COUNT I **(INFRINGEMENT OF UNITED STATES PATENT NO. 8,540,159)**

8. Plaintiff incorporates paragraphs 1 through 7 herein by reference.

9. This cause of action arises under the patent laws of the United States and, in particular, under 35 U.S.C. §§ 271, *et seq.*

10. Plaintiff is the owner by assignment of the '159 Patent with sole rights to enforce the '159 Patent and sue infringers.

11. A copy of the '159 Patent, titled "Method for Providing Mobile Service Using Code-pattern," is attached hereto as Exhibit A.

12. The '159 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

13. Upon information and belief, at least through internal testing, Defendant has infringed and continues to infringe one or more claims, including at least Claim 1 of the '159 Patent by using and/or incorporating code patterns in connection with promotional media distributed by and/or controlled by Defendant in a manner covered by one or more claims of the '159 Patent. Defendant has infringed and continues to infringe the '159 Patent in violation of 35 U.S.C. § 271.

14. Regarding Claim 1, at least through internal use and testing, Defendant provides content (e.g., a website with promotional information) with the use of a code pattern (e.g., a QR code) in connection with promotional media containing the code pattern. The content is provided by a user terminal (e.g., a smartphone or other device capable of scanning the code pattern). Certain aspects of this element are illustrated in the screenshots below.

16. A processor of the user terminal processes the photographic image of the code pattern to extract the code pattern (e.g., image of QR code) from the photographic image. The

extracted code pattern can be viewed by the user. Certain aspects of this element are illustrated in the screenshots below and/or screenshots referenced in other paragraphs herein.

17. The extracted code pattern is decoded by the processor of the user terminal (e.g., smartphone processor) into code information (e.g., the URL of the web page associated with Defendant). For example, after clicking on the hyperlink that is obtained by scanning the QR code associated with the product, the smartphone receives the information about the product from

Defendant's server. Certain aspects of this element are illustrated in the screenshots below and/or those referenced in other paragraphs herein.
