NATURE OF ACTION

2. This is an action for patent infringement arising under the patent laws of the United States, 35 U.S.C. §§ 271, *et seq.*, to enjoin infringement and obtain damages resulting from Defendants’ unauthorized manufacture, use, sale, offer to sell, and/or importation into the United States for subsequent use or sale of products, methods, processes, services, and/or systems that infringe one or more claims of United States Patent No. 8,217,428 (the “428 Patent”), entitled “Integrated Circuit Including Gate Electrode Level Region Including at Least Three Linear-Shaped Conductive Structures of Equal Length Having Aligned Ends and Positioned at Equal Pitch and Forming Multiple Gate Electrodes of Transistors of Different Type” (attached as Exhibit A); United States Patent No. 8,258,547 (the “547 Patent), entitled “Semiconductor Device with Linearly Restricted Gate Level Region Including Two Transistors

of First Type and Two Transistors of Second Type with Offset Gate Contacts” (attached as Exhibit B); United States Patent No. 8,030,689 (the “’689 Patent”), entitled “Integrated Circuit Device and Associated Layout Including Separated Diffusion Regions of Different Type Each Having Four Gate Electrodes with Each of Two Complementary Gate Electrode Pairs Formed from Respective Linear Conductive Segment” (attached as Exhibit C); United States Patent No. 8,258,550 (the “’550 Patent”), entitled “Semiconductor Device Including at Least Six Transistor Forming Linear Shapes Including at Least Two Transistor Forming Linear Shapes Having Different Extension Distances Beyond Gate Contact” (attached as Exhibit D); United States Patent No. 8,258,552 (the “’552 Patent”), entitled “Semiconductor Device Including at Least Six Transistor Forming Linear Shapes with at Least Two Transistor Forming Linear Shapes Having Offset Ends” (attached as Exhibit E); United States Patent No. 8,264,044 (the “’044 Patent”), entitled “Integrated Circuit Including Cross-Coupled Transistors Having Two Complementary Pairs of Co-Aligned Gate Electrodes with Offset Contacting Structures Positioned Between Transistors of Different Type” (attached as Exhibit F); and United States Patent No. 8,264,049 (the “’049 Patent”), entitled “Integrated Circuit Including Cross-Coupled Transistors with Two Transistors of Different Type Having Gate Electrodes Formed by Common Gate Level Feature with Shared Diffusion Regions on Opposite Sides of Common Gate Level Feature” (attached as Exhibit G).

3. This action for patent infringement involves Defendants’ manufacture, use, sale, offer for sale, and/or importation into the United States of infringing products, methods, processes, services, and systems that are primarily used or primarily adapted for use in portable communication devices, including, but not limited to, Defendants’ mobile telephones, telecommunication devices, computer tablets, and other portable communication devices.

4. Plaintiff seeks injunctive relief to prevent Defendants from continuing to infringe Plaintiff's patents. In addition, Plaintiff seeks a recovery of monetary damages resulting from Defendants' past infringement of these patents.

THE PARTIES

5. Plaintiff Tela is a privately held company with its principal place of business at 485 Alberto Way, Suite 115, Los Gatos, California 95032.

6. Tela has developed and patented design solutions for advanced integrated circuit ("IC") manufacturing processes where lithography driven constraints require novel approaches to both digital circuit design and the physical implementation of these designs. More specifically, Tela developed patented design solutions that enable continued cost-effective scaling of semiconductor manufacturing processes.

7. Tela's products, including cell libraries, layouts and software, enable IC designers to achieve improved performance, area and power characteristics as semiconductor processes continue to scale. Tela has been the recipient of U.S. government contracts under which it has made significant contributions toward developing its technology for use by the U.S. government, in addition to private semiconductor manufacturing companies. Tela has also entered into numerous evaluation and testing agreements with customers and potential customers under which its products employing its patented technology have been evaluated.

8. Plaintiff Tela is the lawful assignee of all right, title, and interest in and to the '428, '547, '689, '550, '552, '044, and '049 Patents (collectively, the "Asserted Patents").

9. Upon information and belief, Defendant Nokia Corporation is a foreign corporation organized and existing under the laws of Finland, with its principal place of business at Keilalahdentie 2-4, FI-02150 Espoo, Finland. Nokia Corporation is in the business of making, offering for sale, selling, and supporting products containing integrated circuit devices including,

without limitation, cellular telephones and computer tablets that are manufactured outside of the United States. Nokia Corporation is the primary research, development, and manufacturing base for the entire Nokia corporate structure, and maintains manufacturing subsidiaries in Finland. Nokia Corporation identifies the United States as a key market and has established a subsidiary, Nokia, Inc., to maintain Nokia Corporation's presence in the United States. Nokia Corporation is the parent corporation of Defendant Nokia, Inc.

10. Upon Information and belief, Defendant Nokia, Inc. is a corporation organized and existing under the laws of the state of Delaware, with its principal place of business located at 200 South Matilda Avenue, West Washington Avenue, Sunnyvale, California 94086. Nokia, Inc. is a wholly-owned subsidiary of Nokia Corporation, and is designated as a key Nokia operation center. Nokia, Inc. is in the business of making, offering for sale, importing, selling, and supporting products containing integrated circuit devices including, without limitation, cellular telephones and computer tablets, in the United States, that are manufactured outside of the United States. On information and belief, Nokia, Inc. is responsible for all of Nokia Corporation's activities taking place in the United States, including the importation of goods into the United States from foreign countries. Nokia Corporation and Nokia, Inc. are referred to collectively as "Nokia."

11. Tela has been irreparably harmed by the Defendants' infringement of its valuable patent rights. Moreover, Defendants' unauthorized and infringing uses of Tela's patented technology have threatened the value of this intellectual property because Defendants' conduct results in Tela's loss of its lawful patent rights to exclude others from making, using, selling, offering to sell, and/or importing the patented technology.
