Defendant.	)	
_____	)	

**COMPLAINT**

For its Complaint, Plaintiff Hublink, LLC ("Hublink"), by and through the undersigned counsel, alleges as follows:

**THE PARTIES**

1. Hublink is a Texas limited liability company with a place of business located at 1400 Preston Road, Suite 400, Plano, Texas 75093.
2. Defendant AT&T Mobility LLC is a Delaware company with, upon information and belief, a place of business located at 1125 East Campbell Road, Richardson, Texas 75081.
3. Upon information and belief, Defendant has registered with the Texas Secretary of State to conduct business in Texas.
4. By registering to conduct business in Texas and by having places of business where it regularly conducts business in this District, Defendant has a permanent and continuous presence in Texas.
5. Thus, Defendant has a regular and established place of business in the Eastern District of Texas.

**JURISDICTION AND VENUE**

5. This action arises under the Patent Act, 35 U.S.C. § 1 *et seq.*

6. Subject matter jurisdiction is proper in this Court under 28 U.S.C. §§ 1331 and 1338.

7. Upon information and belief, Defendant conducts substantial business in this forum, directly or through intermediaries, including: (i) at least a portion of the infringements alleged herein; and (ii) regularly doing or soliciting business, engaging in other persistent courses of conduct and/or deriving substantial revenue from goods and services provided to individuals in this district.

8. Venue is proper in this district pursuant to 28 U.S.C. § 1400(b).

**THE PATENT-IN-SUIT**

9. On June 29, 2004, U.S. Patent No. 7,239,338 (the "'338 patent"), entitled "Videophone System and Method," was duly and lawfully issued by the U.S. Patent and Trademark Office. A true and correct copy of the '338 patent is attached hereto as Exhibit A.

10. The '338 patent solves problems of providing real time video conferencing.

11. The claims of the '338 patent effect an improvement in video conferencing to solve the problems of relatively high cost, complexity both in design and use, the inability to concurrently provide quality image and sound, and the inability to provide a network infrastructure capable of two-way communications with minimal signal degradation.

12. Hublink is the assignee and owner of the right, title and interest in and to the '338 patent, including the right to assert all causes of action arising under said patent and the right to any remedies for infringement of it.

**COUNT I – INFRINGEMENT OF U.S. PATENT NO. 7,239,338**

13. Hublink repeats and realleges the allegations of paragraphs 1 through 13 as if fully set forth herein.

14. Without license or authorization and in violation of 35 U.S.C. § 271(a), Defendant is liable for infringement of at least claim 12 of the '338 patent by making, using, importing, offering for sale, and/or selling a videophone communication system in the form of the AT&T Video Call software platform for placing video calls between computers and mobile devices.

15. More specifically and upon information and belief, Defendant uses a videophone communication system in the form of the AT&T Video Call software platform for placing video calls between mobile devices. *See* <https://www.att.com/shop/wireless/features/video-calling.html> ("Video Calling") (last accessed Jan. 23, 2018). Defendant's system requires computers and mobile devices to connect over a communications media (e.g., 4G) with sufficient bandwidth for and configured for real-time video and audio communication. *See* <https://www.att.com/esupport/article.html#!/wireless/KM1062034> ("KM106203") (last accessed Jan. 23, 2018); Video Calling. Defendant's system requires the communications media to be connected to a common communications network (e.g., WAN) with sufficient bandwidth for and configured for real-time video and audio communication. *See* KM1062034; Video Calling. Defendant's system uniquely identifies each mobile device and their addresses on the communication network using a phone number or other identifying information (e.g., IP address or MAC address). *See* Video Calling. Defendant stores at an operations center the information related to mobile devices (e.g., phone number, IP address, or MAC address) in order to facilitate video calls between them. *See* Video Calling. A first mobile device with the AT&T Video Call software accesses stored information (e.g., phone number, IP address, or MAC address) about a

second mobile device from a Defendant server, which allows the first mobile device to transmit and receive video and audio to and from the second mobile device. *See* KM1062034. Defendant's system connects one user to another through the communications network and communications media and establishes a transmission of audio and video from the mobile device of one user to the mobile device of another user. *See id.*

16. Hublink is entitled to recover from Defendant the damages sustained by Hublink as a result of Defendant's infringement of the '338 patent in an amount subject to proof at trial, which, by law, cannot be less than a reasonable royalty, together with interest and costs as fixed by this Court under 35 U.S.C. § 284

**JURY DEMAND**

Hublink hereby demands a trial by jury on all issues so triable.

**PRAYER FOR RELIEF**

WHEREFORE, Hublink requests that this Court enter judgment against Defendant as follows:

- A. An adjudication that Defendant has infringed the '338 patent;
- B. An award of damages to be paid by Defendant adequate to Hublink for Defendant's past infringement of the '338 patent and any continuing or future infringement through the date such judgment is entered, including interest, costs, expenses and an accounting of all infringing acts including, but not limited to, those acts not presented at trial;
- C. A declaration that this case is exceptional under 35 U.S.C. § 285, and an award of Hublink's reasonable attorneys' fees;
- D. An award to Hublink of such further relief at law or in equity as the Court deems just and proper.

Dated: January 25, 2018
