for the use made of the
21 invention by Defendant, together with interest and costs as fixed by the court, and SKK University will
22 continue to suffer damages in the future unless Defendant's infringing activities are enjoined by this
23 Court.
24

25 16. Unless a permanent injunction is issued enjoining Defendant and its agents, servants,
26 employees, representatives, affiliates, and all others acting on in active concert therewith from
27 infringing the '639 Patent, SKK University will be greatly and irreparably harmed.
28

JURY DEMAND

SKK University hereby requests a trial by jury on all issues so triable by right.

PRAYER FOR RELIEF

SKK University requests that the Court find in their favor and against Defendant, and that the Court grant SKK University the following relief:

a. Judgment that one or more claims of the '639 patent have been infringed, either literally and/or under the doctrine of equivalents, by Defendant;

b. A permanent injunction enjoining Defendant and its officers, directors, agents, servants, affiliates, employees, divisions, branches, subsidiaries, parents, and all others acting in active concert therewith from infringement, inducing infringement of, or contributing to infringement of the '639 patent;

c. Judgment that Defendant account for and pay to SKK University all damages and costs incurred by SKK University, caused by Defendant's infringing activities and other conduct complained of herein;

d. That SKK University be granted pre-judgment and post-judgment interest on the damages caused by Defendant's infringing activities and other conduct complained of herein;

e. That this Court declare this an exceptional case and award SKK University reasonable attorneys' fees and costs in accordance with 35 U.S.C. § 285; and

f. That SKK University be granted such other and further relief as the Court may deem just and proper under the circumstances.

1 Dated: December 26, 2016.
