PLAINTIFF’S ORIGINAL COMPLAINT FOR PATENT INFRINGEMENT

Savannah Licensing, LLC (“Savannah”) files this Original Complaint and demand for jury trial seeking relief from patent infringement of the claims of U.S. Patent Nos. 8,680,992 (“the ‘992 patent”) and 9,454,777 (“the ‘777 patent”) (referred to as the “Patents-in-Suit”) by Snapchat, Inc. (“Snapchat”).

I. THE PARTIES

1. Plaintiff Savannah is a Texas Limited Liability Company with its principal place of business located at 9901 Brodie Lane, Suite 160 PMB925, Austin, TX 78748.

2. On information and belief, Snapchat is a corporation organized and existing under the laws of the state of Delaware, with a principal place of business located at 2772 Donald Douglas Loop N, Santa Monica, CA 90405. On information and belief, Snapchat sells and offers to sell products and services throughout Delaware, including in this judicial district, and introduces products and services that perform infringing methods or processes into the stream of commerce knowing that they would be sold in Delaware and this judicial district. Snapchat can be served with process at its registered agent, CORPORATION SERVICE COMPANY, 251 LITTLE FALLS DRIVE, Wilmington, DE 19808, or anywhere else it may be found.

II. JURISDICTION AND VENUE

3. This Court has original subject-matter jurisdiction over the entire action pursuant to 28 U.S.C. §§ 1331 and 1338(a) because Plaintiff's claim arises under an Act of Congress relating to patents, namely, 35 U.S.C. § 271.

4. This Court has personal jurisdiction over Defendant because: (i) Defendant is present within or has minimum contacts within the State of Delaware and this judicial district; (ii) Defendant has purposefully availed itself of the privileges of conducting business in the State of Delaware and in this judicial district; and (iii) Plaintiff's cause of action arises directly from Defendant's business contacts and other activities in the State of Delaware and in this judicial district.

5. Venue is proper in this district under 28 U.S.C. §§ 1391(b) and 1400(b). Defendant has committed acts of infringement and is incorporated in Delaware. Further, venue is proper because Defendant conducts substantial business in this forum, directly or through intermediaries, including: (i) at least a portion of the infringements alleged herein; and (ii) regularly doing or soliciting business, engaging in other persistent courses of conduct and/or deriving substantial revenue from goods and services provided to individuals in Delaware and this District.

III. INFRINGEMENT

A. Infringement of the '992 Patent

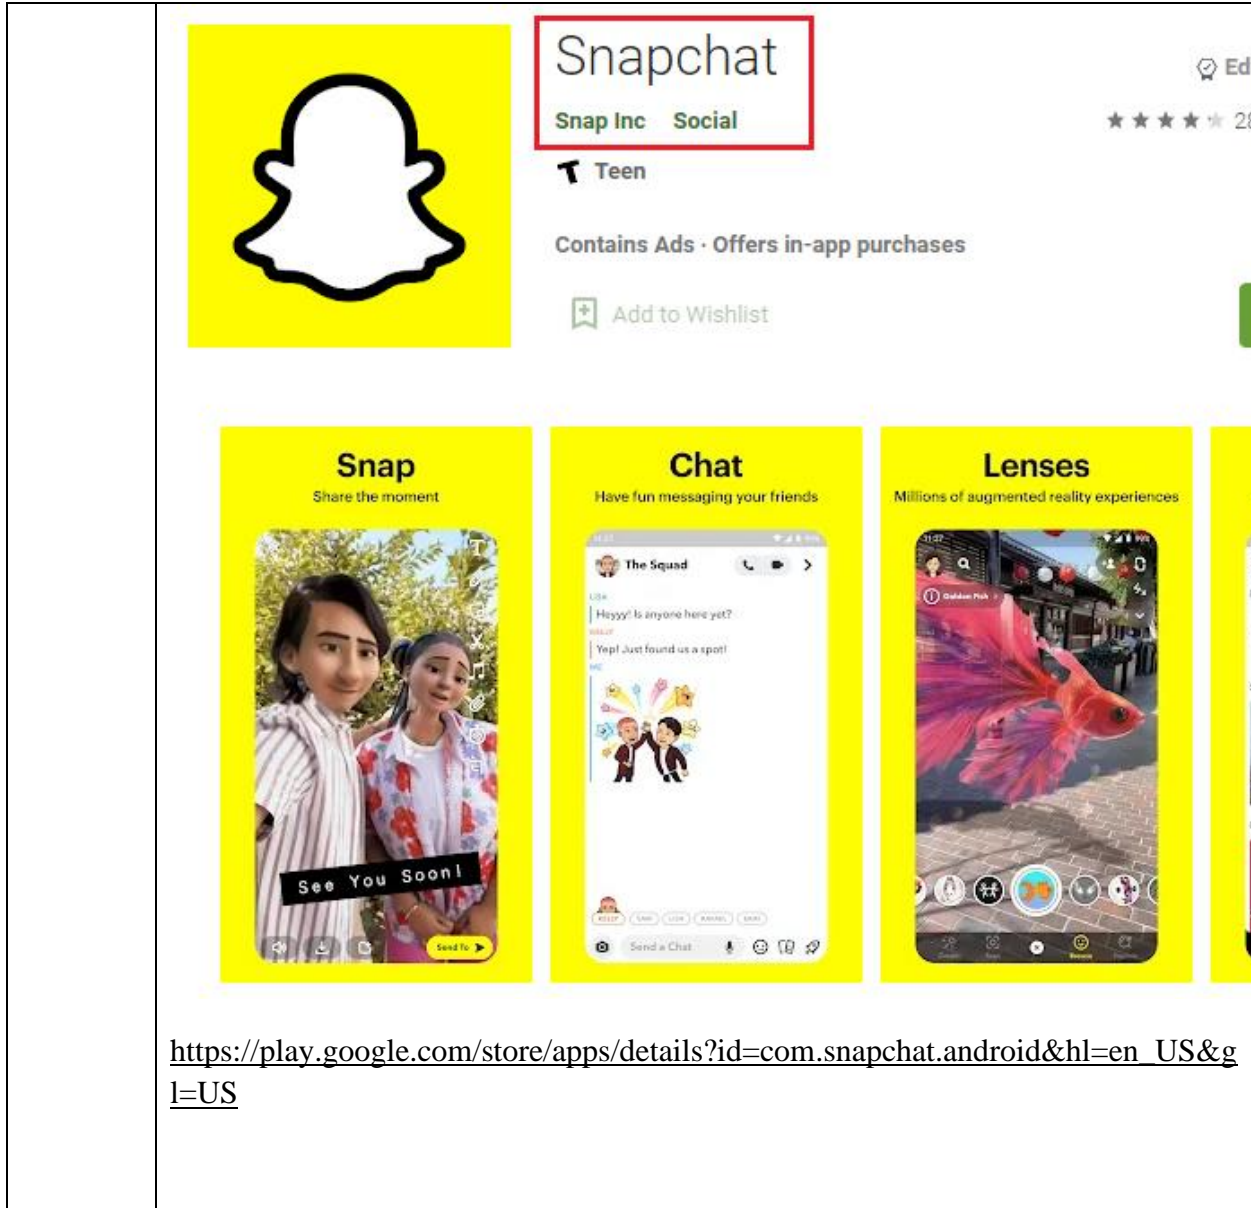

6. On March 25, 2014, U.S. Patent No. 8,860,992 ("the '992 patent", included as an attachment and part of this Complaint) entitled "Measuring and Improving the Quality of a User Experience" was duly and legally issued by the U.S. Patent and Trademark Office. Savannah owns the '992 patent by assignment.

7. The '992 patent provide an apparatus and associated systems and methods for improving a user's experience.

8. Snapchat designs, manufactures, markets and sells systems and processes for providing user feedback from a device, that infringe one or more claims of the ‘992 patent, including one or more of claims 1-29, literally or under the doctrine of equivalents. Defendant put the inventions claimed by the ‘992 Patent into service (i.e., used them); but for Defendant’s actions, the claimed-inventions embodiments involving Defendant’s products and services would never have been put into service. Defendant’s acts complained of herein caused those claimed-invention embodiments as a whole to perform, and Defendant’s procurement of monetary and commercial benefit from it.

9. Support for the allegations of infringement may be found in the following preliminary table:

US8680992	Snapchat (“The accused instrumentality”)
