

**IN THE UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF ILLINOIS**

VIRTUAL CREATIVE ARTISTS, LLC,

Plaintiff,

v.

PANDORA MEDIA, LLC,

Defendant.

C.A. No. 1:23-cv-02671

JURY TRIAL DEMANDED

PATENT CASE

ORIGINAL COMPLAINT FOR PATENT INFRINGEMENT

Plaintiff Virtual Creative Artists, LLC files this Original Complaint for Patent Infringement against Pandora Music, LLC and would respectfully show the Court as follows:

I. THE PARTIES

1. Plaintiff Virtual Creative Artists, LLC. (“VCA” or “Plaintiff”) is a Delaware limited liability company, having business address at 338 Gracious Way, Henderson, NV 89011.

2. On information and belief, Defendant Pandora Music, LLC (“Defendant”) is a corporation organized and existing under the laws of Delaware. Defendant has a place of business at 130 E. Randolph St., Suite 850, Chicago, IL 60601. Defendant has a registered agent at C T Corporation System, 208 S. LaSalle St., Suite 814, Chicago, IL 60604.

II. JURISDICTION AND VENUE

3. This action arises under the patent laws of the United States, Title 35 of the United States Code. This Court has subject matter jurisdiction of such action under 28 U.S.C. §§ 1331 and 1338(a).

4. On information and belief, Defendant is subject to this Court’s specific and general personal jurisdiction, pursuant to due process and the Illinois Long-Arm Statute, due at least to its

business in this forum, including at least a portion of the infringements alleged herein at 130 E. Randolph St., Suite 850, Chicago, IL 60601.

5. Without limitation, on information and belief, within this state, Defendant has used the patented inventions thereby committing, and continuing to commit, acts of patent infringement alleged herein. In addition, on information and belief, Defendant has derived revenues from its infringing acts occurring within Illinois. Further, on information and belief, Defendant is subject to the Court's general jurisdiction, including from regularly doing or soliciting business, engaging in other persistent courses of conduct, and deriving substantial revenue from goods and services provided to persons or entities in Illinois. Further, on information and belief, Defendant is subject to the Court's personal jurisdiction at least due to its sale of products and/or services within Illinois. Defendant has committed such purposeful acts and/or transactions in Illinois such that it reasonably should know and expect that it could be haled into this Court as a consequence of such activity.

6. Venue is proper in this district under 28 U.S.C. § 1400(b). On information and belief, Defendant has businesses in this district at 130 E. Randolph St., Suite 850, Chicago, IL 60601. On information and belief, from and within this District Defendant has committed at least a portion of the infringements at issue in this case.

7. For these reasons, personal jurisdiction exists and venue is proper in this District under 28 U.S.C. § 1400(b).

III. COUNT I
(PATENT INFRINGEMENT OF UNITED STATES PATENT NO. 9,501,480)

8. Plaintiff incorporates the above paragraphs herein by reference.

9. On November 22, 2016, United States Patent No. 9,501,480 ("the '480 Patent") was duly and legally issued by the United States Patent and Trademark Office. The '480 Patent is

titled “Revenue-Generating Electronic Multi-Media Exchange and Process of Operating Same.” A true and correct copy of the ‘480 Patent is attached hereto as Exhibit A and incorporated herein by reference.

10. VCA is the assignee of all right, title, and interest in the ‘480 Patent, including all rights to enforce and prosecute actions for infringement and to collect damages for all relevant times against infringers of the ‘480 Patent. Accordingly, VCA possesses the exclusive right and standing to prosecute the present action for infringement of the ‘480 Patent by Defendant.

11. The invention relates to the field of creating and distributing media content, in particular, creating media content based upon submissions received on an electronic media exchange. At the time of the original invention in 1998, there was an Internet-centric problem that required a technical solution—how to develop a computer system that would allow remote contributors of electronic content to share and collaborate their content to develop new media content. The claimed invention, which predates modern crowdsourcing solutions, offers a unique, unconventional, and specially configured combination of “subsystems” in which to address the Internet-centric problem.

12. As set forth in the claims, the claimed invention has a collection of unconventional and particularly configured subsystems, including:

- “an electronic media submissions server subsystem,”
- “an electronic multimedia creator server subsystem,”
- “an electronic release subsystem,”
- “an electronic voting subsystem,” and
- their corresponding specialized databases.

13. Each of these subsystems are configured in a very specific (and not generic), unconventional and non-routine manner to offer the novel and non-obvious claimed invention.

For example, claim 1 requires an “electronic media submissions database,” which is a subsystem that receives media submissions from Internet users. This is not a generic database but rather a scalable database that must be able to receive, store, and manage multiple petabytes of multimedia data received from users all over the world. This is one of the many specialized databases required in the claim. In fact, the specification discloses the use of a sophisticated database management system known in the art at the time that was capable of handling data at this level, Oracle7. This type of database management system cannot operate on a generic computing system but rather requires specialized hardware and software.

14. As another example, the claim requires a specifically configured “electronic media submission server subsystem.” This subsystem is defined as specifically having:

- “one or more data processing apparatus,”
- “an electronic media submission database stored on a non-transitory medium,”
and
- “a submissions electronic interface.”

The “submissions electronic interface” is further specifically “configured” [1] “to receive electronic media submissions from a plurality of submitters over a public network, and [2] store the electronic media submissions in the electronic media submission database.” Further, “the electronic media submissions database” in this subsystem is further required to “store[] [1] data identifying the submitter and [2] data indicating content for each electronic media submission.” Collectively, the level of detail included in this very particular, well-defined, and unconventional subsystem makes clear that the claims include substantially more than the alleged abstract idea or merely performing an alleged abstract idea on a computer.

15. Similarly, the claim also requires a separate specifically configured “an electronic multimedia creator server subsystem.” The claim specifically defines how this second subsystem

interacts with other components including being “operatively coupled to the electronic media submissions server subsystem.” The claim also specifically defines this subsystem as “having”:

- “one or more data processing apparatus” and
- “an electronic creator multimedia database stored on a non-transitory medium.”

16. This subsystem is also specifically “configured [1] to select and [2] retrieve a plurality of electronic media submissions from the electronic media submissions database using an electronic content filter located on the electronic multimedia creator server.” The “filter” also includes a very specific algorithm of “being based at least in part on at least one of the one or more user attributes to develop multimedia content to be electronically available for viewing on user devices.” Even more detail is provided by requiring “the identification of the submitter [be] maintained with each selected and retrieved submission within the multimedia content.” Here again, collectively, the level of detail included in this very particular and well-defined and unconventional subsystem makes clear that the claims include substantially more than an alleged abstract idea or merely performing an alleged abstract idea on a computer.

17. The claim also includes “an electronic release subsystem,” which is well defined and not conventional or routine. The claim defines how this subsystem is “operatively coupled to the electronic multimedia creator server subsystem.” The claim also defines the components of this subsystem as having “one or more data processing apparatus” and being particularly “configured to make the multimedia content electronically available for viewing on one of more user devices.” These details, collectively, also make this very particular and well-defined and unconventional subsystem substantially more than an abstract idea or performing an abstract idea on a computer.

18. The claim also requires “an electronic voting subsystem,” which is well-defined, specific, and unconventional. This claimed subsystem has “one or more data processing apparatus” and is specifically “configured to enable a user to electronic vote for or electronically rate an electronically available multimedia content or an electronic media submission within a respective electronically available multimedia content.”

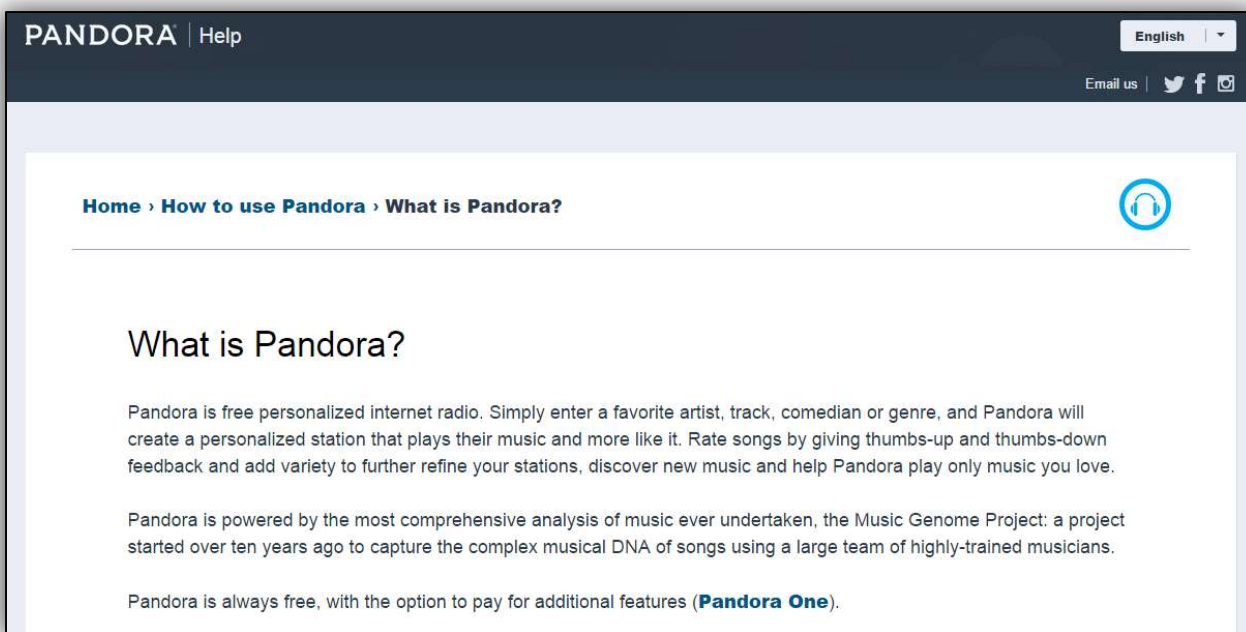

19. Claim 1 is a specific and discrete implementation. For example, the claim requires an “electronic content filter” located at the server, remote from end users, and customizable based on user attributes. As another example, the “electronic voting subsystem” at the time of the invention was novel and inventive and added sufficient inventive contributions to avoid a risk of preempting creating and distributing media content. It is possible to create and distribute media content without ever having to include a “voting” subsystem on what components should be included in such media content. The detailed configuration “to enable a user to vote for or electronically rate an electronically available multimedia content or an electronic media submission within a respective electronically available multimedia content” has the level of particularity that avoids any risk of preemption.

20. Furthermore, the very particular and specifically configured “electronic media creator subsystem” not only provides a detailed and unique physical structure and interrelationship with other claimed components, but also includes a very specific configuration that is not conventional or routine. The claims make clear the interrelationship of the “electronic multimedia creator server subsystem” with respect to “the electronic media submission server subsystem” which must be “operatively coupled” thereto. The claims also provide detail on how the “electronic media creator subsystem” is “configured” “to select and retrieve a plurality of electronic media submissions from the electronic media submission database using an electronic

filter.” They also provide detail on how the “electronic filter” is “based at least in part on at least one of the one or more user attributes” and specifies that “the identification of the submitter is maintained with each selected and retrieved submission within the multimedia content.”

21. These arguments overcame a patent eligibility rejection under 35 U.S.C. §101 of the claim at issue during the prosecution of the ‘480 patent before the United States Patents and Trademark Office.

22. **Direct Infringement.** Upon information and belief, Defendant has been directly infringing claim 1 of the ‘480 Patent in Illinois, and elsewhere in the United States, by employing a computer-based system using <https://www.pandora.com/> (“Accused Instrumentality”) (e.g., <https://www.pandora.com/>). Pandora uses a computer-based system for its Pandora website and platform, for example to enable the provision of personalized Internet radio stations that play users’ music and similar music. (<https://web.archive.org/web/20150908091354/https://help.pandora.com/customer/portal/articles/182180-what-is-pandora-> and <https://www.datacenterknowledge.com/print/166999>). For example, Pandora has employed, in order to operate its Accused Instrumentality, a number of F5 BIG-IP systems and F5 VIPRION devices, creating load balancing pools of up to 100 or more application server nodes, for providing services to its 62 million or more users. (<https://www.youtube.com/watch?v=kuD0TXHbHGY&t=4s> and <https://www.f5.com/case-studies/pandora-scales-to-serve-tens-of-millions-of-internet-radio-users-with-f5-solution>).

(E.g., <https://web.archive.org/web/20150908091354/https://help.pandora.com/customer/portal/articles/182180-what-is-pandora->).

23. The Accused Instrumentality is a computer-based platform that includes an electronic media submissions server subsystem, having one or more data processing apparatus and an electronic media submissions database in order to process and store received submissions from users, for example as discussed below in connection with the Accused Instrumentality's servers. These submissions, which include songs and accompanying metadata are provided to the Accused Instrumentality via a submissions electronic interface configured to receive such electronic media submissions (e.g., songs and accompanying metadata) from a plurality of submitters (e.g., Pandora users with accompanying created accounts) over a public network (e.g., the Internet) and stored in said electronic media submissions database. Examples of such submissions electronic interface used on the Accused Instrumentality for this purpose are shown below.

PANDORA Help English

How do I submit my music or comedy to Pandora?
After you sign in with your Pandora listener account, all it takes is a few simple steps to send us your tracks:

1. Provide us with your basic contact information
2. Give us details about your submission including your name, release information and link to your track
3. Ensure that you have legal rights to your work and it is available on iTunes (US only), Amazon.com/MP3, CD Baby or Bandcamp
4. Verify your account

Where is the submission form located on Pandora?
You can go directly to submit.pandora.com or the Submit Your Music link in the footer of the web page.

What is different about the new submissions process?
The new system is simple and digital. With the new submissions process, you no longer need a CD available on amazon and UPC for your music or comedy. In a few clicks, your work is sent directly to our Curation team for review. Approved submissions are purchased and ingested from a digital music source.

What do I need to submit my music or comedy to Pandora?
Here's what you need to have in hand to successfully submit to Pandora:

1. Pandora listener account
2. Contact information
3. Artist/band name
4. Name and type of release (Album, EP, or Single)
5. Valid link to one of your tracks on iTunes (US only), Amazon.com/MP3, CD Baby or Bandcamp from the release you are currently submitting

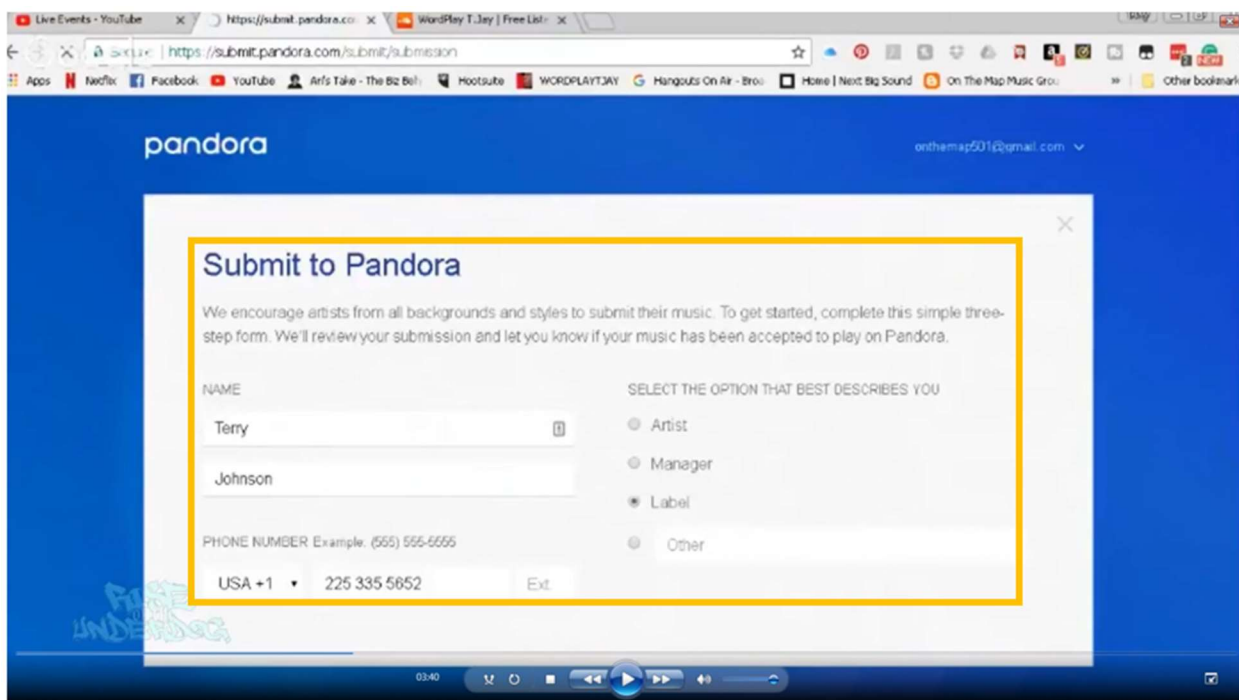

(E.g., <https://web.archive.org/web/20170106192724/http://help.pandora.com/customer/portal/articles/24802-information-for-artists-submitting-to-pandora>).

The screenshot shows a web browser window with the URL <https://submit.pandora.com>. The page has a blue header with the Pandora logo. The main content area is white and contains a yellow-bordered box with the following text:

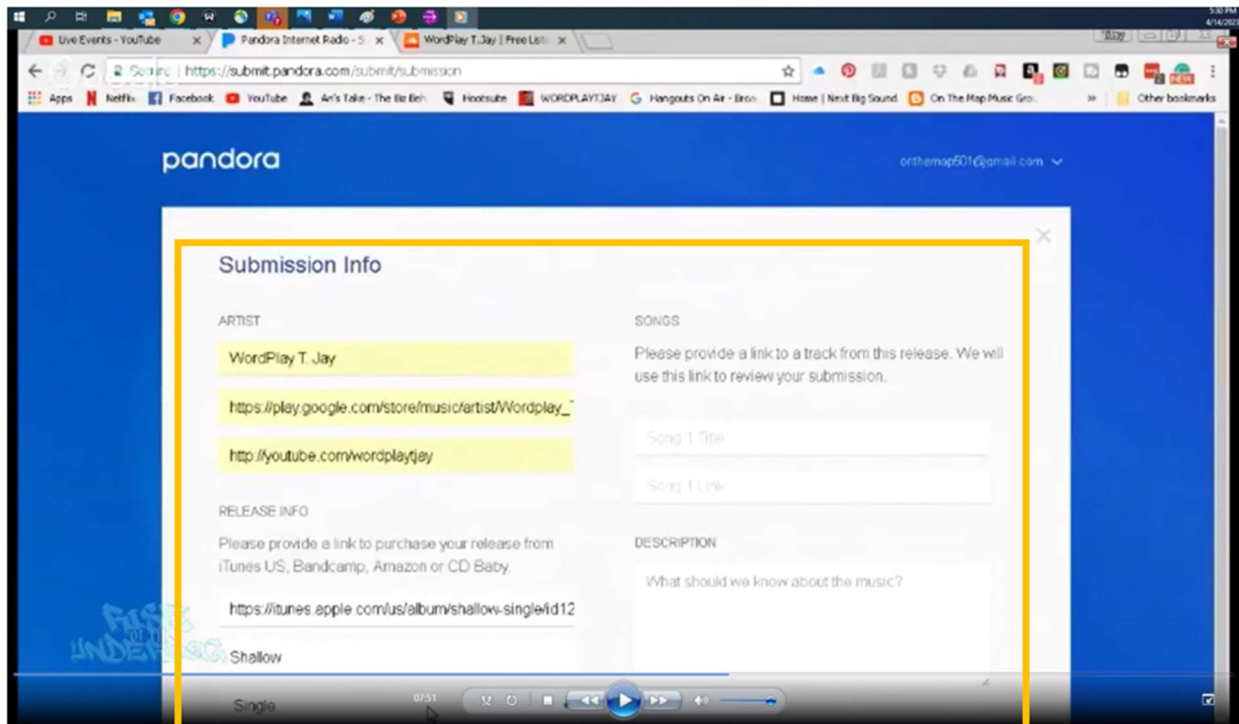

Submit to Pandora

You must be logged in to make a submission

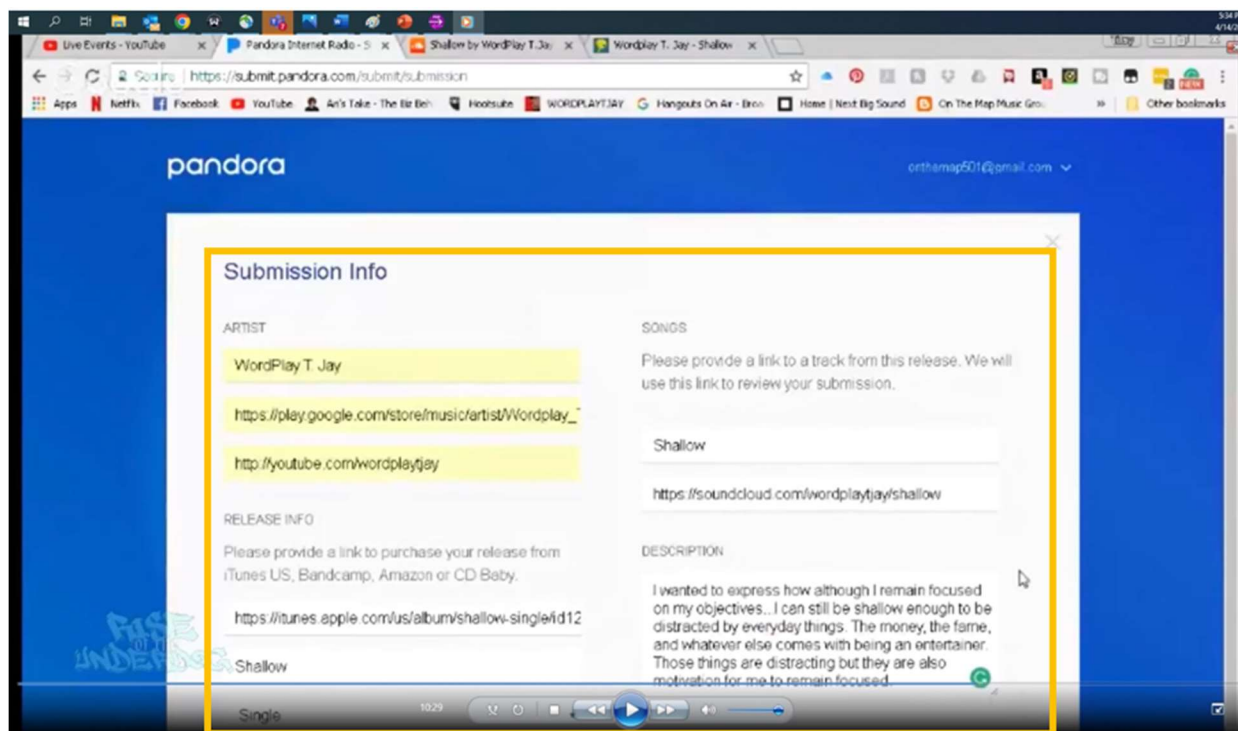

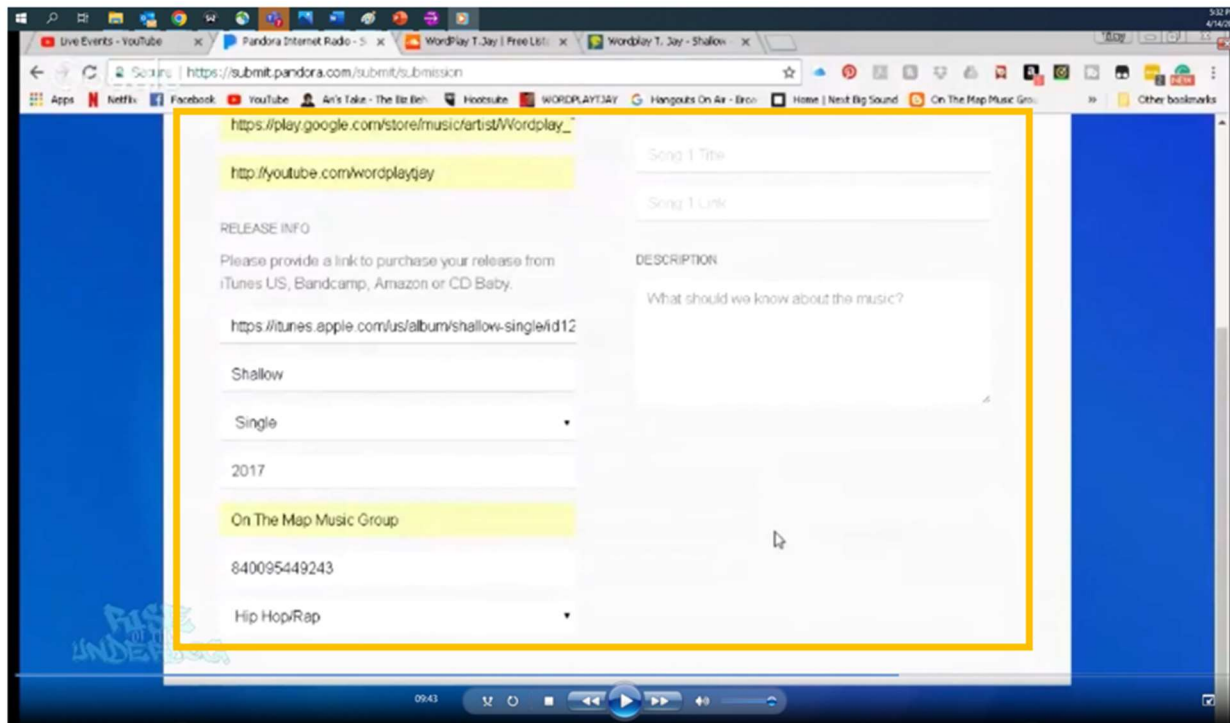

There are two input fields: one for an email address containing `onthemapbooking@gmail.com` and one for a password represented by six dots. Below these fields are two buttons: a blue "Sign In" button and a grey "Register For Free" button. At the bottom of the box is a link that says "Forgot your password?".

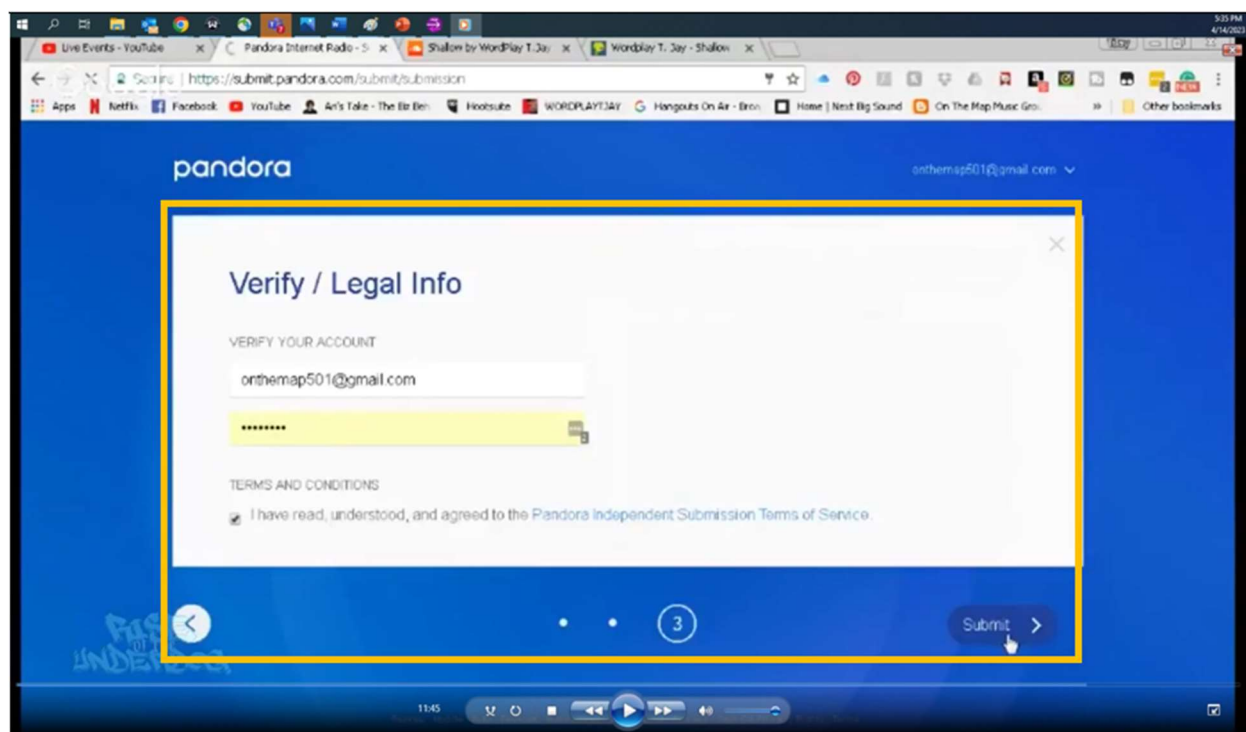

(E.g., <https://www.youtube.com/watch?v=fvnyoRIqteA>).

(E.g., <https://www.youtube.com/watch?v=fvnyoRIqteA>).

(E.g., <https://www.youtube.com/watch?v=fvnyoRIqteA>).

(E.g., <https://www.youtube.com/watch?v=fvnyoRIqteA>).

24. The electronic media submissions database of the Accused Instrumentality which stores the submissions (e.g., songs submitted by various Pandora users) further stores data identifying the submitter and data indicating content for each electronic media submission. Examples showing such data identifying the submitter and data indicating content associated and stored with a variety of submissions (e.g., songs) which are stored in the electronic media submissions database are shown below.

(E.g., <https://www.youtube.com/watch?v=fvnyoRIqteA>).

25. The Accused Instrumentality comprises a user database comprising one or more user attributes stored in such database. Such user database is stored in memory available through the Accused Instrumentality's servers, as discussed below. Some examples of such user attributes stored in such user database on the Accused Instrumentality are "favorited" kinds of content and "thumbs-up" and "thumbs-down" ratings that may be indicated by a user stored within such user database. Further examples of such user attributes stored in such user database on the Accused Instrumentality are user profile pictures, a user name, and attributes relating to a number and identity of reviews or "Thumbs," playlists, others users "followed" by that user, and other users "following" that user, as shown for example below

(E.g., <https://web.archive.org/web/20150908091354/https://help.pandora.com/customer/portal/articles/182180-what-is-pandora->).

(E.g., <https://www.youtube.com/watch?v=niTqJF6PH8M>).

26. As shown below, the Accused Instrumentality platform employs an electronic multimedia creator server subsystem operatively coupled to the electronic media submissions server subsystem, necessarily having one or more data processing apparatus in order to manage content, and an electronic creator multimedia databased stored on a non-transitory medium, configured to select and retrieve a plurality of electronic media submissions from the electronic media submissions database using an electronic content filter located on the electronic multimedia creator server. As can be seen below, such electronic content filter as is used by Pandora is based at least in part on at least one of the one or more user attributes (*e.g.*, based on users that a particular user “follows” and/or based on other users that “follow” a particular user, which in turn affects which electronic media submissions appear on a given user’s “feed”). Such function-specific subsystems may be contained within the function-specific servers, from amongst communicatively connected Pandora servers of Pandora, as shown below.

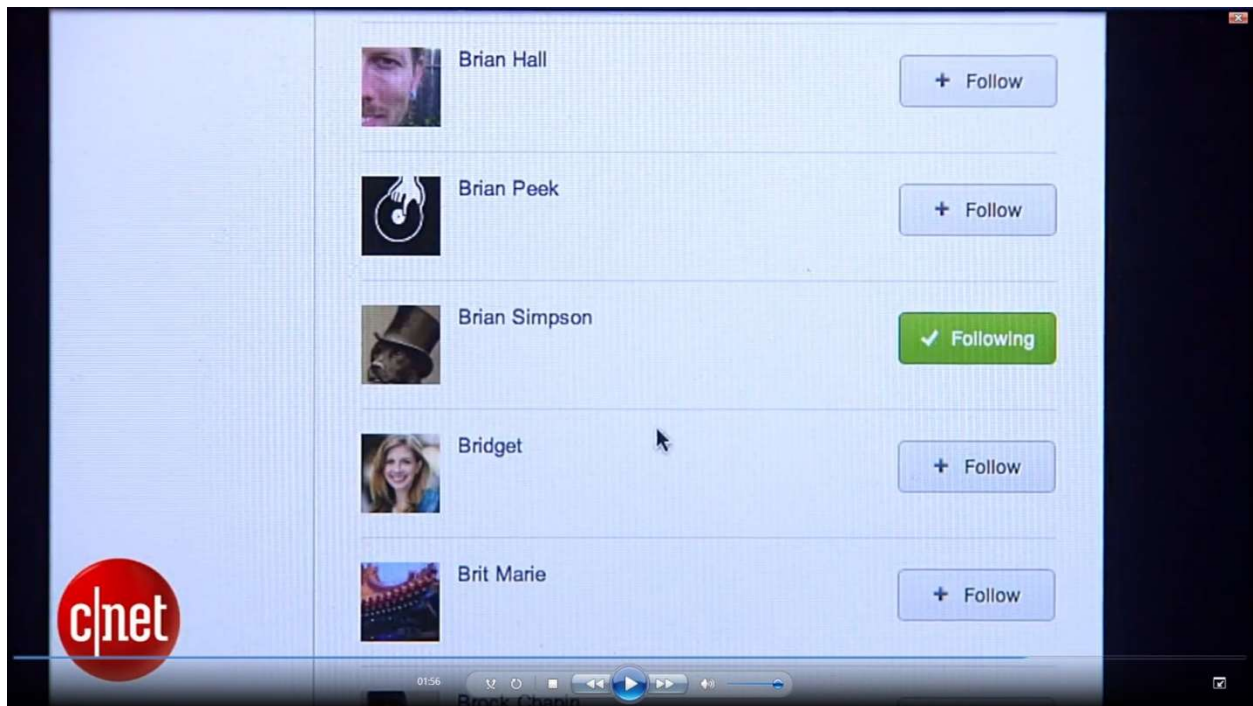

The screenshot shows the Pandora website interface for the 'Moxy Fruvous Radio' station. At the top, there's a navigation bar with 'PANDORA', 'Moxy Fruvous Radio', and a user profile 'judysmith07@yahoo...'. Below this is a control bar with a 'Create Station' button, a progress bar at 2:43, and playback controls. The main content area is divided into three sections: a 'Now Playing' sidebar on the left, a central album art area for 'Sahara' by Moxy Fruvous, and a right-hand advertisement for T-Mobile. The T-Mobile ad features the text 'UNLIMITED 4G LTE DATA 2 LINES FOR \$100/mo.' and a 'SWITCH TODAY' button. Below the album art, there's a section for 'About Moxy Fruvous' and 'Similar Artists' including 'They Might Be Giants', 'Da Vinci's Notebook', 'Barenaked Ladies', and 'Great Big Sea'. A 'GENRE STATIONS' section is visible at the bottom left.

This is a screenshot of the 'Share this track' dialog box on Pandora. The title is 'Share this track' with the subtitle 'To your Pandora profile and your followers' music feeds'. Below the title, there are two radio buttons for 'Share: Station' and 'Track', with 'Track' selected. A text input field is provided for writing a message about the track. Below the input field, the track information is displayed: 'MOXY FRUVOUS Sahara by Moxy Fruvous on You Will Go To The Moon'. At the bottom, there are options to 'Also share on' Facebook and Twitter, both with '(sign in)' links. There is also an 'Email instead' checkbox and a 'Share' button.

(<http://www.pandora.com/station/play/2698880156758087533> (retrieved ca. 2016)).

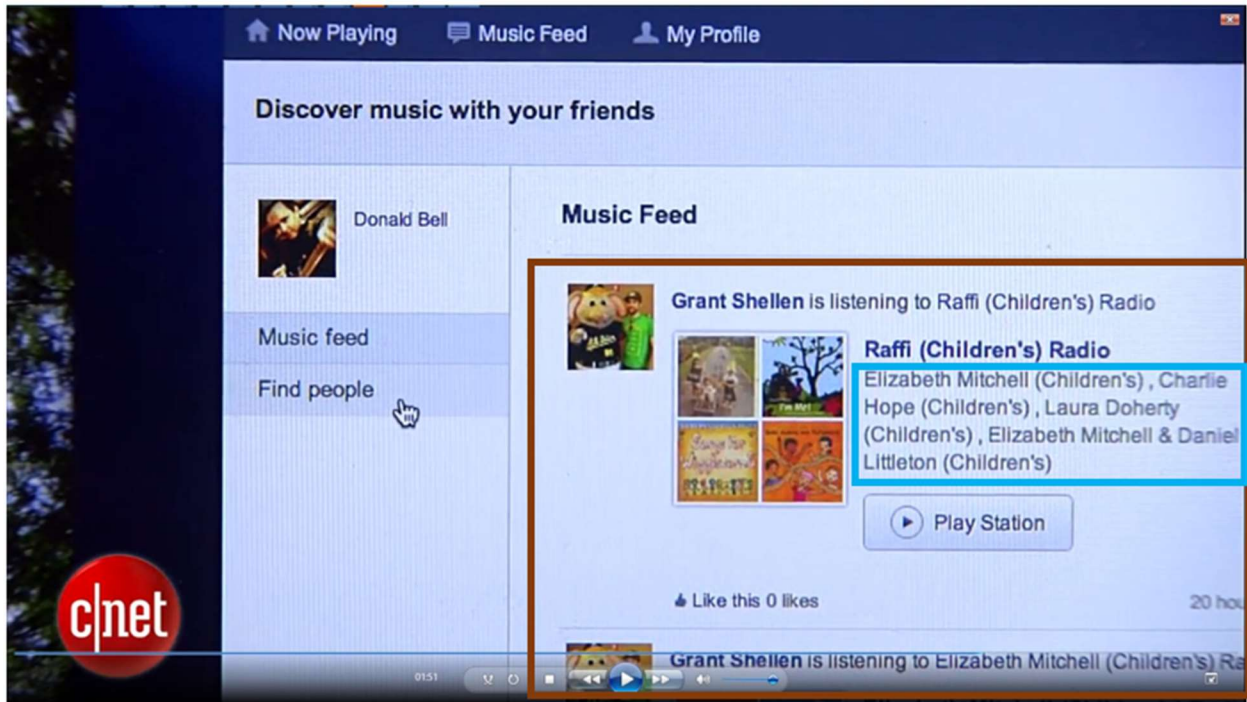

(<https://www.youtube.com/watch?v=niTqJF6PH8M>).

(https://www.youtube.com/watch?v=_fZ1CMW2Li0&t=55s).

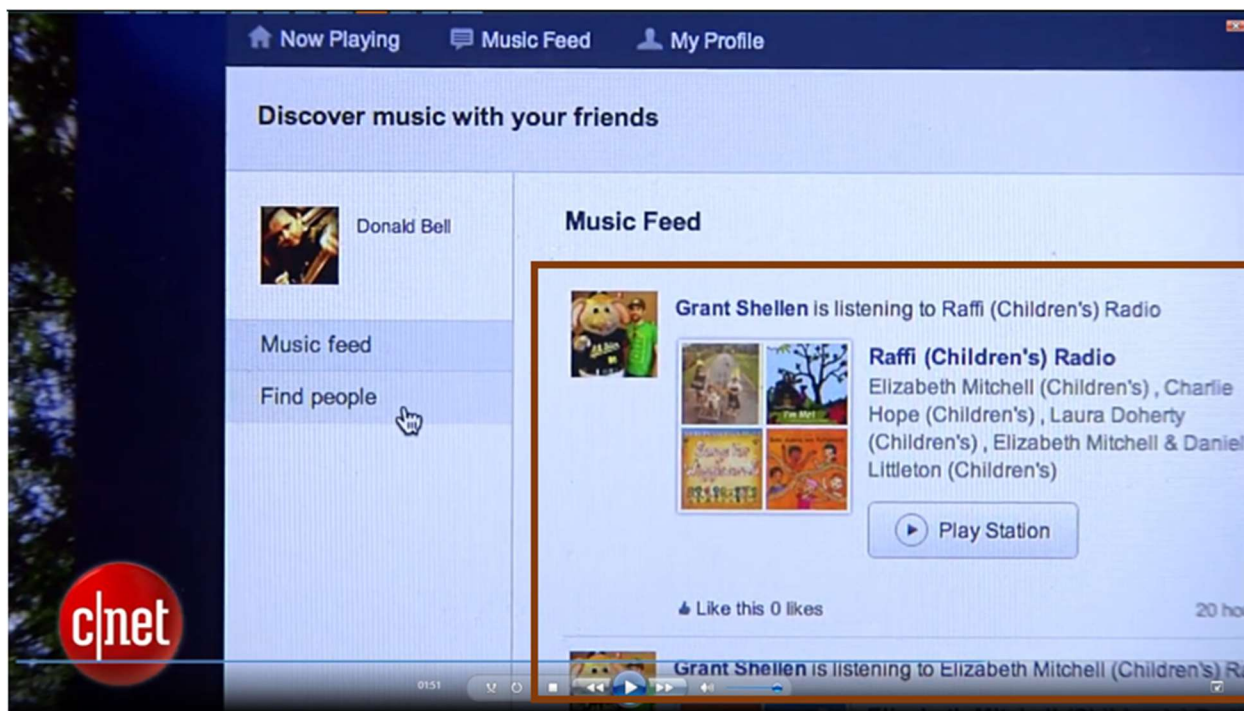

27. Such electronic content filter is used by the Accused Instrumentality to develop multimedia content (e.g., associated with songs or other audio content) to be electronically available for viewing on user devices (e.g., computers or mobile devices incorporating browsers or the Pandora application) wherein the identification of the submitter is maintained with each selected and retrieved submission within the multimedia content.

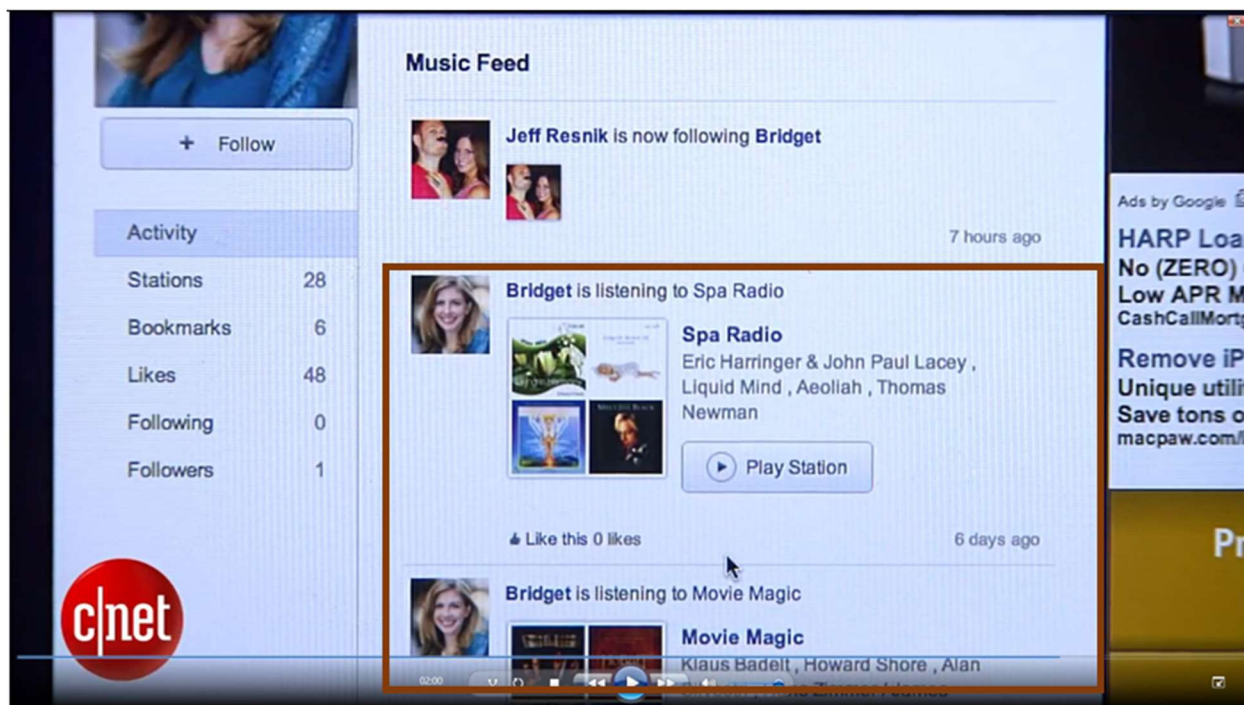

(E.g., https://www.youtube.com/watch?v=_fZ1CMW2Li0&t=55s).

28. The Accused Instrumentality employs an electronic release subsystem operatively coupled to the electronic multimedia creator server subsystem, necessarily having one or more data processing apparatus in order to serve content to Pandora users, configured to make the multimedia content electronically available for viewing on one or more user devices. For example, as shown below, multimedia content is provided on a user's device in response to a user logging in to Pandora and/or selecting "Music Feed" and/or "Activity" sections. Such function-specific

subsystems may be contained within the function-specific servers, from amongst communicatively connected Pandora servers, for example as discussed below.

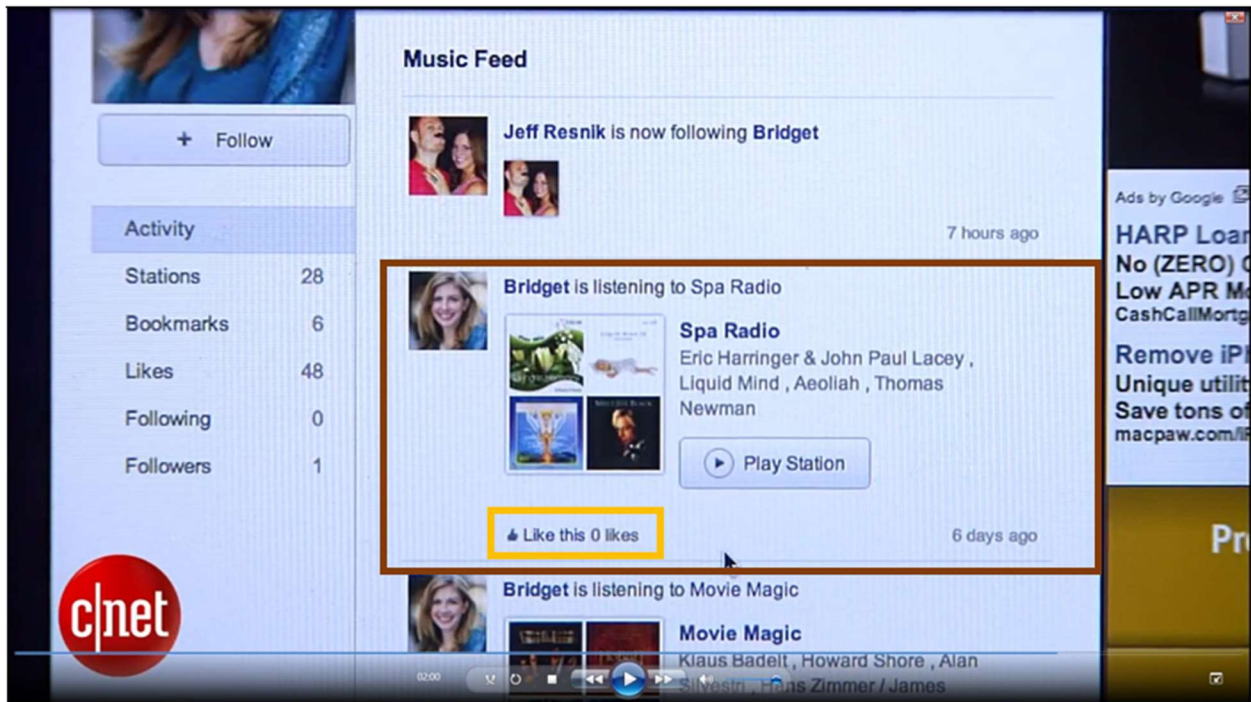

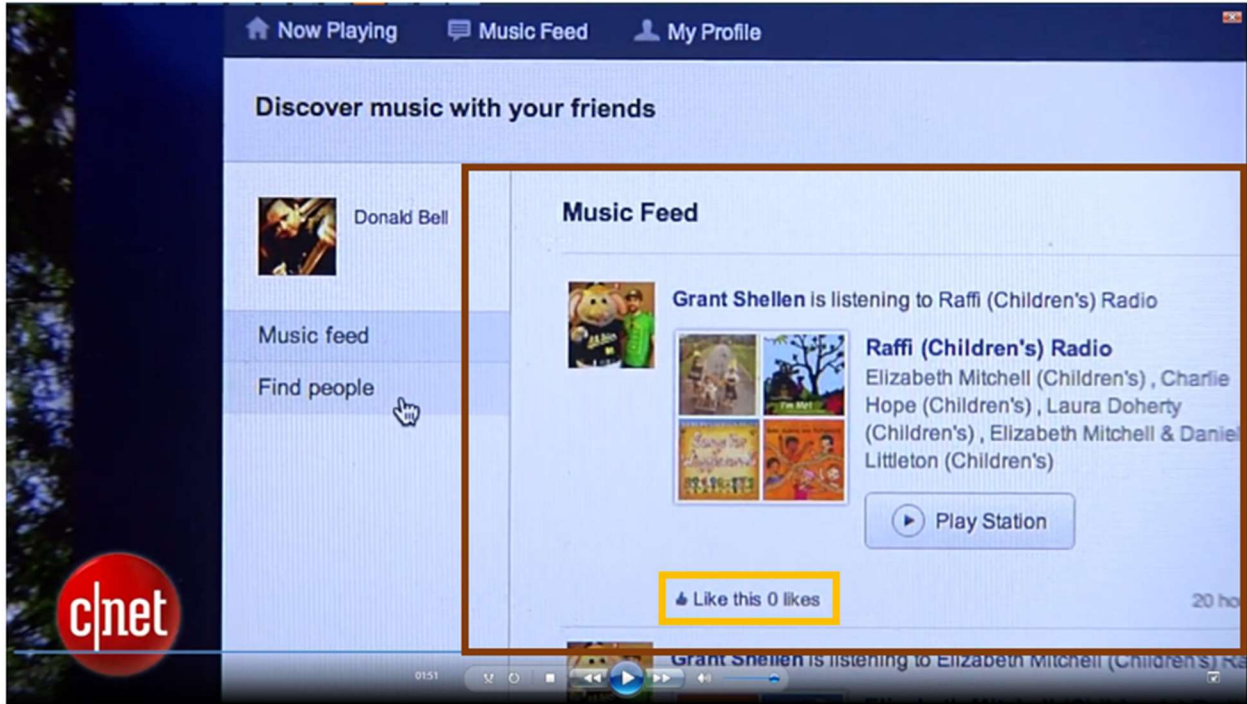

(E.g., <https://www.youtube.com/watch?v=fZ1CMW2Li0&t=55s>).

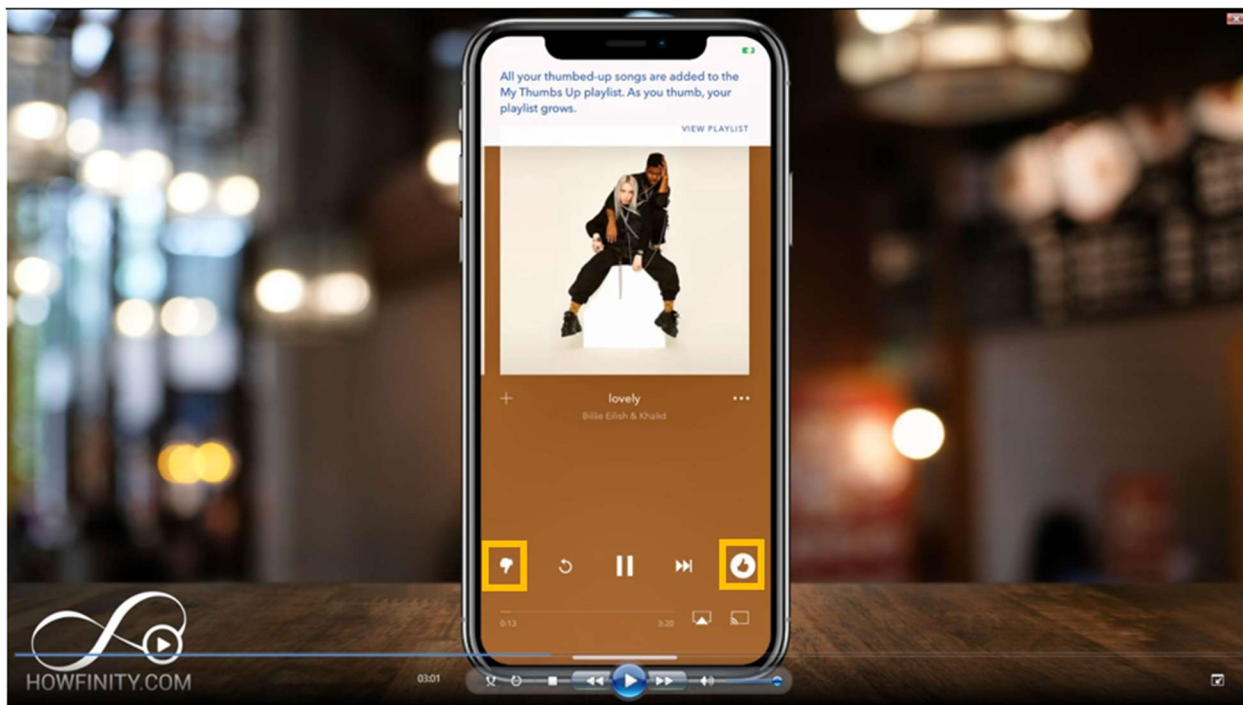

(E.g., <https://www.youtube.com/watch?v=fZ1CMW2Li0&t=55s>).

29. The Accused Instrumentality employs an electronic voting subsystem, necessarily having one or more data processing apparatus in order to track a number of votes, configured to enable a user to electronically vote for or electronically rate (e.g., by selecting a “heart” / “like” icon) an electronically available multimedia content or an electronic media submission (e.g., a song) within a respective electronically available multimedia content. As can be seen below, the option to vote for electronically available multimedia content or an electronic media submission (e.g., a song) within a respective electronically available multimedia content is made available to users via selecting a “heart” icon, and a total number of such selections is tracked and associated with the multimedia content is and/or submission. Such function-specific subsystems may be contained within the function-specific servers, from amongst the communicatively connected Pandora servers, for example as discussed below.

(E.g., https://www.youtube.com/watch?v=_fZ1CMW2Li0&t=55s).

(E.g., <https://www.youtube.com/watch?v=niTqJF6PH8M>).

30. Plaintiff has been damaged as a result of Defendant’s infringing conduct. Defendant is thus liable to Plaintiff for damages in an amount that adequately compensates Plaintiff for such Defendant’s infringement of the ‘480 Patent, *i.e.*, in an amount that by law cannot be less than would constitute a reasonable royalty for the use of the patented technology, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

31. To the extent marking is required, VCA has complied with all marking requirements.

IV. COUNT II
(PATENT INFRINGEMENT OF UNITED STATES PATENT NO. 9,477,665)

32. Plaintiff incorporates the above paragraphs herein by reference.

33. On October 25, 2016, United States Patent No. 9,477,665 (“the ‘665 Patent”) was duly and legally issued by the United States Patent and Trademark Office. The ‘665 Patent is titled “Revenue-Generating Electronic Multi-Media Exchange and Process of Operating Same.” A true

and correct copy of the '665 Patent is attached hereto as Exhibit B and incorporated herein by reference.

34. VCA is the assignee of all right, title, and interest in the '665 Patent, including all rights to enforce and prosecute actions for infringement and to collect damages for all relevant times against infringers of the '665 Patent. Accordingly, VCA possesses the exclusive right and standing to prosecute the present action for infringement of the '665 Patent by Defendant.

35. The application leading to the '665 patent was filed November 16, 2012, which was a continuation of application no. 11/978,781, which issued as United States Patent No. 8,340,994, which was a continuation of application no. 09/565,438 which issued as United States Patent No. 7,308,413. (Ex. B at cover). The '665 patent was first assigned to Virtual Creative Artists, LLC. (*Id.*).

36. The '665 Patent shares the identical specification as the '480 patent and therefore VCA incorporates the background and discussion of the invention in Paragraphs 11-18. Furthermore claim 1 involves a system for generating multimedia content. The claim requires, among other things, electronically generating a multimedia file from the retrieved electronic media Submissions in accordance with a selected digital format, wherein the identification of the submitter is maintained with each retrieved submission within the multimedia file. The claim requires electronically transmitting the multimedia file to a plurality of publicly accessible webservers to be electronically available for viewing on one or more user devices over a public network via a web-browser and. This allows electronically transmit data indicating votes or rating of multimedia content in a much quicker and easier fashion based on specific user criteria. There is nothing abstract about this very particular, unconventional, and non-routine system for the

generation of multimedia content as specifically claimed and there is no risk of preempting creating and distribution contention generally, or even within the context of the Internet.

37. The invention is a highly technical electronic process that cannot be achieved with the human mind and is instead rooted in computer technology, including the steps of:

- “electronically retrieving a plurality of electronic media submissions,”
- “electronically generating a multimedia file from the retrieved electronic media submissions in accordance with a selected digital format,”
- “electronically transmitting the multimedia file to a plurality of publicly accessible web servers to be electronically available for viewing on one or more user devices over a public network via a web-browser,” and
- “providing a web-based graphical user interface that enables a user to electronically transmit data indicating a vote or rating for an electronically available multimedia content or an electronic media Submission within a respective electronically available multimedia content.”

38. Each of these subsystems are configured in a very specific (and not generic), unconventional and non-routine manner to offer the novel and non-obvious approach claimed invention. For example, claim 1 requires an “electronic media submissions database,” which is a subsystem that receives media submissions from Internet users. This is not a generic database but rather a scalable database that must be able to receive, store, and manage multiple petabytes of multimedia data received from users all over the world. This is one of the many specialized databases required in the claim. In fact, the specification discloses the use of a sophisticated database management system known in the art at the time that was capable of handling data at this level, Oracle7. This type of database management system cannot operate on a generic computing system but rather requires specialized hardware and software.

39. The claim also provides details to explain how each step operates. For example, the claim requires “electronically retrieving a plurality of electronic media submissions from an electronic media submissions database using an electronic content filter located on one or more

data processing apparatus.” Further, “the electronic media submissions database” in this step is further required to “store[] [1] data identifying the submitter and [2] data indicating content for each electronic media submission.” The step further requires an “electronic content filter.” The “filter” also includes a very specific algorithm of “being based at least in part on at least one of the one or more user attributes.”

40. The claims also require an “electronically generating a multimedia file from the retrieved electronic media submissions in accordance with a selected digital format.” Manipulation of multimedia data in accordance with a selected digital format is far from generic and was not routine or conventional at the time of the invention. Further, this step requires that the “electronic media submissions database” “stores data identifying the submitter” and the “the identification of the submitter is maintained with each retrieved submission within the multimedia file.”

41. The claims also require “providing a web-based graphical user interface that enables a user to electronically transmit data indicating a vote or rating for an electronically available multimedia content or an electronic media Submission within a respective electronically available multimedia content,” which is a well-defined, specific, and unconventional feature. By including this additional voting/rating feature, the claims avoid any risk of preempting the creation and distribution of content.

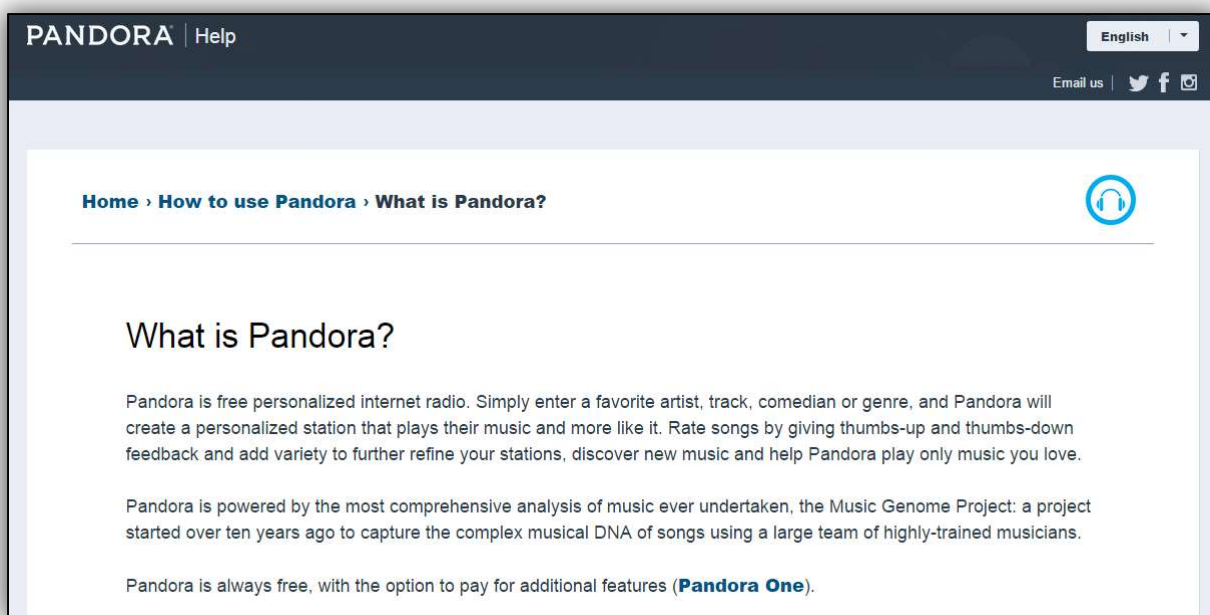

42. The also has inventive concepts. For example, the claim requires that the filtering tool be at a specific location, remote from the end-users, with customizable filtering features specific to each end user. The “electronic content filter” is located at the server, remote from the end user, and customizable based on user attributes. The “electron voting” step at the time of the invention was also novel, inventive, and added sufficient inventive contributions to avoid a risk of preempting the creation and distribution of media content. It is clearly possible to create and

distribute media content without every having to include a “voting” subsystem on what components should be included in such media content.

43. These arguments overcame a patent eligibility rejection under 35 U.S.C. §101 of the claim at issue during the prosecution of the ‘665 patent before the United States Patent and Trademark Office.

44. **Direct Infringement.** Upon information and belief, Defendant has been directly infringing claim 1 of the ‘665 Patent in Illinois, and elsewhere in the United States, by employing a computer-based system using <https://www.pandora.com/> (“Accused Instrumentality”) (e.g., <https://www.pandora.com/>).

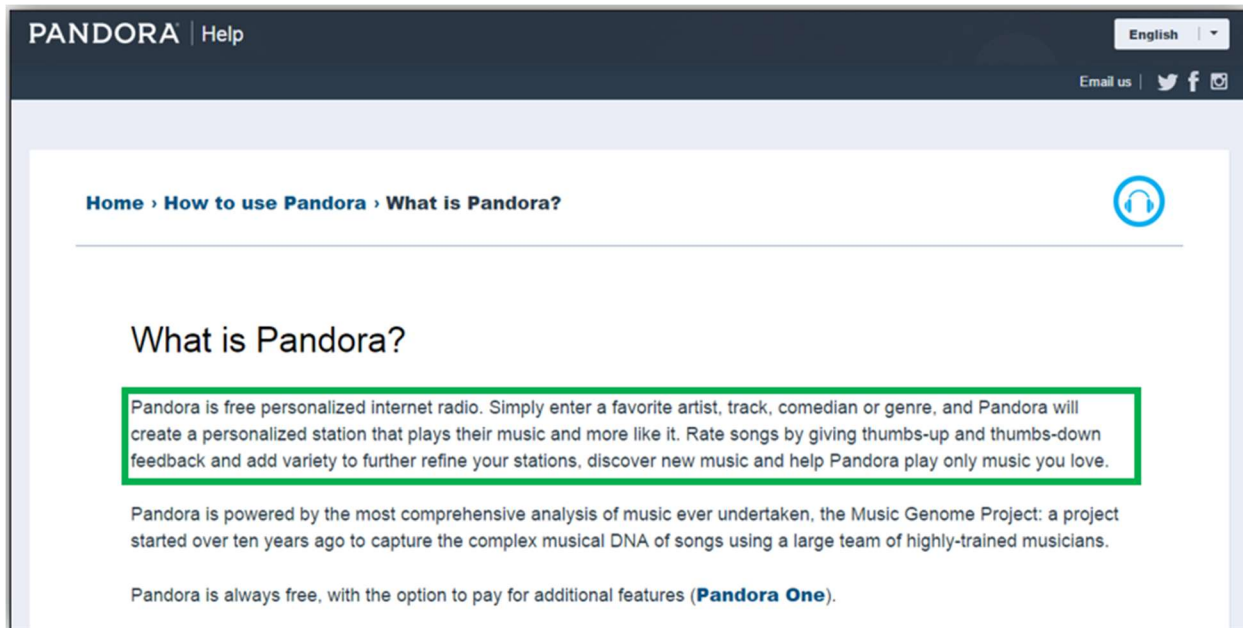

45. Pandora uses a computer-based system for its Pandora website and platform, for example to enable the provision of personalized Internet radio stations that play users’ music and similar music. This system necessarily makes use of one or more data processing apparatus, and a computer readable medium coupled to the one or more data processing apparatus having instructions stored thereon which, when executed by the one or more data processing apparatus, cause the one or more data processing to perform an electronic method comprising the functions as further discussed below. For example, Pandora, in order to operate its Accused Instrumentality platform, began deploying F5 systems in 2007 with pilot test – with two pairs running a few years later. Later, a number of F5 BIG-IP systems and F5 VIPRION devices were used, creating load balancing pools of up to 100 or more application server nodes, for providing services to its 62 million or more users. (<https://www.youtube.com/watch?v=kuD0TXHbHGY&t=4s> and <https://www.f5.com/case-studies/pandora-scales-to-serve-tens-of-millions-of-internet-radio-users-with-f5-solution>).

(E.g., <https://web.archive.org/web/20150908091354/https://help.pandora.com/customer/portal/articles/182180-what-is-pandora->).

46. The Accused Instrumentality comprises a user database comprising one or more user attributes stored in such database. Such user database is stored in memory available through the Accused Instrumentality's servers, for example as discussed below. Some examples of such user attributes stored in such user database on the Accused Instrumentality are "favorited" kinds of content and "thumbs-up" and "thumbs-down" ratings that may be indicated by a user stored within such user database. Further examples of such user attributes stored in such user database on the Accused Instrumentality are user profile pictures, a user name, and attributes relating to a number and identity of reviews or "Thumbs," playlists, others users "followed" by that user, and other users "following" that user, for example as shown for example below. The Accused Instrumentality electronically retrieves a plurality of electronic media submissions from an electronic media submissions database stored in a non-transitory medium (e.g., memory), using an electronic content filter necessarily located on and associated with one or more data processing

apparatus in order to manage content. As can be seen below, such electronic content filter, as is used by Pandora, is based at least in part on at least one of the one or more user attributes (*e.g.*, based on users that a particular user “follows” and/or based on other users that “follow” a particular user, which in turn affects which electronic media submissions appear on a given user’s “feed”). The Accused Instrumentality electronically retrieves, from storage in an electronic media submissions database on a non-transitory medium, a plurality of electronic media submissions from an electronic media submissions database using this electronic content filter located on the one or more data processing apparatus, with examples of such retrieved electronic media submissions, and forming multimedia content shown below. Such function-specific subsystems may be contained within the function-specific servers and associated non-transitory memory, from among communicatively connected Pandora servers, for example as discussed below.

The image is a screenshot of the Pandora website interface. At the top, it displays 'PANDORA' and 'Moxy Fruvous Radio'. A navigation bar includes a 'Create Station' button, playback controls (thumbs down, thumbs up, pause, play, volume), and a progress bar showing '2:43' and '-1:07'. The current track is 'Sahara by Moxy Fruvous on You Will Go To The Moon'. Below the navigation bar, there are tabs for 'Now Playing', 'Music Feed', and 'My Profile'. The main content area features a 'Shuffle' button, a list of stations including 'The Axis of Awesome...' and 'Moxy Fruvous Radio', and a 'Genre Stations' section. The central focus is the 'Sahara' track page, which includes an album cover for 'MOXY FRUVOUS' and a bio: 'About Moxy Fruvous: First spotted by a CBC radio executive while busking in Toronto, the four members of Moxy Fruvous used their theatrical experience to set them apart. Their street-side set included rap, folk, impromptu theatrics, full bio'. Below the bio is a 'Similar Artists' list: 'They Might Be Giants', 'Da Vinci's Notebook', 'Barenaked Ladies', and 'Great Big Sea'. On the right side of the page, there is a large pink advertisement for T-Mobile. The ad features the T-Mobile logo and the text: 'UNLIMITED 4G LTE DATA 2 LINES FOR \$100/mo.' (with a note 'Includes 5 GB of tethering per line. Ltd. time offer. Taxes & fees add'). A 'SWITCH TODAY' button with a play icon is also present. The bottom of the ad shows a woman wearing headphones and holding a smartphone.

47. The Accused Instrumentality's servers enable electronic media submissions, which include songs and accompanying metadata, to be provided to the Accused Instrumentality via a submissions electronic interface configured to receive such electronic media submissions (e.g., songs and accompanying metadata) from a plurality of submitters (e.g., Pandora users with accompanying created accounts) over a public network (e.g., the Internet), and for such electronic media submissions to be stored in said electronic media submissions database. Examples of such submissions electronic interface used on the Accused Instrumentality for this purpose are shown below.

PANDORA | Help possible inclusion on Pandora. We thrive on connecting artists and listeners – allowing artists to be discovered by new listeners. Introducing our listeners to new artists and their recordings they may have never heard of before. English | ▾

How do I submit my music or comedy to Pandora?
After you sign in with your Pandora listener account, all it takes is a few simple steps to send us your tracks:

1. Provide us with your basic contact information
2. Give us details about your submission including your name, release information and link to your track
3. Ensure that you have legal rights to your work and it is available on iTunes (US only), Amazon.com/MP3, CD Baby or Bandcamp
4. Verify your account

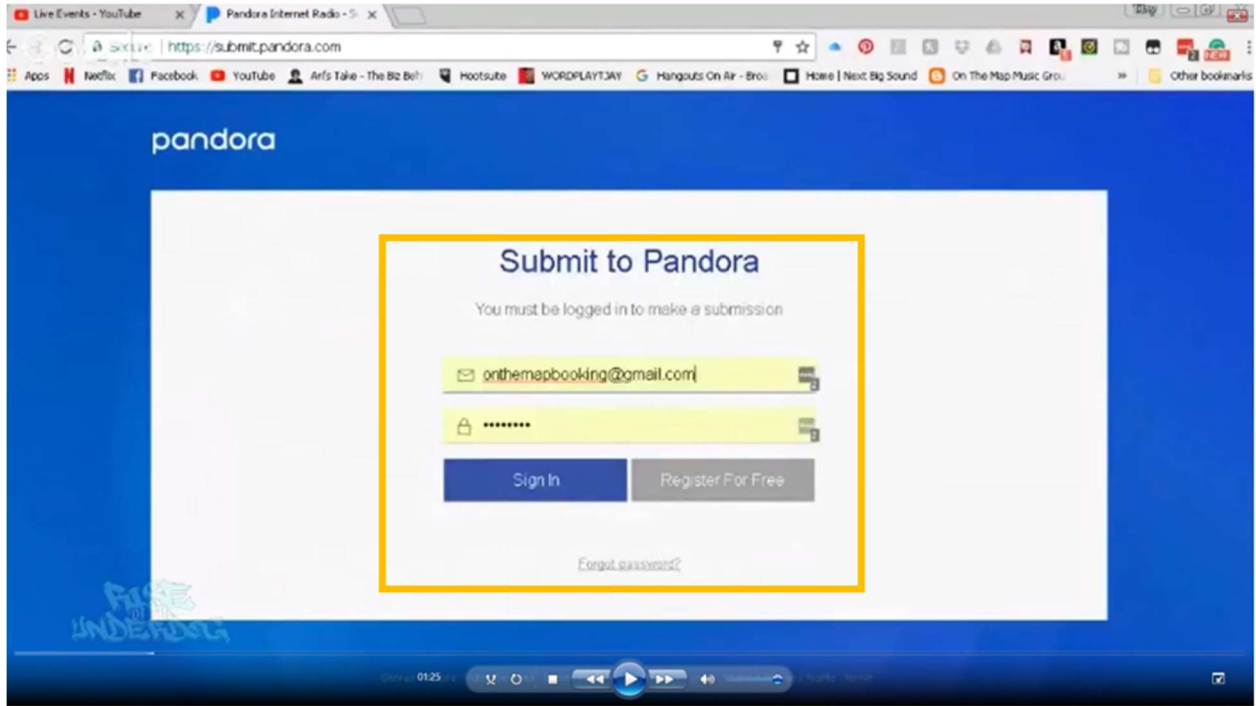

Where is the submission form located on Pandora?
You can go directly to submit.pandora.com or the Submit Your Music link in the footer of the web page.

What is different about the new submissions process?
The new system is simple and digital. With the new submissions process, you no longer need a CD available on amazon and UPC for your music or comedy. In a few clicks, your work is sent directly to our Curation team for review. Approved submissions are purchased and ingested from a digital music source.

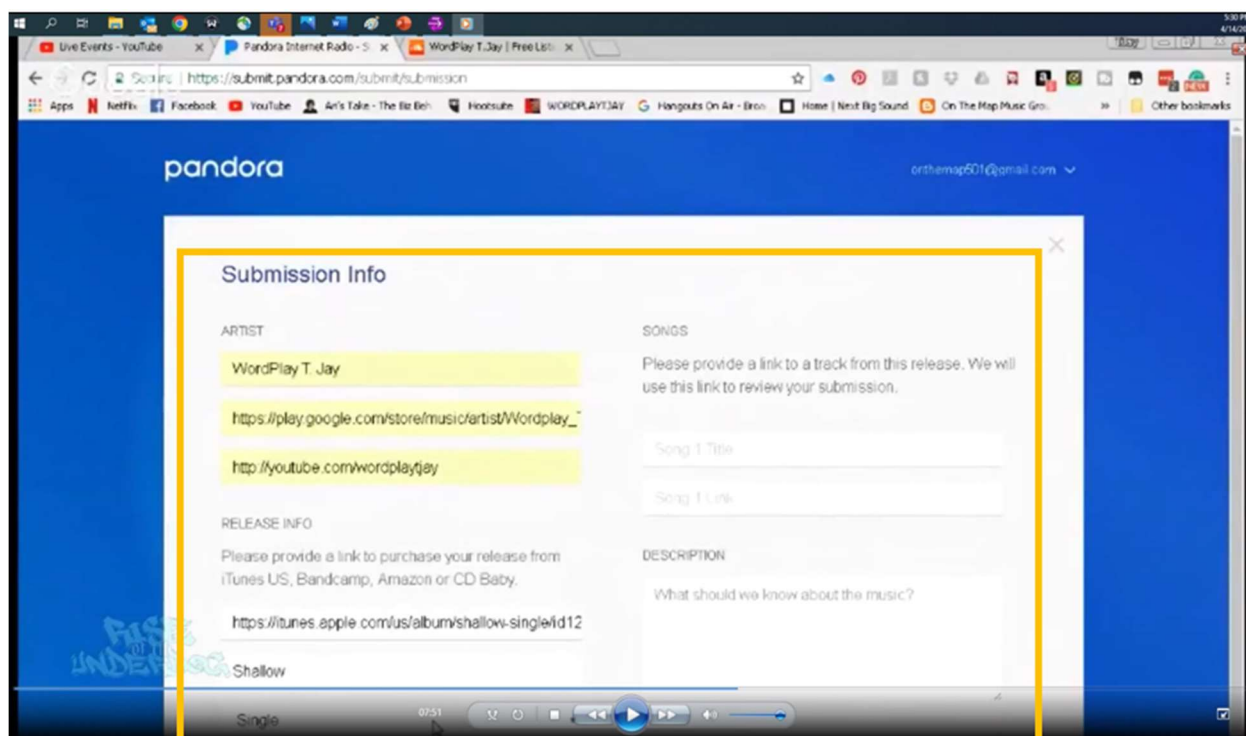

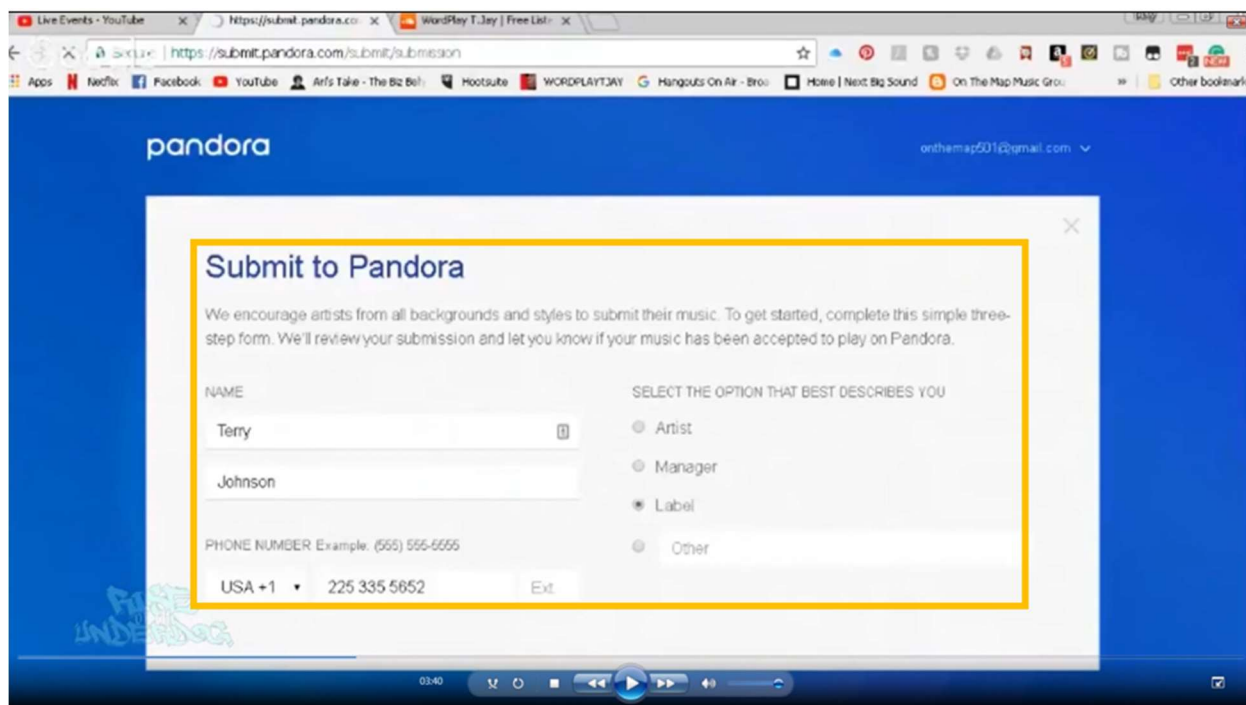

What do I need to submit my music or comedy to Pandora?
Here's what you need to have in hand to successfully submit to Pandora:

1. Pandora listener account
2. Contact information
3. Artist/band name
4. Name and type of release (Album, EP, or Single)
5. Valid link to one of your tracks on iTunes (US only), Amazon.com/MP3, CD Baby or Bandcamp from the release you are currently submitting

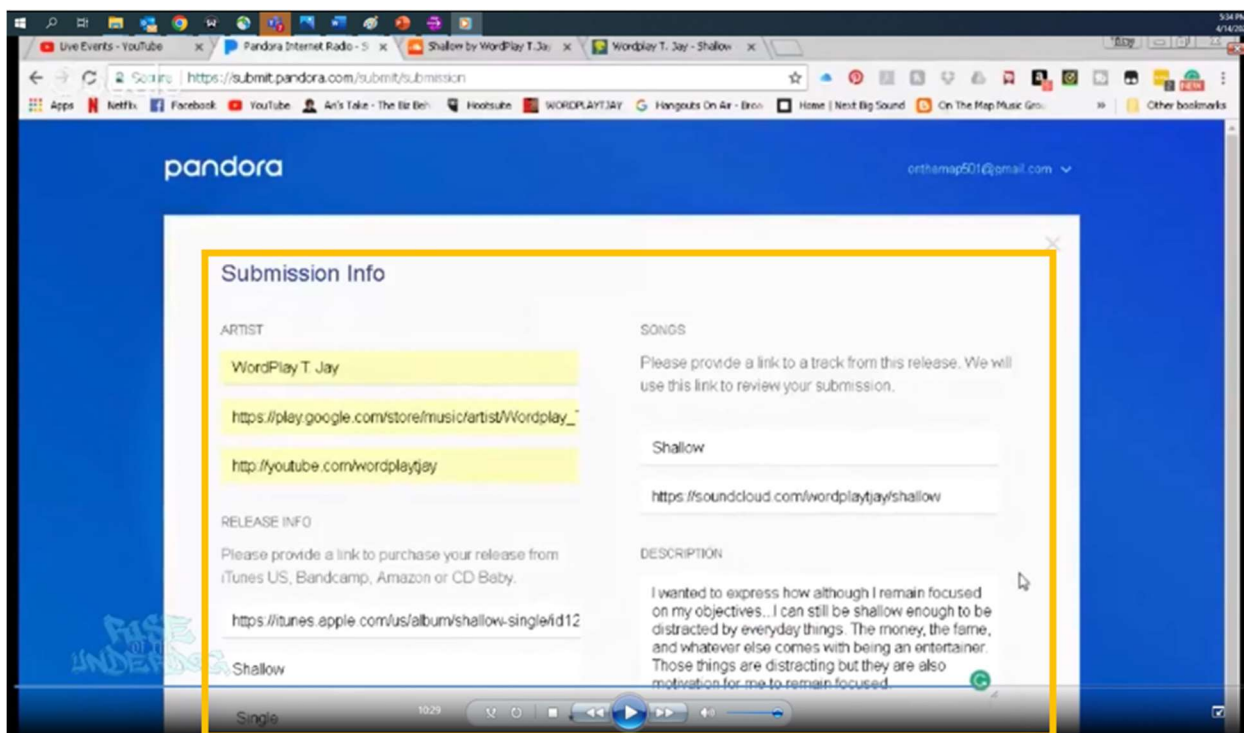

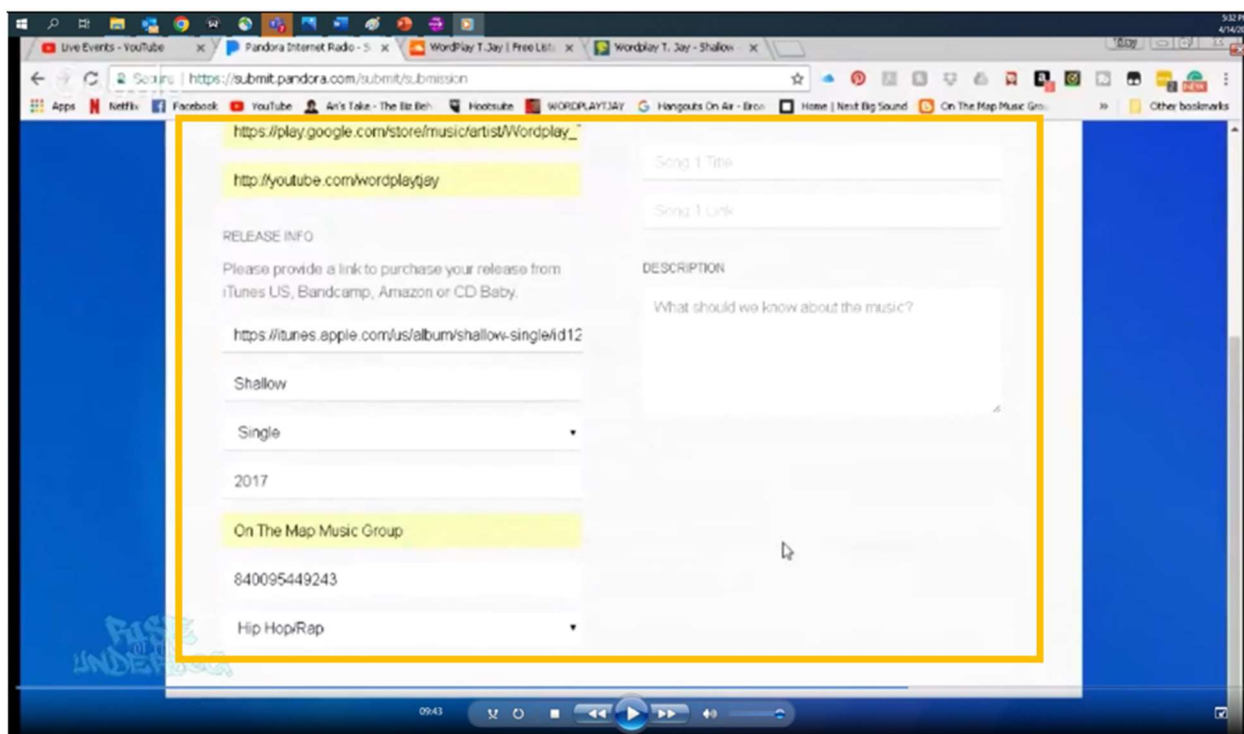

(E.g., <https://web.archive.org/web/20170106192724/http://help.pandora.com/customer/portal/articles/24802-information-for-artists-submitting-to-pandora>).

48. The electronic media submissions database of the Accused Instrumentality used by Pandora which stores the submissions (e.g., songs submitted by various Pandora users) further stores data identifying the submitter and data indicating content for each electronic media submission. Examples showing such data identifying the submitter and data indicating content associated and stored with a variety of submissions (e.g., songs) which are stored in the electronic media submissions database are shown below.

49. The Accused Instrumentality electronically generates multimedia files from the retrieved electronic media submissions in accordance with a selected digital format (e.g., a digital format compatible with a selected digital format compatible with the particular computer, browser, or application of a particular user), wherein the identification of the submitter is maintained with each retrieved submission within the multimedia file. For example, below are examples of such multimedia files being displayed within a user's browser, on user devices (e.g., computers or mobile devices incorporating browsers or the Pandora application), in association with the identification of the submitter for each retrieved submission within the multimedia file and its associated multimedia content (e.g., content associated with songs or other audio content), for example as shown below.

(E.g., <https://www.youtube.com/watch?v=fZ1CMW2Li0&t=55s>).

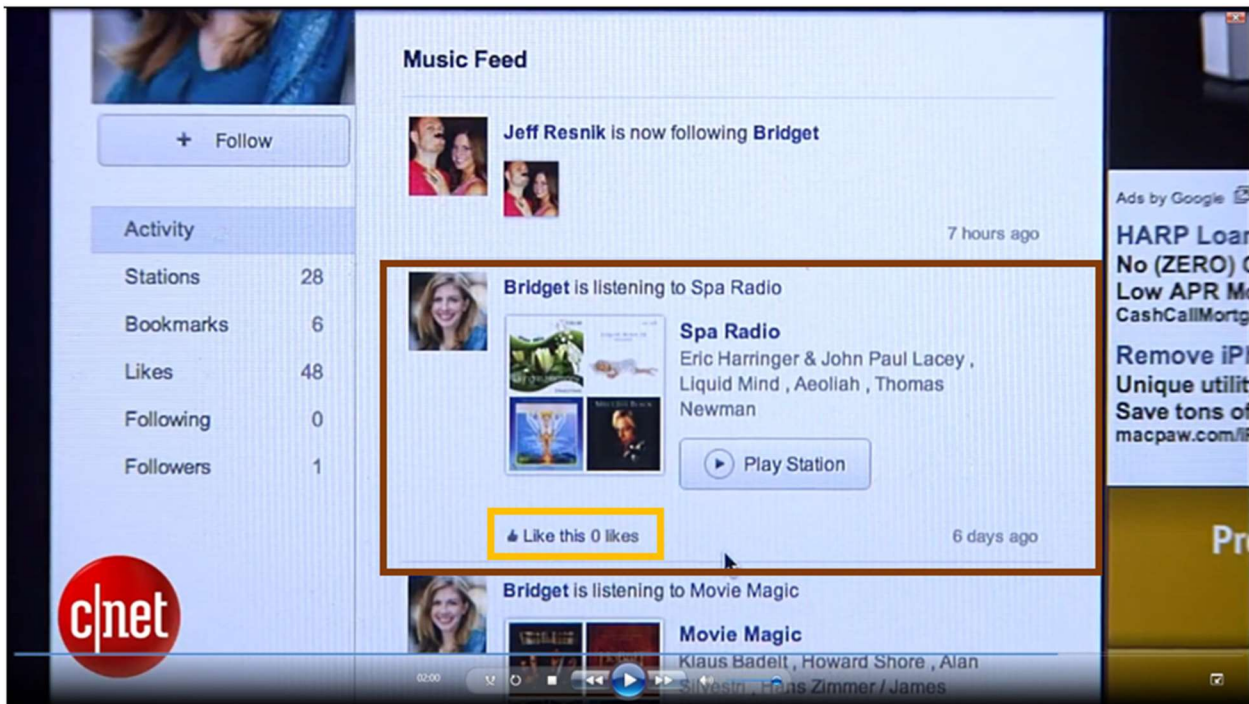

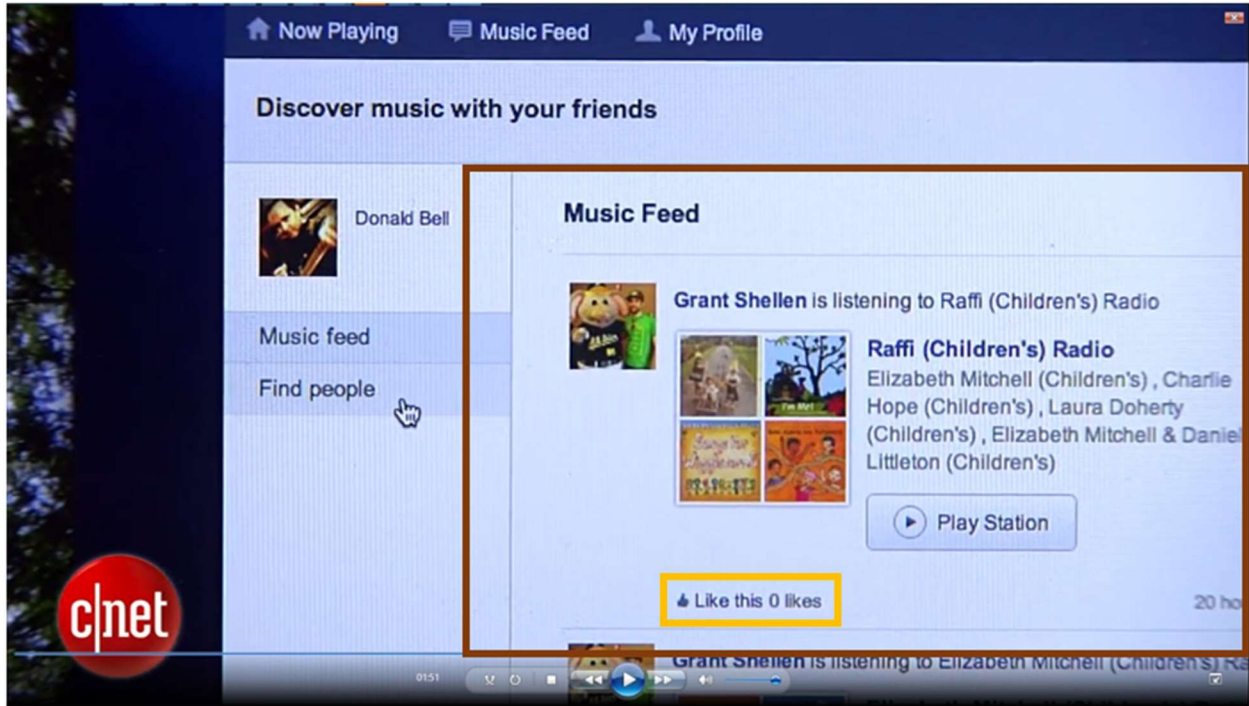

50. The Accused Instrumentality electronically transmits the multimedia file to a plurality of publicly available webservers, in order to ensure rapid delivery to any of various users from among a geographically-distributed userbase, to be electronically available for viewing on one or more user devices of such userbase over a public network (e.g., the Internet) via a web-browser. Examples of viewing of such multimedia files and their associated multimedia content on user devices via a public network via a web-browser is shown below. Such function-specific subsystems may be contained within the function-specific servers, from amongst communicatively connected Pandora servers, a plurality of which are publicly accessible and used to host content to the public, for example as discussed below.

(E.g., <https://www.youtube.com/watch?v=fZ1CMW2Li0&t=55s>).

51. The Accused Instrumentality provides (e.g., via its website's and app's user interface) a web-based graphical user interface that enables a user to electronically transmit data

(*e.g.* data indicative of the selection of a “thumbs up” or “thumbs down” icon) indicating a vote or rating for an electronically available multimedia content or an electronic submission (*e.g.* a song or audio item) within a respective electronically available multimedia content. As can be seen below, the Accused Instrumentality’s web-based graphical user interface enables selection of such a “thumbs up” or “thumbs down” icon to indicate a vote or rating for electronically available multimedia content or an electronic media submission within a respective electronically available multimedia content, and this data is transmitted to the Accused Instrumentality such that a total number of such selections is tracked and associated with the multimedia content and/or submission.

(E.g., https://www.youtube.com/watch?v=_fZ1CMW2Li0&t=55s).

(E.g., <https://www.youtube.com/watch?v=niTqJF6PH8M>).

52. Plaintiff has been damaged as a result of Defendant's infringing conduct. Defendant is thus liable to Plaintiff for damages in an amount that adequately compensates Plaintiff for such Defendant's infringement of the '665 Patent, *i.e.*, in an amount that by law cannot be less than would constitute a reasonable royalty for the use of the patented technology, together with interest and costs as fixed by this Court under 35 U.S.C. § 284.

53. To the extent marking is required, VCA has complied with all marking requirements.

V. JURY DEMAND

Plaintiff, under Rule 38 of the Federal Rules of Civil Procedure, requests a trial by jury of any issues so triable by right.

VI. PRAYER FOR RELIEF

WHEREFORE, Plaintiff respectfully requests that the Court find in its favor and against Defendant, and that the Court grant Plaintiff the following relief:

- a. Judgment that one or more claims of United States Patent No. 9,501,480 have been infringed, either literally and/or under the doctrine of equivalents, by Defendant;
- b. Judgment that one or more claims of United States Patent No. 9,477,665 have been infringed, either literally and/or under the doctrine of equivalents, by Defendant;
- c. Judgment that Defendant account for and pay to Plaintiff all damages to and costs incurred by Plaintiff because of Defendant's infringing activities and other conduct complained of herein, and an accounting of all infringements and damages not presented at trial;
- d. That Plaintiff be granted pre-judgment and post-judgment interest on the damages caused by Defendant's infringing activities and other conduct complained of herein; and
- e. That Plaintiff be granted such other and further relief as the Court may deem just and proper under the circumstances.

April 28, 2023

Respectfully Submitted,

/s/Steven G. Kalberg
