

1
2 company, organized under the laws of the State of Texas.

3 3. Defendant, ARTHREX, INC., is a foreign corporation with its
4 headquarters located in Naples, Florida. Defendant uses, sells, and/or offers to sell
5 products and services in interstate commerce that infringe the '159 Patent.

6 **SUBJECT MATTER JURISDICTION**

7 4. This court has original jurisdiction over the subject matter of this action,
8 pursuant to 28 U.S.C. §§ 1331 and 1338(a), because this action involves a federal
9 question relating to patents.

10 **PERSONAL JURISDICTION**

11 5. The court has general *in personam* jurisdiction over Defendant because
12 Defendant is a citizen of the State of Florida and is found in this state.

13 **VENUE**

14 6. Venue is proper in this court, pursuant to 28 U.S.C. § 1400(b), because
15 Defendant has committed acts of infringement in this district and has a regular and
16 established place of business in this district.

17 **COUNT I**
18 **PATENT INFRINGEMENT**

19 7. Plaintiff repeats and re-alleges paragraphs 2 through 6 by reference, as if
20 fully set forth herein.

21 8. On September 24, 2013, the United States Patent & Trademark Office
22 (USPTO) duly and legally issued the '159 Patent, entitled "Method for Providing Mobile
23 Service Using Code Pattern." A true and authentic copy of the '159 Patent is attached
24 hereto as **Exhibit "A"** and incorporated herein by reference.
25

1
2 9. The '159 Patent teaches a method and apparatus for providing a mobile
3 service with the use of code pattern.

4 10. The '159 Patent is directed to computerized decoding technologies to
5 provide users with access to and use of various content more conveniently. Traditionally,
6 companies simply provided their URL information to the consuming public, but this is
7 effective only if a consumer memorized the name and spelling of the URL. Thus, there
8 was a need in the art to provide an effective product or method to assist consumers with
9 recalling website or URL information.

10 11. The '159 Patent claims, among other things, a method of providing
11 content with the use of code pattern by a user terminal; a user terminal for providing
12 content with the use of code pattern; a non-transitory machine-readable storage medium
13 having encoded thereon program code; and, a method of providing content with the use
14 of an image captured by a user terminal.

15 12. Collectively, the claimed embodiments in the '159 Patent provide new
16 solutions to problems related to transmitting information from a mobile service provider
17 to a mobile device.

18 13. The '159 Patent solves a problem with the art that is rooted in computer
19 technology that uses mobile service providers. The '159 Patent does not merely recite
20 the performance of some business practice known from the pre-Internet world along with
21 the requirement to perform it on the Internet.

22 14. Plaintiff is the assignee of the entire right, title, and interest in the '159
23 Patent at the USPTO, including the right to assert causes of action arising under the '159
24
25

1
2 Patent.

3 15. Upon information and belief, Defendant has and continues to directly
4 infringe, contributorily infringe, or actively induce the infringement of the '159 Patent by
5 making, using (including by at least internally testing the Accused Products as defined
6 herein), selling, offering for sale, importing in the United States, including this judicial
7 district, a user terminal designed to capture certain code pattern information and convert
8 same into embedded content, which embodies or uses the invention claimed in the '159
9 Patent (the "Accused Products"), all in violation of 35 U.S.C. § 271.

10 16. The Accused Products infringe at least claims 1, 2, 3, 8, 9, 10, 15, and 16
11 of the '159 Patent.

12 *Claim 1*

13 17. Through claim 1, the '159 Patent claims a method of providing content
14 with the use of a code pattern by a user terminal, the method comprising: obtaining a
15 photographic image of a code pattern by a camera of the user terminal; processing, by a
16 processor of the user terminal, the photographic image of the code pattern to extract the
17 code pattern from the photographic image; decoding the extracted code pattern by the
18 processor of the user terminal into code information; transmitting a content information
19 request message to a server based on the code information; and receiving content
20 information from the server in response to the content information request message.
21

22 18. Defendant infringes claim 1.

23 19. Defendant, at least in internal use and testing, practices a method of
24 providing content (*e.g.*, a web page associated with the defendant) with the use of a code
25

1
2 pattern (e.g., a QR code) by a user terminal (e.g., a smartphone), as demonstrated in the
3 following images:

1
2 server (*e.g.*, Defendant's server) based on the extracted URL.

3 ***Claim 8***

4 31. Through claim 8, the '159 Patent claims a user terminal for providing
5 content with the use of a code pattern, the user terminal comprising: a camera configured
6 to obtain a photographic image of a code pattern; a processor comprising: an image
7 processor configured to process the photographic image of the code pattern to extract the
8 code pattern from the photographic image; and a decoder configured to decode the
9 extracted code pattern into code information; and a transceiver configured to (i) transmit
10 a content information request message to a server based on the code information; and (ii)
11 receive content information from the server in response to the content information request
12 message.

13
14 32. Defendant infringes claim 8.

15 33. Defendant, at least in internal use and testing, uses a user terminal (*e.g.*,
16 smartphone) for providing content (*e.g.*, a web page associated with Defendant) with the
17 use of a code pattern (*e.g.*, QR code).

18 34. Defendant uses a user terminal comprising a camera configured to obtain a
19 photographic image of a code pattern (*e.g.*, QR code).

20 35. Defendant uses a user terminal comprising a processor which in turn
21 comprises an image processor configured to process the photographic image of the code
22 pattern (*e.g.*, QR code) to extract the code pattern (*e.g.*, QR code) from the photographic
23 image. Once the photographic image of the QR code is captured by the camera of the
24 smartphone, the photographic image is processed to retrieve the QR code. The retrieved
25

QR code can be viewed on the user interface screen of the smartphone.

36. Defendant uses a user terminal (e.g., smartphone) comprising a decoder that is configured to decode the extracted code pattern (e.g., QR code) into code information (e.g., URL of web page associated with Defendant).

37. Defendant uses a user terminal comprising a transceiver (e.g., FDD-LTE/TDD-LTE/CDMA/EDGE transceiver) which is configured to transmit or receive a content information request message (e.g., http request message for accessing the webpage associated with Defendant) to a server (e.g., Defendant's server) based on the code information (e.g., URL of the webpage associated with Defendant). As shown below, once the URL is decoded from the extracted QR code, a request or response for accessing a webpage associated with Defendant is sent to Defendant's server by means of transceiver of the smartphone:

iPhone 7

Claim 9

38. Through claim 9, the '159 Patent claims the user terminal of claim 8, wherein the content information comprises at least one of the following: image, sound, moving picture, and text data.

39. Defendant infringes claim 9.

40. Defendant uses a user terminal to receive content information that comprises image and text data.

Claim 10

41. Through claim 10, the '159 Patent claims the user terminal of claim 8, wherein: the processor is further configured to extract a uniform resource locator (URL) of the server from the code information; and the transceiver is further configured to

1
2 transmit the content information request message to the server based on the extracted
3 URL.

4 42. Defendant infringes claim 10.

5 43. Defendant uses a user terminal (*e.g.*, smartphone) that is configured to
6 extract a uniform resource locator (URL) of the server (*e.g.*, Defendant's server) from the
7 code information (*e.g.*, URL of web page associated with Defendant).

8 44. Defendant uses a user terminal (*e.g.*, smartphone) comprising a transceiver
9 configured to transmit the content information request message (*e.g.*, http request
10 message for accessing the webpage associate with Defendant) to the server (*e.g.*,
11 Defendant's server) based on the extracted URL.

12 *Claim 15*

13 45. Through claim 15, the '159 Patent claims a non-transitory machine-
14 readable storage medium, having encoded thereon program code, wherein, when the
15 program code is executed by a machine, the machine implements a method for providing
16 content with the use of a code pattern by a user terminal, comprising the steps of:
17 obtaining a photographic image of a code pattern by a camera of the user terminal;
18 processing, by a processor of the user terminal, the photographic image of the code
19 pattern to extract the code pattern from the photographic image; decoding the extracted
20 code pattern by the processor of the user terminal into code information; transmitting a
21 content information request message to a server based on the code information; and
22 receiving content information from the server in response to the content information
23 request message.
24
25

1
2 46. Defendant infringes claim 15.

3 47. Defendant, at least in internal use and testing, practices a method of
4 providing content (*e.g.*, a webpage associated with Defendant) with the use of a code
5 pattern (*e.g.*, a QR code) by a user terminal (*e.g.*, a smartphone).

6 48. Defendant, at least in internal use and testing, obtains a photographic
7 image of a code pattern (*e.g.*, QR code) by a camera of the user terminal (*e.g.*,
8 smartphone).

9 49. Defendant, at least in internal use and testing, uses a processor of the user
10 terminal (*e.g.*, smartphone) to processes the photographic image of the code pattern (*e.g.*,
11 QR code) to extract the code pattern from the photographic image.

12 50. Defendant, at least in internal use and testing, decodes the extracted code
13 pattern by the processor of the user terminal into code information (*e.g.*, URL of web
14 page associated with Defendant).

15 51. Defendant, at least in internal use and testing, transmits and receives a
16 content information request message (*e.g.*, http request message for accessing the
17 webpage associated with Defendant) to and from a server (*e.g.*, Defendant's server) based
18 on the code information (*e.g.*, URL of the webpage associated with Defendant).

19
20 ***Claim 16***

21 52. Through claim 16, the '159 Patent claims a method of providing content
22 with the use of an image captured by a user terminal, the method comprising: obtaining a
23 photographic image by a camera of the user terminal; processing, by a processor of the
24 user terminal, the photographic image to extract characteristic information from the
25

1
2 photographic image; transmitting a content information request message with the
3 extracted characteristic information to a server; and receiving content information from
4 the server in response to the content information request message.

5 53. Defendant infringes claim 16.

6 54. Defendant, at least in internal use and testing, practices a method of
7 providing content (*e.g.*, a webpage associated with Defendant) with the use of a code
8 pattern (*e.g.*, a QR code) by a user terminal (*e.g.*, a smartphone).

9 55. Defendant, at least in internal use and testing, obtains a photographic
10 image of a code pattern (*e.g.*, QR code) by a camera of the user terminal (*e.g.*,
11 smartphone).

12 56. Defendant, at least in internal use and testing, processes by a processor of
13 the user terminal (*e.g.*, smartphone), the photographic image of the code pattern (*e.g.*, QR
14 code) to extract characteristic information from the photographic image.

15 57. Defendant, at least in internal use and testing, transmits and receives a
16 content information request message (*e.g.*, http request message for accessing the
17 webpage associated with Defendant) to or from a server (*e.g.*, Defendant's server) based
18 on the extracted characteristic information (*e.g.*, URL of the webpage associated with
19 Defendant).

20 58. Upon information and belief, Defendant has known of the existence of the
21 '159 Patent, and its acts of infringement have been willful and in disregard for the '159
22 Patent, without any reasonable basis for believing that it had a right to engage in the
23 infringing conduct.
24
25

1
2 59. Defendant's acts of infringement of the '159 Patent have caused and will
3 continue to cause Plaintiff damages for which Plaintiff is entitled to compensation
4 pursuant to 35 U.S.C. § 284.

5 60. Defendant's acts of infringement of the '159 Patent have caused and will
6 continue to cause Plaintiff immediate and irreparable harm unless such infringing
7 activities are also enjoined by this court pursuant to 35 U.S.C. § 283. Plaintiff has no
8 adequate remedy at law.

9 61. Upon information and belief, the '159 Patent, at all times material, was
10 and is in compliance with 35 U.S.C. § 287.

11 62. Plaintiff retained the law firm of WATSON LLP to represent its interests
12 in this action, and is obligated to pay such firm reasonable attorneys' fees for its services.
13 Plaintiff may recover its attorneys' fees and costs from Defendant, pursuant to 35 U.S.C.
14 § 285, because this case is exceptional.
15

16 **WHEREFORE**, Plaintiff, CODING TECHNOLOGIES, LLC, demands
17 judgment against Defendant, ARTHREX, INC., and respectfully seeks the entry of an
18 order (i) adjudging that Defendant has infringed the '159 Patent, in violation of 35 U.S.C.
19 § 271; (ii) granting an injunction enjoining Defendant, its employees, agents, officers,
20 directors, attorneys, successors, affiliates, subsidiaries and assigns, and all of those in
21 active concert and participation with any of the foregoing persons or entities from
22 infringing, contributing to the infringement of, or inducing infringement of the '159
23 Patent; (iii) ordering Defendant to account and pay damages adequate to compensate
24 Plaintiff for Defendant's infringement of the '159 Patent, with pre-judgment and post-
25

1
2 judgment interest and costs, pursuant to 35 U.S.C. § 284; (iv) ordering that the damages
3 award be increased up to three times the actual amount assessed, pursuant to 35 U.S.C. §
4 284; (v) declaring this case exceptional and awarding Plaintiff its reasonable attorneys'
5 fees, pursuant to 35 U.S.C. § 285; and, (vi) awarding such other and further relief as this
6 court deems just and proper.
