**IN THE UNITED STATES DISTRICT COURT  
FOR THE DISTRICT OF UTAH**

ROTHSCHILD BROADCAST §  
DISTRIBUTION SYSTEMS, LLC §  
§  
Plaintiff, §  
§  
vs. §  
§  
LINK INTERACTIVE, INC. §  
§  
Defendant. §  
\_\_\_\_\_ §

Case No: 1:18-cv-00014-PMW  
PATENT CASE

**COMPLAINT**

Plaintiff Rothschild Broadcast Distribution Systems, LLC (“Plaintiff” or “RBDS”) files this Complaint against Link Interactive, Inc. (“Defendant” or “Link”) for infringement of United States Patent No. 8,856,221 (hereinafter “the ‘221 Patent”).

**PARTIES AND JURISDICTION**

1. This is an action for patent infringement under Title 35 of the United States Code. Plaintiff is seeking injunctive relief as well as damages.
2. Jurisdiction is proper in this Court pursuant to 28 U.S.C. §§ 1331 (Federal Question) and 1338(a) (Patents) because this is a civil action for patent infringement arising under the United States patent statutes.
3. Plaintiff is a Texas limited liability company with an office at 1400 Preston Road, Suite 400, Plano, Texas 75093.

4. On information and belief, Defendant is a Utah corporation, with its principal place of business at 3293 Harrison Blvd, Ste. 250, Ogden, Utah 84403. On information and belief, Defendant may be served through its registered agent, Corporation Service Company, at 15 West South Temple, Ste. 1701, Salt Lake City, UT 84101.

5. On information and belief, this Court has personal jurisdiction over Defendant because Defendant has committed, and continues to commit, acts of infringement in this District, has conducted business in this District, and/or has engaged in continuous and systematic activities in this District.

6. On information and belief, Defendant's instrumentalities that are alleged herein to infringe were and continue to be used, imported, offered for sale, and/or sold in this District.

#### **VENUE**

7. Venue is proper in the District of Utah pursuant to 28 U.S.C. § 1400(b) because Defendant is deemed to reside in this District and/or because acts of infringement are occurring in this District and Defendant has a regular and established place of business in this District. For example, Defendant has a place of business at 3293 Harrison Blvd, Ste. 250, Ogden, Utah 84403.

#### **COUNT I** **(INFRINGEMENT OF UNITED STATES PATENT NO 8,856,221)**

8. Plaintiff incorporates paragraphs 1-7 herein by reference.

9. This cause of action arises under the patent laws of the United States and, in particular, under 35 U.S.C. §§ 271, et seq.

10. Plaintiff is the owner by assignment of the '221 Patent with sole rights to enforce the '221 Patent and sue infringers.

11. A copy of the '221 Patent, titled "System and Method for Storing Broadcast

Content in a Cloud-based Computing Environment,” is attached hereto as Exhibit A.

12. The ‘221 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

13. Upon information and belief, Defendant has infringed and continues to infringe one or more claims, including at least Claim 1, of the ‘221 Patent by making, using, importing, selling, and/or offering for media content storage and delivery systems and services covered by one or more claims of the ‘221 Patent.

14. Defendant sells, offers to sell, and/or uses media content storage and delivery systems and services, including, without limitation, the Link Interactive Smart Home system, and any similar products (“Product”), which infringes at least Claim 1 of the ‘221 Patent.

15. The Product necessarily includes at least one server for hosting and storing media content for customers. For example, the Product necessarily includes at least one server to store recorded security videos.

16. The at least one server necessarily includes a first receiver configured to receive a request message including data indicating requested media content (e.g., the server must have infrastructure to receive a request to store recorded security videos or to stream recorded video on a smartphone; additionally, the request message must contain data that identifies the video to be stored or streamed) and a consumer device identifier corresponding to a consumer device (e.g., the user credentials are used to tie a smartphone and user account to particular cameras and the videos they produce).

17. The Product necessarily includes a processor to determine whether the consumer device identifier corresponds to the registered consumer device (e.g., the server must authenticate a user’s credentials to ensure that the credentials match those registered with a

security camera which the user would like to access).

18. The Product provides for both media downloads and/or storage, and media streaming. A processor within the Product necessarily determines whether the request received from a customer is a request for storage (e.g., recording or storing content) or content (e.g., streaming of media content).

19. The server verifies that media content identified in the media data of the storage request message (e.g., request to record content) is available for storage in order to prevent data errors that would result from attempting to store content that is not available for storage. The server must verify that the media content (e.g. specific recording from a specific camera) identified in the media data of the storage request message is available for storage in order to prevent data errors that would result from attempting to store content that is not available for storage (e.g. the server must verify that a particular security camera is adequately connected to the internet as to allow for video recording and storage on the cloud; additionally, a user's ability to store video is limited to a certain amount of memory usage based upon their subscription, thus media content may not be available for storage if a user is already above their memory limit).

20. If a customer requests content (e.g., live streaming of media content), then a processor within the Product necessarily initiates delivery of the content to the customer's device. The server will initiate delivery of the requested media content to the consumer device (e.g. stream live camera feed to a smartphone or tablet) if the request message is a content request message (e.g. request for live streaming).

21. The media data includes time data that indicates a length of time to store the requested media content (e.g., a user is allowed to store videos for 30 days).

22. The server must first determine whether the requested media content exists prior to initiating delivery in order to prevent data errors that would result from attempting to transmit media content that does not exist (e.g. the server must verify that a particular security camera is adequately connected to the internet as to allow for video recording and streaming).

23. After the processor determines whether the requested media content is available, it determines whether there are restrictions associated with the requested media content (e.g., subscription level, component protocols, etc.).

24. The various elements of Claim 1 are further illustrated in the various publicly available screen shots provided below:

#### See what you care about, instantly

See what's happening at your property in real time, get instant alerts with smart clip capture and never miss a moment with continuous recording. Now it's easy to check up on the kids, your pets and valuables, and see what's actually happening in the event of an alarm.

Alarm.com's Video Monitoring service offers a best-in-class end-to-end video solution. It includes anytime live streaming, smart clip capture with secure cloud storage, instant video alerts and continuous high definition recording.

#### Live Streaming Video

Watch live feeds from your property right on your phone, tablet or computer. See what's happening anywhere on your property, at any time.

Use your Smartphone to view live streaming video while away from your property.  
HD quality and great lowlight performance make for crystal clear video.  
Simultaneously view multiple locations on the same screen, such as your vacation home and primary residence.

Remotely move the Pan/Tilt camera via the web, Smartphone or tablet to see different views of a location.  
HD quality and great lowlight performance make for crystal clear video.  
Integrate existing video cameras with your Alarm.com security system.

### Link Interactive Monthly Monitoring Plans

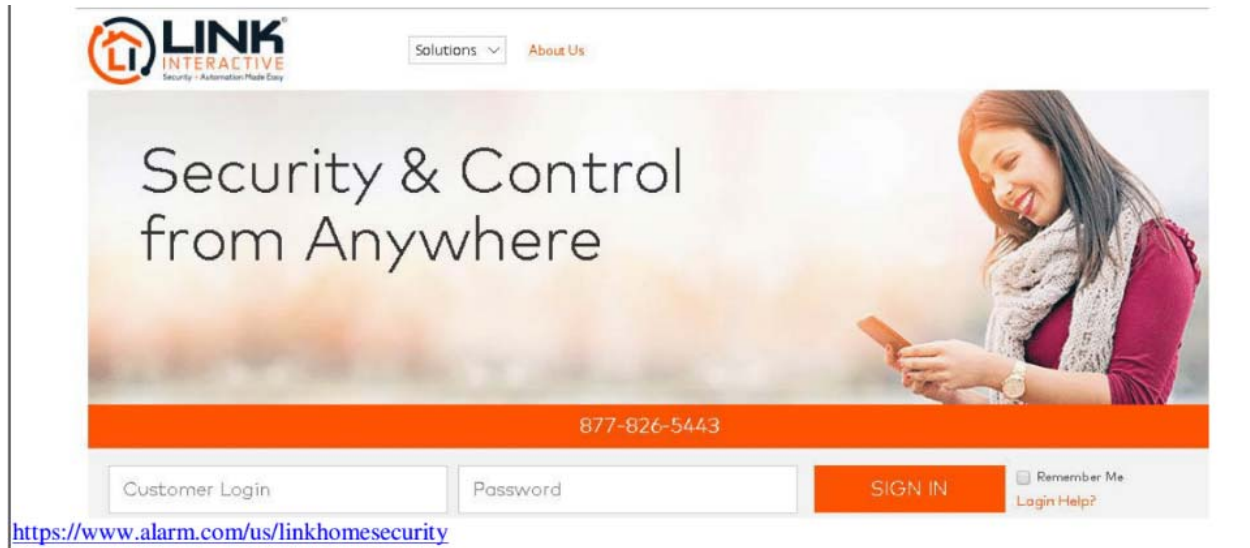

You'll have to pick a monthly monitoring plan as part of your contract. The basic plan for professional monitoring is called Standard, and it's priced at \$29.99 per month. Then there's the Gold plan, starting at \$34.99. The Elite plan adds video monitoring for another \$5 per month, bringing the monthly total to \$39.99.

Package Name	Standard	Gold	Elite
View Plans	<a href="#">Visit Website</a>	<a href="#">Visit Website</a>	<a href="#">Visit Website</a>
Monthly Price	\$29.99	\$34.99	\$39.99
24/7 Monitoring	✓	✓	✓
Environmental Sensors	✓	✓	✓
Two-way Voice	✗	✓	✓
Email and Text Alerts	✗	✓	✓
Home Automation	✗	✓	✓
Geo-fencing	✗	✓	✓
<b>Video Monitoring</b>	✗	✗	✓

So, what does that additional \$5 per month for video monitoring get you? In partnership with Alarm.com, the **Elite plan lets you use your smartphone to give you an interactive experience with your video surveillance system.** This allows you to schedule, live stream, record, and control your video footage for any cameras included or added to your system straight from your smart phone or tablet at any time. **Elite will provide alerts that occur based on custom triggers** you set, such as motion detection or a door being opened. You can even access recorded clips on included Cloud storage, which has room for 1,000 video clips per month — and more storage is available at an additional \$5 per month. We think all that video monitoring for \$5 more is a pretty substantial value offered from Link Interactive when you consider how much less expensive the camera hardware is compared to leading security competitors as well.

25 Defendant's actions complained of herein will continue unless Defendant is enjoined by this court.

26. Defendant's actions complained of herein is causing irreparable harm and monetary damage to Plaintiff and will continue to do so unless and until Defendant is enjoined and restrained by this Court.

27. Plaintiff is in compliance with 35 U.S.C. § 287.

### **PRAYER FOR RELIEF**

WHEREFORE, Plaintiff asks the Court to:

(a) Enter judgment for Plaintiff on this Complaint on all causes of action asserted herein;

(b) Enter an Order enjoining Defendant, its agents, officers, servants, employees, attorneys, and all persons in active concert or participation with Defendant who receives notice of the order from further infringement of United States Patent No. 8,856,221 (or, in the alternative, awarding Plaintiff a running royalty from the time of judgment going forward);

(c) Award Plaintiff damages resulting from Defendant's infringement in accordance with 35 U.S.C. § 284;

- (d) Award Plaintiff pre-judgment and post-judgment interest and costs; and
- (e) Award Plaintiff such further relief to which the Court finds Plaintiff entitled under law or equity.
