11  
**NATURE OF THE ACTION**

1. This is an action for declaratory judgment of non-infringement, invalidity, and unenforceability of eighteen (18) United States Patents pursuant to the Declaratory Judgment Act, 28 U.S.C. §§ 2201-02, and the Patent Laws of the United States, 35 U.S.C. § 100 *et seq.*, and for such other relief as the Court deems just and proper.

15  
16  
**INTRADISTRICT ASSIGNMENT**

2. This action includes patent-based declaratory judgment claims arising in connection with conduct occurring in or directed to Santa Clara County. Moreover, Intel's headquarters is located in Santa Clara County, and Intel employees with knowledge of the products likely to be at issue in this action are located within Santa Clara County. Accordingly, assignment to the San Jose Division is appropriate.

4. On information and belief, defendant Wi-LAN, Inc., is a corporation organized and existing under the laws of Canada and having its principal place of business at 11 Holland Avenue, Suite 608, Ottawa, Ontario, Canada.

5. On information and belief, defendant Wi-LAN Technologies Corporation is a corporation organized and existing under the laws of Canada and having its principal place of business at 11 Holland Avenue, Suite 608, Ottawa, Ontario, Canada.

6. On information and belief, defendant Wi-LAN Technologies, Inc. is a corporation organized and existing under the laws of Delaware and alleges that its principal place of business is

2 7. On information and belief, defendant Wi-LAN V-Chip Corp. is a corporation  
3 organized and existing under the laws of Canada and having its principal place of business at 41  
4 Pullman Court, Toronto, Ontario, Canada.

5 8. As alleged herein, Wi-LAN has engaged in various acts in and directed to California.

6 **JURISDICTION AND VENUE**

7 9. This Court has exclusive subject matter jurisdiction pursuant to 28 U.S.C. §§ 1331,  
8 1338(a), 1367, 2201, and 2202, and the Patent Laws of the United States, 35 U.S.C. § 1, *et seq.*  
9 Venue is proper in this judicial district pursuant to 28 U.S.C. §§ 1391 and 1400.

10 10. Wi-LAN purports to be the owner of rights in U.S. Patent Nos. 6,459,687, 6,549,759,  
11 6,577,863, 6,683,866, 6,693,887, 6,728,514, 6,804,211, 6,925,068, 6,944,188, 6,956,834, 6,963,617,  
12 7,006,530, 7,023,798, 7,177,598, 7,197,022, 7,289,467, 7,317,704, and 7,379,441 (collectively, the  
13 "Patents-in-Suit"). On its website, Wi-LAN alleges that the Patents-in-Suit relate to "WiMAX"  
14 products. WiMAX (Worldwide Interoperability for Microwave Access) and 802.16 refer to a  
15 wireless broadband communication standard promulgated by the IEEE. Wi-LAN has asserted these  
16 patents, including by asserting them against Intel, made public statements regarding the alleged  
17 applicability of its patents to products having WiMAX functionality including Intel's products, and  
18 confirmed its ability and willingness to file suit. Intel has undertaken meaningful preparations to  
19 make and sell products that comply with the IEEE 802.16 standards. Intel has not infringed and  
20 does not infringe, either directly or indirectly, any valid and enforceable claim of any of the Patents-  
21 in-Suit, either literally or under the doctrine of equivalents, nor is it aware of any infringement of  
22 any of the Patents-in-Suit. A substantial controversy exists between the parties which is of sufficient  
23 immediacy and reality to warrant declaratory relief.

24 11. This Court has personal jurisdiction over Wi-LAN. Wi-LAN has conducted business  
25 in and directed to California pertaining to the Patents-in-Suit, and has engaged in various acts in and  
26 directed to California. Additionally, inventors, former assignees and alleged licensees of the  
27 Patents-in-Suit, and attorneys responsible for the prosecution of the Patents-in-Suit, are located in  
28 California.

15 otherwise comply with one or more of 35 U.S.C. §§ 100 *et seq.*, 101, 102, 103, 112 and 132.

16 36. As a result of the acts described in the foregoing paragraphs, there exists a substantial  
17 controversy of sufficient immediacy and reality to warrant the issuance of a declaratory judgment.

18 37. A judicial declaration is necessary and appropriate so that Intel may ascertain its  
19 rights regarding the '687 patent.

20 **COUNT III - DECLARATION OF NONINFRINGEMENT OF U.S. PATENT NO. 6,549,759**

21 38. Intel repeats and realleges the allegations in paragraphs 1-37 as though fully set forth  
22 herein.

23 39. Intel has not infringed and does not infringe, directly or indirectly, any valid and  
24 enforceable claim of the '759 patent.

25 40. As a result of the acts described in the foregoing paragraphs, there exists a substantial  
26 controversy of sufficient immediacy and reality to warrant the issuance of a declaratory judgment.

27 41. A judicial declaration is necessary and appropriate so that Intel may ascertain its  
28 rights regarding the '759 patent.

1           **COUNT IV - DECLARATION OF INVALIDITY OF U.S. PATENT NO. 6,549,759**

2           42. Intel repeats and realleges the allegations in paragraphs 1-41 as though fully set forth  
3 herein.

4           43. The '759 patent is invalid for failure to meet the conditions of patentability and/or  
5 otherwise comply with one or more of 35 U.S.C. §§ 100 *et seq.*, 101, 102, 103, 112 and 132.

8           45. A judicial declaration is necessary and appropriate so that Intel may ascertain its  
9 rights regarding the '759 patent.

10           **COUNT V - DECLARATION OF UNENFORCEABILITY OF U.S. PATENT NO. 6,549,759**

11           46. Intel repeats and realleges the allegations in paragraphs 1-45 as though fully set forth  
12 herein.

13           47. Individuals subject to the duty of candor under 37 CFR 1.56 ("Applicants") engaged  
14 in inequitable conduct by withholding or misstating material information with intent to deceive the  
15 USPTO in connection with prosecuting the '759 patent, rendering the '759 patent unenforceable.

16           48. During prosecution of the '759 patent, Applicants were aware of prior art that they  
17 knew was material to patentability, including prior public disclosures material to patentability that  
18 they deliberately failed to properly disclose to the USPTO with intent to deceive.

19           49. For example, on or around July 7, 2000, a document entitled "Media Access Control  
20 Layer Proposal for the 802.16.1 Air Interface Specification" was submitted to the 802.16 MAC  
21 Subgroup by Glen Sater, of Motorola, and Kenneth L. Stanwood, of Ensemble Corporation.  
22 Kenneth L. Stanwood is a named inventor on the '759 patent.

23           50. Applicants' public disclosures, including those described above, were material to the  
24 patentability of the application that issued as the '759 patent. During prosecution of the application  
25 that issued as the '759 patent, with intent to deceive the USPTO, the applicants intentionally failed to  
26 disclose these public disclosures to the USPTO. Under Wi-LAN's improper and incorrect  
27 applications of the '759 patent's claims, these disclosures constitute prior art that renders the claims  
28 of the '759 patent invalid under 35 U.S.C. §§ 102 and/or 103.

1 51. As a result of the acts described in the foregoing paragraphs, there exists a substantial

3 52. A judicial declaration is necessary and appropriate so that Intel may ascertain its  
4 rights regarding the '759 patent.

5 **COUNT VI - DECLARATION OF NONINFRINGEMENT OF U.S. PATENT NO. 6,577,863**

6 53. Intel repeats and realleges the allegations in paragraphs 1-52 as though fully set forth  
7 herein.

8 54. Intel has not infringed and does not infringe, directly or indirectly, any valid and  
9 enforceable claim of the '863 patent.

10 55. As a result of the acts described in the foregoing paragraphs, there exists a substantial  
11 controversy of sufficient immediacy and reality to warrant the issuance of a declaratory judgment.

12 56. A judicial declaration is necessary and appropriate so that Intel may ascertain its  
13 rights regarding the '863 patent.

14 **COUNT VII - DECLARATION OF INVALIDITY OF U.S. PATENT NO. 6,577,863**
