JURISDICTION AND VENUE

3. This is an action for patent infringement arising under the patent laws of the United States of America, 35 U.S.C. § 1, *et seq.*, including § 271. This Court has subject matter jurisdiction under 28 U.S.C. §§ 1331 and 1338(a).
4. This Court has personal jurisdiction over Universal because, among other reasons, MGM is incorporated under the laws of the State of Delaware, and MGM has conducted and continues to conduct regular and ongoing business in Delaware. Additionally, on information and belief, MGM has committed and continues to commit acts of direct and indirect infringement in this District by making, using, importing, offering for sale, and/or selling infringing products, and inducing others to perform method steps claimed by FastVDO’s patent in Delaware.

5. Venue is proper in this district under 28 U.S.C. §§ 1391(b)-(c) and 1400(b) because, among other reasons, MGM is incorporated under the laws of the State of Delaware, and MGM has conducted and continues to conduct regular and ongoing business in Delaware. Additionally, on information and belief, MGM has committed and continues to commit acts of direct and indirect infringement in this District by making, using, importing, offering for sale, and/or selling infringing products, and inducing others to perform method steps claimed by FastVDO's patent in Delaware.

COUNT I

(Infringement of U.S. Patent No. RE 40,081)

6. FastVDO is the owner by assignment and merger of United States Patent No. RE 40,081 ("the '081 patent"), entitled "Fast Signal Transforms With Lifting Steps." The '081 patent reissued on February 19, 2008, based on an initial application filed December 16, 1998. A true and correct copy of the '081 patent is attached hereto as Exhibit A. The '081 patent enables digital video compression through the coding and decoding of blocks of digital image intensities with a block coder and transform coder that utilizes an invertible linear transform having a +/- butterfly step, a lifting step, and a scaling factor. International Telecommunications Union – Telecommunication Standardization Sector (ITU-T) H.264 (also known as MPEG-4 Part 10, Audio Video Coding or AVC) (herein "H.264" or "MPEG-4 AVC") is a video compression standard that performs digital image compression by coding and decoding blocks of digital image intensities with a block coder and with a transform coder that includes an invertible linear transform, which is representable as a cascade using at least one +/-1 butterfly step, at least one lifting step, and at least one scaling factor. The FastVDO patent is essential to the H.264 standard, and it was properly identified to the International Telecommunications Union on May 14, 2003, before the promulgation of the H.264 standard in March 2005. The claims of the FastVDO patent also encompass the VC-1 specification ("VC-1") standardized by the Society of Motion Picture and Television Engineers.

7. On information and belief, in violation of one or more provisions of 35 U.S.C. § 271, MGM has infringed one or more claims of the '081 patent by making, using, importing, selling, or offering to sell products or services that encode video using an H.264 or VC-1 codec. Additionally, MGM has had knowledge of the '081 patent since at least November 8, 2012,¹ or alternatively since being served with this complaint, and MGM has induced infringement of the '081 patent since this time by encoding its movies to video with an H.264 or VC-1 codec (or causing these movies to be encoded using an H.264 or VC-1 codec), transmitting these videos to consumers (or causing these videos to be transmitted to consumers), and causing consumers to decode these videos with an H.264 or VC-1 codec for viewing. For example, MGM has directly or indirectly encoded the following movies to video with an H.264 codec: The Princess Bride (25th Anniversary Edition)², Bond 50³, Quantum of Solace⁴, Red Dawn⁵, West Side Story (50th Anniversary Edition)⁶, Spaceballs (25th Anniversary Edition)⁷, Rocky: The Undisputed Collection⁸, and Hot Tub Time Machine⁹. These movies are being distributed as Blu-Ray discs in MPEG-4 AVC format. Consumers decode these videos with an H.264 codec in their Blu-Ray compliant devices when they watch these movies. By continuing the representative aforementioned activities with knowledge of the '081 patent and its essentiality to the H.264 and VC-1 standard, MGM has known, or should have known, that it was inducing infringement by causing the method steps of the '081 patent to be performed.

PRAYER FOR RELIEF

FastVDO prays for the following relief:

1. A judgment that MGM has directly infringed (either literally or under the doctrine of equivalents) one or more claims of the '081 patent;
2. A judgment that MGM has induced the infringement of one or more claims of the '081 patent;
3. A permanent injunction enjoining MGM and its officers, directors, agents, servants, affiliates, employees, divisions, branches, subsidiaries, parents, and all others acting in active concert or participation with them, from infringing each of the '081 patent;
4. An award of damages resulting from the acts of infringement by MGM in accordance with 35 U.S.C. § 284;
5. A judgment and order finding that this is an exceptional case within the meaning of 35 U.S.C. § 285 and awarding to FastVDO its reasonable attorneys' fees;
6. A judgment and order requiring MGM to provide an accounting and to pay supplemental damages to FastVDO, including without limitation, pre-judgment and post-judgment interest; and
7. Any and all other relief to which FastVDO may show itself to be entitled.
