BACKGROUND

The '775 Patent

38. The '775 patent, entitled "Process for Manufacturing Glatiramer Acetate Product," was duly and legally issued to Teva Ltd. by the United States Patent and Trademark Office on October 13, 2015, and expires on January 28, 2035. The '775 Patent has 27 claims.

39. Rakefet Cohen, Sasson Habbah, and Muhammad Safadi are named inventors of the '775 patent.

40. Teva Ltd. is the sole owner, by assignment, of all rights, title and interest in the '775 patent.

41. Teva Ltd. has granted Teva USA an exclusive license under the '775 patent to use, offer to sell, sell and import the COPAXONE 40 mg/mL product in the United States.

42. A true and correct copy of the '775 patent is attached as Exhibit A.

Teva's COPAXONE[®] 40 mg/mL Product

43. Plaintiffs researched, developed, applied for and obtained FDA approval to manufacture, sell, promote and/or market COPAXONE[®] 40 mg/ml product.

44. Teva USA is the holder of New Drug Application (“NDA”) number 20-622, approved by the United States Food and Drug Administration (“FDA”) for the use of glatiramer acetate 40 mg/mL three times per week, marketed as COPAXONE® 40 mg/mL, for the treatment of patients with relapsing forms of multiple sclerosis such as relapsing-remitting multiple sclerosis.

45. Teva’s innovative COPAXONE® 40 mg/mL product is supplied as single-dose prefilled syringes that contain 40 mg/ml glatiramer acetate for injection, manufactured by Teva Ltd., and marketed and sold in the United States by Teva Neuroscience.

46. The active drug ingredient in COPAXONE® 40 mg/mL is glatiramer acetate. Glatiramer acetate is a complex mixture of polypeptide chains made from four amino acid building blocks. The individual polypeptide chains in glatiramer acetate vary in length and the sequence in which the amino acids are connected together.

47. The invention claimed in the ’775 patent reflects, in part, the discovery that filtering pharmaceutical preparations of glatiramer acetate at temperatures of above 0° C to 17.5° C improves the filtration process used to manufacture pharmaceutical preparations and facilitates the commercial production of COPAXONE® 40 mg/mL.

48. Teva practices at least one of the claims of the ’775 patent in manufacturing COPAXONE® 40 mg/mL. In manufacturing COPAXONE® 40 mg/mL, Teva, *inter alia*, filters an aqueous pharmaceutical solution of glatiramer acetate and mannitol at a temperature of above 0° C to 17.5° C to produce a filtrate with improved filterability compared to the filterability of the solution at room temperature.

The Amneal ANDA

49. Amneal filed an ANDA under 21 U.S.C. § 355(j) seeking FDA approval to manufacture, use, offer for sale, sell in and import into the United States glatiramer acetate injection, 40 mg/mL, purported to be generic to Teva's COPAXONE® 40 mg/mL product ("Amneal's Glatiramer Acetate Product" or "Defendants' Glatiramer Acetate Product").

50. FDA assigned the ANDA for Amneal's Glatiramer Acetate Product the number 207553.

51. Upon information and belief, both Amneal Pharmaceuticals LLC. and Amneal Pharmaceuticals GmbH. submitted, collaborated and/or acted in concert in the preparation or submission of ANDA No. 207553.

52. In order to be approved by the FDA, the drug product described in an ANDA must be equivalent to the innovator drug product in dosage form, strength, route of administration, quality, performance characteristics, and intended use.

53. In order to be approved by the FDA, the active ingredient in an ANDA product must be "the same as" the innovator's active ingredient. Thus, generic applicants must scientifically demonstrate that the active ingredient in their product is "the same as" the active ingredient in the innovator's product.

54. Given its complexity, COPAXONE® 40 mg/mL cannot be fully characterized. Moreover, the method of action of COPAXONE® 40 mg/mL has not been fully elucidated. Thus, while COPAXONE® 40 mg/mL has been demonstrated to be a safe and effective treatment for relapsing- remitting multiple sclerosis, the specific attributes of the product responsible for this safe and efficacious treatment have not been fully identified.

55. It is believed that the method of manufacturing COPAXONE® plays a role in the composition of, and therefore the action and effectiveness of Teva's COPAXONE® 40 mg/mL product.

56. Upon information and belief, Amneal has begun to manufacture and/or import commercial batches of Defendants' Glatiramer Acetate Product.

57. Upon information and belief, Defendants must produce their generic glatiramer acetate product using a process that infringes at least one of the claims of the '775 patent in order for the product to be determined by the FDA to be the same as Teva's COPAXONE® 40 mg/mL and to meet any other requirements for FDA approval of Defendants' Glatiramer Acetate Product.

58. Upon information and belief, the processes claimed in the '775 patent are the only commercially feasible means of producing commercial scale quantities of COPAXONE® 40 mg/mL.

59. Upon information and belief, Defendants intend to launch Defendants' Glatiramer Acetate Product upon receiving FDA approval which may occur as early as the first quarter of 2017, prior to the expiration of the '775 patent. Defendants have stated that they are working toward January 28, 2017 as their target for ANDA approval. *See In re Copaxone 40 mg Litigation*, C.A. No. 14-1171-GMS (D. Del.), Trial Tr. at 1729:3-5, 10-16, 20-23.

COUNT I FOR INFRINGEMENT OF
U.S. PATENT NO. 9,155,775 BY DEFENDANTS

60. The allegation of the preceding paragraphs 1-59 are realleged and incorporated herein by reference.

61. Upon information and belief, Amneal Pharmaceuticals LLC. currently infringes and has infringed one or more claims of the '775 patent under at least sections (a)-(c) and/or (g)

of 35 U.S.C. § 271 by the manufacture, marketing, sale, offer to sell and/or importation of the Amneal Glatiramer Acetate Product.

62. Upon information and belief, Amneal Pharmaceuticals GmbH currently infringes and has infringed one or more claims of the '775 patent under at least sections (a)-(c) and/or (g) of 35 U.S.C. § 271 by the manufacture, marketing, sale, offer to sell and/or importation of the Amneal Glatiramer Acetate Product.

63. Upon information and belief, Defendants have acted in concert by assisting with, participating in, encouraging, contributing, aiding and abetting and/or directing the manufacture, marketing, sale, offer to sell and/or importation of the Amneal Glatiramer Acetate Product.

64. Upon information and belief, Defendants' infringement is willful and continues despite knowledge of the '775 patent. Upon information and belief, Defendants acted without a reasonable basis for believing that they would not be liable for infringing the '775 patent.

65. Teva will be substantially and irreparably harmed by Defendants' infringing activities unless the Court enjoins those activities. Teva will have no adequate remedy at law if Defendants are not enjoined from the commercial manufacture, use, offer to sell, sale in and importation into the United States of the Amneal Glatiramer Acetate Product. Defendants' activities render this case an exceptional one, and Teva is entitled to an award of their reasonable attorneys' fees under 35 U.S.C. § 285.

**COUNT II FOR DECLARATORY JUDGMENT OF
INFRINGEMENT OF U.S. PATENT NO. 9,155,775 BY DEFENDANTS**

66. The allegations of the preceding paragraphs 1-65 are realleged and incorporated herein by reference.

67. Upon information and belief, Defendants intend to manufacture, market, sell, offer to sell and/or import Defendants' Glatiramer Acetate product upon receiving FDA approval, as early as the first quarter of 2017.

68. Such conduct will constitute direct infringement of the '775 patent under 35 U.S.C. § 271(a), inducement of infringement of the '775 patent under 35 U.S.C. § 271(b), contributory infringement under 35 U.S.C. § 271(c), and/or infringement of the '775 patent under 35 U.S.C. § 271(g).

69. As a result of the foregoing facts, there is an imminent, real, substantial, and continuing justiciable controversy between Teva and Defendants as to liability for the infringement of the '775 patent. Defendants' actions have created in Teva a reasonable apprehension of irreparable harm and loss resulting from Defendants' threatened imminent actions.

70. Upon information and belief, Defendants will knowingly and willfully infringe the '775 patent.

71. Teva will be substantially and irreparably harmed by Defendants' infringing activities unless the Court enjoins those activities. Teva will have no adequate remedy at law if Defendants are not enjoined from the commercial manufacture, use, offer to sell, sale in and importation into the United States of the Amneal Glatiramer Acetate Product. Defendants' activities render this case an exceptional one, and Teva is entitled to an award of their reasonable attorneys' fees under 35 U.S.C. § 285.

PRAYER FOR RELIEF

WHEREFORE, Teva respectfully requests the following relief:

- (a) a judgment that the '775 patent is infringed, not invalid, and enforceable;

(b) a judgment that the making, using, offering to sell, selling, marketing, distributing, or importing of Defendants' Glatiramer Acetate Product prior to the expiration of the '775 patent will infringe, actively induce infringement, and/or contribute to the infringement of one or more claims of the '775 patent;

(c) an Order pursuant to 35 U.S.C. § 283 preliminarily and permanently enjoining Defendants and all persons acting in concert with Defendants from commercially manufacturing, using, offering for sale, selling, marketing, distributing, or importing Defendants' Glatiramer Acetate Product, or any product or compound the use or manufacture of which infringes the '775 patent, or inducing or contributing to the infringement of the '775 patent until after the expiration of the '775 patent;

(d) an award of Teva's damages or other monetary relief to compensate Teva if Defendants engage in the commercial manufacture, use, offer to sell, sale, or marketing or distribution in, or importation into the United States of Defendants' Glatiramer Acetate Product, or any product or compound the use or manufacture of which infringes the '775 patent, or the inducement or contribution of the foregoing, prior to the expiration of the '775 patent in accordance with 35 U.S.C. § 284;

(e) a judgment that this is an exceptional case and an award to Teva of its attorneys' fees under 35 U.S.C. § 285;

(f) a judgment that Amneal's infringement of the '775 patent is willful;

(g) an award of Teva's reasonable costs and expenses in this action; and

(h) an award of any further and additional relief to Teva as this Court deems just and proper.
